Unit description

This unit investigates some of the main ethical issues that arise in professional life and from the activities of businesses and corporations. The unit explores the nature and value of work as well as its role in personal identity and social organisation. We also consider the obligations and responsibilities that come with professional work and the management of businesses. We examine the nature of corporations and their responsibilities to individual workers and consumers, stakeholders, groups such as women and minorities, and the environment.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Demonstrate good general knowledge of the major issues in contemporary business and professional ethics.

ULO2: Understand the major ethical concepts and theories that inform the business and professional ethics literature.

ULO3: Analyse and critically evaluate theories and arguments in the relevant literature.

ULO4: Relate ethical concepts and theories to relevant case studies and current events.

ULO5: Develop your own perspective, through analysis of the views and arguments presented in the unit.

ULO6: Demonstrate improved skills in clarity of thought and communication.

General Assessment Information

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a mark of 0 (zero) will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical issue.

This late penalty will apply to non-timed sensitive assessment (incl essays, reports, posters, portfolios, journals, recordings etc). Late submission of time sensitive tasks (such as tests/ exams, performance assessments/presentations, scheduled practical assessments/labs etc) will only be addressed by the unit convenor in a Special consideration application. Special Consideration outcome may result in a new question or topic.

Note on Artificial Intelligence:

You have undoubtedly heard about ChatGPT and other Generative AI tools that can be used to generate content in relation to prompts. You may find it useful and interesting to see what these tools can tell you about some of the topics we're looking at. We will also be thinking about some interesting philosophical questions arising out of artificial intelligence. A few warnings are in order, though, about content generated by ChatGPT or similar tools:

1. It's not your work, so you can't submit it, or adapt it a bit and then submit it. This will count as a breach of the Academic Integrity Policy. This applies to any assessments.

2. It's not reliable. It gets a lot of things right, but it also gets things wrong, makes up references etc, and its outputs tend to be shallow and generic.

3. It doesn't count as research. We'll talk more later about what count as good sources for academic work, but using ChatGPT means you don't always have a way to trace and check the sources of the content you're using.

A useful analogy, I think, is to think of ChatGPT as being like a knowledgable but slightly unpredictable acquaintance. Talking to them might be a good way to get some ideas to inspire your own thinking and research, but you can't take what they say for granted, and you can't pretend their work is your own.

This unit covers a lot of really interesting topics. We want you to engage, and we want you to learn. You won't do that if you try to outsource your thinking.
