Unit description

This unit examines the economics behind the growing health sector in Australia and other advanced economies. It helps students to understand issues such as the unique characteristics of the health care market, pricing by doctors and hospitals, and the mix of public and private funding and insurance. Topics can include the economics of health care (demand and supply, market imperfections including market failure and resulting resource allocation), the behaviour of agents (hospitals, physicians and private health insurers), health care systems globally and in Australia, equity and ethics in health resource allocation, and the health of Australia's indigenous population.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Apply theoretical microeconomics to health economics.

ULO2: Identify and analyse the role of health economics in understanding health systems and how different solutions affect different stakeholders.

ULO3: Analyse the unusual features of markets for health care compared with markets for other goods and services.

ULO4: Effectively communicate, individually and as a group, knowledge of health economics in technical and non-technical language.
