Unit description

This unit discusses why economics is the way it is, past contributions to economic knowledge, whether there has been progress in economic thinking, and how would we know it. The unit considers the history of economic thought from a non-standard and enlightening perspective. Rather than tracing a chronology of authors and schools of thought, students examine the evolution of theories and ideas from their origins (sometimes in antiquity) to their modern forms. This puts economics in context and enables students to appreciate historical, social and philosophical influences on the development of economic thought. Topics may include theories of value, distribution, growth and economic cycles.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Identify the distinguishing characteristics of key schools of thought and stages in the development of economic theory.

ULO2: Evaluate the major theoretical approaches to the analysis of economic issues, the assumptions on which they are based, and their implications.

ULO3: Analyse and describe the important individual contributors to the development of economics.

ULO4: Exhibit the ability to interpret economic reasoning as presented in varying literary

forms at different points in time.

ULO5: Show a clear capacity to critically assess and compare current and historical approaches to the development of economics.

General Assessment Information

As reflections will be based on unit content (recorded lectures) the marks for blogs will be affected by the amount of relevant content viewed. Watch rates of lecture videos will be tracked via ECHO360 and will partly determine marks for individual blogs. Note also that attendance at tutorials for which work is being submitted is necessary for the reflective component to be marked.

See the guides to assessment tasks available on iLearn for more detail.

Late Assessment Submission Penalty (written assessments)

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of '0' will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical concern. For any late submissions of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, students need to submit an application for [Special Consideration](#).
