Unit description

This unit aims to develop effective communication skills for professional practice in diverse institutional, organisational and workplace contexts. The unit examines how communication functions in professional contexts to achieve individual and institutional outcomes that are ethical and socially responsible. Students will draw on existing knowledge of their discipline and relevant regulatory, ethical or social frameworks to identify the critical communication demands of their field, for example whilst interacting with clients and negotiating with stakeholders. At the same time, students will develop the communication skills, practices and strategies to respond to these demands. Key outcomes of the unit are the ability to create written, spoken and multi-modal texts for diverse audiences and purposes; an ePortfolio demonstrating professional communication skills, practices and strategies; and a personal learning and professional development plan for ongoing development of communication skills. As well as equipping students with communication skills for the workplace, the unit is suitable for students who plan to undertake further study and/or research in their discipline.
