Unit description

This unit discusses international television programs and the way in which these are constructed and distributed by media companies, and how they are interpreted within different cultures. News and current affairs television are studied, as are entertainment and educational programming.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Working in teams of three design a television game show around the readings for the given week to test the knowledge of your peers. You are expected to think of creative ways of inviting participation of all students to draw out their views on the weekly topic, lecture and readings.

Each student must demonstrate his or her contribution towards the planning of the team activity. Before commencing your game show provide the tutor with a printed one-page explanation which details the activity of each member as well as the key concepts and main points of the readings covered.

This assignment assesses your ability to critique two culturally divergent global television news services by analysing their online news content.

Length: 1500 words.

top 5 stories covered by subject (i.e. politics, business/economics, conflict, human interest, celebrity) and geographical interest (i.e. North America, Europe, Asia, Latin America, Pacific)

- Who are the experts quoted? (i.e. their cultural, political or social orientation) Are they from an elite or non-elite country or group?
- From what cultural/national perspectives are the stories being reported?
- Who is the target audience?
- What are the predominant news values?

Your insights and analysis should be supported by examples from the evidence gathered as well as course readings and other literature.

Attach samples of your page views as an appendix to your analysis for each website (no more than 4 pages).

Examples of global news networks your may choose:

- BBC
- Al Jazeera
- CNN
- CCTV
- France24
- Xinhua News Agency
- ABC News World
- TimesNow.tv

Other international television organisations may be chosen after consulting with your tutor.

Submit your analysis and samples as one document to Turnitin by 11pm Friday 19 September, 2014.

Length: 2000 words

Photocopy and use the log sheet that will be distributed in class to fill out details from your **observations over the 4 weeks**. You may use Marie Gillespie's observations on the use of television among South Asian families in Southall as a guide (Gillespie 1995, see Week 9 readings). You must attach these log sheets and all working notes on observations to your final report.

Your log must provide details on the following:

- Day, time, channel, type (e.g. free-to-air, pay TV)
- The nature of the content (programs watched, genre, language, advertisements etc.)
- Duration of viewing
- Other uses of television (e.g. to watch DVDs, use of games consoles etc.)
- The people who shared or participated in the viewing events (describe them)
- Activities that took place during the viewing events

Your report will summarize your key observations and findings over the 4 weeks and directly link these to course materials (especially Week 9 readings, including extra readings) and other relevant readings you find, as well as concepts discussed in lectures and tutorials.

Week 2 Study of Television

Until the arrival of the Internet in the late 1990s, television was the most glamorous field of study and research across the many fields of media scholarship. While technologies may eventually blur the distinctions between television and Internet content, audiences and broadcaster, the old box remains the key to widespread public access to information, entertainment and communication around the world.

Tutorial activity: What are the global frameworks within which study of global television may be conducted as discussed by Straubhaar. Name some key approaches to television study as discussed by Burton.

Straubhaar, J. (2007) *World Television: From Global to Local*, Thousand Oaks: Sage, pp. 1-29

Week 3 Trends and Flows

Whether you've got access to one channel or 500, television has spread to virtually all parts of the world in one way or another over the last 50 years. At one level it is global and flows across national borders, at another it is local and reflects the character of its audiences.

Tutorial activity: What are the characteristics of transnational television? Define and discuss cultural proximity in relation to audience reception of global television? Discuss the success of *Ugly Betty* as a format programming in different markets.

Week 4 Television News

Beyond direct experience, television news plays an important role in shaping the viewers'

knowledge about places, people and events around the world. However, the view of the world through television news is distorted and disorientating. This can cause dire political, cultural and social misunderstanding.

Tutorial activity: Define and discuss two of the following - News Agenda, agenda setting, gate keeping and news values. What are some key professional practices and cultural factors that influence news production? Watch television news segments and identify some of these.

Week 6 Development Television

Television has played an important role in the developing world in educating and informing the population as well as in the project of nation building.

Tutorial Discussion: Using the case study of Doordarshan discuss the development mandate of television broadcasting in India. How can television contribute to bringing a diversity of views in plural societies such as nations in Africa?

Week 7 State-Funded TV Services

Public service broadcasting has traditionally aimed at social agendas associated with concepts like nation-building, education and information dissemination. In recent years these concepts have been challenged by conservative political agendas that emphasise a reduced role for government in public services.

Tutorial activity: Discuss the principles of Public Service broadcasting and how it contributes towards a democratic society? How is Chinese State television different to western public service broadcasting?

Week 8 Hybridity, Identity and TV Consumption

Many people worry about the amount of foreign TV programs that appear on their screens. This relates to the concern that exposure to foreign values, behaviours and practices will ruin local cultures and traditions. This debate remains one of the strongest themes in the study of international flows of programming.

Tutorial Discussion: How does audience identity play out in TV consumption?

Week 9 TV Audience Research

Television can be found almost everywhere: from the lounge room to the airport lounge people can be found glued to it – or are they? Audience research illustrates the social, cultural, political

and economic dimensions of television and just what it means to the viewer.

Tutorial Discussion: What are the differences between effects study and reception study in television research.

Week 10 Indigenous Television

Indigenous and community groups want access to television production for cultural maintenance and social action. Aboriginal people in Australia and Canada are leading the world in the production of proactive messages for their people to counter mainstream programming.

Week 11 Commercial Imperatives - Entertainment TV

Television has become a promotional space that is aimed at matching audiences with advertisers. The pressures of commercialisation have reconfigured all aspects of television to generate profits and encourage the consumption of products and services.

Tutorial Discussion: How have commercial imperatives changed the business of television?

New media technologies like the Internet and mobile communications have completely reconfigured the entertainment and information business. Television audiences are disappearing and moving onto interactive and on-demand services while digital TV remains an unrealised revolution.

University Policy on Grading

The grade a student receives will signify their overall performance in meeting the learning outcomes of a unit of study.

Grades will not be awarded by reference to the achievement of other students nor allocated to fit a predetermined distribution.

In determining a grade, due weight will be given to the learning outcomes and level of a unit (ie 100, 200, 300, 800 etc).

Graded units will use the following grades and be aligned/mapped to the listed numerical range:

HD	High Distinction	85-100
D	Distinction	75-84
Cr	Credit	65-74
P	Pass	50-64
F	Fail	0-49

High Distinction Provides consistent evidence of deep and critical understanding in relation to the learning outcomes. There is substantial originality and insight in identifying, generating and communicating competing arguments, perspectives or problem solving approaches; critical evaluation of problems, their solutions and their implications; creativity in application as appropriate to the discipline.

Distinction Provides evidence of integration and evaluation of critical ideas, principles and theories, distinctive insight and ability in applying relevant skills and concepts in relation to learning outcomes. There is demonstration of frequent originality in defining and analysing issues or problems and providing solutions; and the use of means of communication appropriate to the discipline and the audience.

The learning attainment is considered satisfactory or adequate or competent or capable in relation to the specified outcomes.

Fail Does not provide evidence of attainment of learning outcomes. There is missing or partial or superficial or faulty understanding and application of the fundamental concepts in the field of study; missing, undeveloped, inappropriate or confusing argumentation; incomplete, confusing or lacking communication of ideas in ways that give little attention to the conventions of the discipline.

Satisfactory Used for units where grading is on a pass or fail basis only. The learning attainment is considered satisfactory in relation to the specified outcomes.

S Satisfactory No range

F Fail No range
