Prerequisites

[PSYC104(P) and PSYC105(P)] or [(STAT122(P) or STAT170(P) or STAT171(P) or PSY122(P)) and (PSY104(P) or PSYC104(P)) and (PSY105(P) or PSYC105(P))] or admission to GDipPsych

Corequisites

Co-badged status

Unit description

Our health status is a reflection of a fascinating mix of physiological factors with our psychological and social environments. The overall objective of this unit is to provide a critical overview of both the psychological and social aspects of human health and well-being. In the first part of this unit we provide some foundations or building blocks for understanding the role of psychology in the health context by reviewing the most important approaches to health psychology as well as approaches to prevention of disease. We then explore a variety of psychosocial factors and specific mechanisms that have been found to impact our health status, both from the individual perspective and the wider environment and cultural context.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

Delineating between the biological/medical approaches to health and the biopsychosocial approaches.

The type of empirical research that underpins our understanding of health status as well

as commonly used research modalities and research challenges in health settings

The major theories that attempt to explain health related behaviour.

The function and interrelation of the body's systems in determining health status, with an in depth examination of pain processes.

The role of cognitive and affective factors as determinants of health status

Aspects of health communications as determinants of health status

Stress and coping with stress and chronic illness

Common approaches to modifying health beliefs and behaviours

The overarching role of culture as a determinant of health and health-related behaviours

Assessment Tasks

Name	Weighting	Due
<u>Essay</u>	35%	Usually first half Sem 1
<u>Tutorial presentation</u>	10%	Varies depending on topic week
<u>Health-related advertisement</u>	15%	Usually first half Sem 1
<u>Mid-semester exam</u>	15%	Week 6 lecture
<u>Final exam</u>	25%	Final exam period

Essay

Due: **Usually first half Sem 1**

Weighting: **35%**

On successful completion you will be able to:

- Delineating between the biological/medical approaches to health and the biopsychosocial approaches.
- The type of empirical research that underpins our understanding of health status as well as commonly used research modalities and research challenges in health settings
- The major theories that attempt to explain health related behaviour.
- The role of cognitive and affective factors as determinants of health status
- Common approaches to modifying health beliefs and behaviours

Tutorial presentation

Due: **Varies depending on topic week**

Weighting: **10%**

Maximum 2 pages for summary

Details will be provided in Tutorial 1

Due date as specified by choice of presentation topic

On successful completion you will be able to:

- Delineating between the biological/medical approaches to health and the biopsychosocial approaches.
- The type of empirical research that underpins our understanding of health status as well as commonly used research modalities and research challenges in health settings
- The function and interrelation of the body's systems in determining health status, with an in depth examination of pain processes.
- The role of cognitive and affective factors as determinants of health status
- Aspects of health communications as determinants of health status
- Stress and coping with stress and chronic illness
- Common approaches to modifying health beliefs and behaviours
- The overarching role of culture as a determinant of health and health-related behaviours

Health-related advertisement

Due: **Usually first half Sem 1**

Weighting: **15%**

2 pages

Details will be provided in Tutorial 1

On successful completion you will be able to:

- The type of empirical research that underpins our understanding of health status as well as commonly used research modalities and research challenges in health settings
- The role of cognitive and affective factors as determinants of health status
- Aspects of health communications as determinants of health status
- Common approaches to modifying health beliefs and behaviours
- The overarching role of culture as a determinant of health and health-related behaviours

Mid-semester exam

Due: **Week 6 lecture**

Weighting: **15%**

On successful completion you will be able to:

- Delineating between the biological/medical approaches to health and the biopsychosocial approaches.
- The type of empirical research that underpins our understanding of health status as well as commonly used research modalities and research challenges in health settings
- The major theories that attempt to explain health related behaviour.
- The role of cognitive and affective factors as determinants of health status
- Aspects of health communications as determinants of health status
- Stress and coping with stress and chronic illness
- Common approaches to modifying health beliefs and behaviours
- The overarching role of culture as a determinant of health and health-related behaviours

Final exam

Due: **Final exam period**

Weighting: **25%**

On successful completion you will be able to:

- Delineating between the biological/medical approaches to health and the biopsychosocial approaches.
- The type of empirical research that underpins our understanding of health status as well as commonly used research modalities and research challenges in health settings
- The major theories that attempt to explain health related behaviour.
- The role of cognitive and affective factors as determinants of health status
- Aspects of health communications as determinants of health status
- Common approaches to modifying health beliefs and behaviours
- The overarching role of culture as a determinant of health and health-related behaviours

Delivery and Resources

Technology

Students are expected to submit the essay, tutorial presentation summary and health-advertisement as word-processed documents. Consequently, all students will need access to a computer to complete these tasks.

Lecture and Tutorial times

Lecture

Number of lectures: One lecture per week

Length of lectures: 2 hours

Venue: Thursday 11- 1pm, W5AT1

Tutorial

Number of tutorials: One tutorial per week commencing Week 2

Length of tutorials: 1 hour

Venue: Monday 12-1pm, E6A131; Monday 4-5pm, W5A 105; Tuesday 11-12pm, E6A131;
Tuesday 12-1pm, E6A131

Information

iLearn

Students can access the Psy224 website through iLearn.mq.edu.au

Changes since the last offering of this unit.

The assessments for this unit have changed since the previous offering.

Other Material

Required and Recommended Texts and/or Materials

The prescribed text for this unit is available from the Co-Op Bookshop:

Morrison, V., Bennett, P., Butow, P., Mullan, B., & White, K. (2012). *Introduction to Health Psychology in Australia*. 2 Ed Frenchs Forest, NSW: Pearson.

Unit Schedule

Lectures - 2 hours per week

Tutorials - 1 hour per week, commencing in week 2

Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](#). Students should be aware of the following policies in particular with regard to

Learning and Teaching:

Academic Honesty Policy http://mq.edu.au/policy/docs/academic_honesty/policy.html

Assessment Policy <http://mq.edu.au/policy/docs/assessment/policy.html>

Grading Policy <http://mq.edu.au/policy/docs/grading/policy.html>

Grade Appeal Policy <http://mq.edu.au/policy/docs/gradeappeal/policy.html>

Grievance Management Policy http://mq.edu.au/policy/docs/grievance_management/policy.html

Disruption to Studies Policy http://www.mq.edu.au/policy/docs/disruption_studies/policy.html *The Disruption to Studies Policy is effective from March 3 2014 and replaces the Special Consideration Policy.*

In addition, a number of other policies can be found in the [Learning and Teaching Category](#) of Policy Central.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/support/student_conduct/

Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- [Workshops](#)
- [StudyWise](#)
- [Academic Integrity Module for Students](#)
- [Ask a Learning Adviser](#)

Student Services and Support

Students with a disability are encouraged to contact the [Disability Service](#) who can provide appropriate help with any issues that arise during their studies.

Student Enquiries

For all student enquiries, visit Student Connect at ask.mq.edu.au

IT Help

For help with University computer systems and technology, visit <http://informatics.mq.edu.au/hel>

p/.

When using the University's IT, you must adhere to the [Acceptable Use Policy](#). The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

Capable of Professional and Personal Judgement and Initiative

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:

Learning outcomes

- The type of empirical research that underpins our understanding of health status as well as commonly used research modalities and research challenges in health settings
- The major theories that attempt to explain health related behaviour.
- The role of cognitive and affective factors as determinants of health status
- Aspects of health communications as determinants of health status
- Stress and coping with stress and chronic illness
- Common approaches to modifying health beliefs and behaviours

Assessment tasks

- Tutorial presentation
- Health-related advertisement
- Mid-semester exam
- Final exam

Commitment to Continuous Learning

Our graduates will have enquiring minds and a literate curiosity which will lead them to pursue knowledge for its own sake. They will continue to pursue learning in their careers and as they participate in the world. They will be capable of reflecting on their experiences and relationships with others and the environment, learning from them, and growing - personally, professionally and socially.

This graduate capability is supported by:

Learning outcomes

- The type of empirical research that underpins our understanding of health status as well as commonly used research modalities and research challenges in health settings

- The major theories that attempt to explain health related behaviour.
- The role of cognitive and affective factors as determinants of health status
- Aspects of health communications as determinants of health status
- Stress and coping with stress and chronic illness

Assessment tasks

- Essay
- Tutorial presentation
- Health-related advertisement
- Mid-semester exam
- Final exam

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

- Delineating between the biological/medical approaches to health and the biopsychosocial approaches.
- The major theories that attempt to explain health related behaviour.
- The function and interrelation of the body's systems in determining health status, with an in depth examination of pain processes.
- The role of cognitive and affective factors as determinants of health status
- Aspects of health communications as determinants of health status
- Stress and coping with stress and chronic illness
- Common approaches to modifying health beliefs and behaviours
- The overarching role of culture as a determinant of health and health-related behaviours

Assessment tasks

- Essay
- Tutorial presentation
- Health-related advertisement

- Mid-semester exam
- Final exam

Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

Learning outcomes

- Delineating between the biological/medical approaches to health and the biopsychosocial approaches.
- The type of empirical research that underpins our understanding of health status as well as commonly used research modalities and research challenges in health settings
- The major theories that attempt to explain health related behaviour.
- The role of cognitive and affective factors as determinants of health status
- Aspects of health communications as determinants of health status
- Stress and coping with stress and chronic illness
- Common approaches to modifying health beliefs and behaviours
- The overarching role of culture as a determinant of health and health-related behaviours

Assessment tasks

- Essay
- Tutorial presentation
- Health-related advertisement
- Mid-semester exam
- Final exam

Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

Learning outcomes

- Delineating between the biological/medical approaches to health and the biopsychosocial approaches.
- The type of empirical research that underpins our understanding of health status as well as commonly used research modalities and research challenges in health settings
- The major theories that attempt to explain health related behaviour.
- The role of cognitive and affective factors as determinants of health status
- Aspects of health communications as determinants of health status
- Stress and coping with stress and chronic illness
- Common approaches to modifying health beliefs and behaviours
- The overarching role of culture as a determinant of health and health-related behaviours

Assessment tasks

- Essay
- Health-related advertisement
- Mid-semester exam
- Final exam

Creative and Innovative

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

Learning outcomes

- The major theories that attempt to explain health related behaviour.
- The role of cognitive and affective factors as determinants of health status
- Aspects of health communications as determinants of health status
- Common approaches to modifying health beliefs and behaviours
- The overarching role of culture as a determinant of health and health-related behaviours

Assessment tasks

- Essay
- Tutorial presentation
- Health-related advertisement

Effective Communication

We want to develop in our students the ability to communicate and convey their views in forms

effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

Learning outcomes

- Aspects of health communications as determinants of health status
- Common approaches to modifying health beliefs and behaviours

Assessment tasks

- Essay
- Tutorial presentation
- Health-related advertisement

Engaged and Ethical Local and Global citizens

As local citizens our graduates will be aware of indigenous perspectives and of the nation's historical context. They will be engaged with the challenges of contemporary society and with knowledge and ideas. We want our graduates to have respect for diversity, to be open-minded, sensitive to others and inclusive, and to be open to other cultures and perspectives: they should have a level of cultural literacy. Our graduates should be aware of disadvantage and social justice, and be willing to participate to help create a wiser and better society.

This graduate capability is supported by:

Learning outcomes

- Delineating between the biological/medical approaches to health and the biopsychosocial approaches.
- Aspects of health communications as determinants of health status
- The overarching role of culture as a determinant of health and health-related behaviours

Assessment tasks

- Tutorial presentation
- Health-related advertisement

Socially and Environmentally Active and Responsible

We want our graduates to be aware of and have respect for self and others; to be able to work with others as a leader and a team player; to have a sense of connectedness with others and country; and to have a sense of mutual obligation. Our graduates should be informed and active participants in moving society towards sustainability.

This graduate capability is supported by:

Learning outcomes

- Aspects of health communications as determinants of health status
- Stress and coping with stress and chronic illness
- The overarching role of culture as a determinant of health and health-related behaviours

Assessment tasks

- Tutorial presentation
- Health-related advertisement
