Unit description

This unit aims to build on the principles and concepts of financial accounting established in ACCG100. Topics include an examination of the regulatory framework of financial accounting including the definition, recognition and measurement of assets, liabilities, income and expenses. Aspects of investor decision making are covered, including financial statement analysis. In addition, the unit introduces students to aspects of management accounting including cost-volume-profit analysis, job costing and concepts relating to budgeting. The unit develops graduate capabilities centred on effective oral and written communication skills, and analytical and critical thinking skills.

## Delivery and Resources

### Classes

- The unit involves 3 hours face-to-face teaching per week consisting of 1 lecture (one hour) and 1 tutorial (two hours)

### Required and recommended texts and/or Materials

- Hoggett,J., Edwards,L., Medlin,J., and Tilling,M. (2012), Accounting, 8th edition, John Wiley and Sons, Sydney, Australia.
- Supplementary materials will be provided on the unit web page.
- The textbook can be purchased from the Co-op bookshop. The textbook can be purchased with a WileyPlus code or without. WileyPlus is not required for ACCG101, but may help the self-study of students.
- Copies of the textbook are available in the library.

### Technology Used and Required

- Students must be familiar with the learning management system ilearn.
- Students need to have knowledge about accessing e-reserve to download articles.
- Students are required to conduct their own research and need to be familiar with Internet search engines and library databases.

### Changes since the last offering of this unit

\*The delivery of this unit is consistent with the last offering

### Unit Web Page

- Course material is available on the learning management system (ilearn). It is essential to visit the unit web page regularly. Unit outline, announcements, supplementary reading materials, lecture and tutorial materials, and assessments are available to access and/or download via the web page.
- The web page for this unit can be found at: <http://ilearn.mq.edu.au>. To access the web page you need to enter your username and password. You should IThelpdesk if you need any assistance.

### Learning and Teaching Activities

In the lecture, you will be given practical explanations and examples to supplement the text

materials. For every week, you are expected to read both the textbook chapter(s) highlighted in the Unit Schedule and any supplementary materials specified on the unit web page. You are also expected to read the relevant text chapters and supplementary materials before attending the lecture. Lecture slides in pdf format will be available on the unit web page on a weekly basis. It is suggested that you bring a copy of the lecture slides to each class and make any additional notes you think are important.

Tutorials will commence in week 1. The purpose of tutorials is to provide an interactive learning environment in which students will practise the materials covered in lectures. You are required to prepare the weekly tutorial questions before attending the tutorial. These will assist you for the in-class handouts that will count towards your final assessment as well as prepare you for the types of questions in the final examination. It is suggested you bring your textbook to class. Selected solutions to tutorial questions will be available on the unit web page on a weekly basis. You are expected to study the solutions provided and compare them with your own attempts. If you are experiencing difficulties then it is suggested you attend consultations and accounting support provided.

## Graduate Capabilities

### Capable of Professional and Personal Judgement and Initiative

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:

### Learning outcomes

- Understanding the regulatory framework, corporate governance, professional judgement and ethics in accounting.
- Understand the role of a professional accountant and the importance of professional development.
- Understanding and applying accounting for liabilities, and equity related to partnerships and companies.
- Analysing and interpreting financial information.
- Understanding and applying various costing and budgeting techniques in management accounting at introductory level

## Assessment tasks

- 1. Assessed Coursework
- 2. Assignments
- 3. Final Examination

## Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

## Learning outcomes

- Understanding the regulatory framework, corporate governance, professional judgement and ethics in accounting.
- Understand the role of a professional accountant and the importance of professional development.
- Understanding and applying accounting for liabilities, and equity related to partnerships and companies.

- Understanding and applying various costing and budgeting techniques in management accounting at introductory level

## Assessment tasks

- 1. Assessed Coursework
- 2. Assignments
- 3. Final Examination

## Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

## Learning outcomes

- Understanding the regulatory framework, corporate governance, professional judgement and ethics in accounting.
- Understand the role of a professional accountant and the importance of professional development.
- Understanding and applying accounting for liabilities, and equity related to partnerships and companies.
- Analysing and interpreting financial information.
- Understanding and applying various costing and budgeting techniques in management accounting at introductory level

## Assessment tasks

- 1. Assessed Coursework
- 2. Assignments
- 3. Final Examination

## Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

## Learning outcomes

- Understanding the regulatory framework, corporate governance, professional judgement and ethics in accounting.
- Understand the role of a professional accountant and the importance of professional development.
- Understanding and applying accounting for liabilities, and equity related to partnerships and companies.
