Credit points
3

Prerequisites
(6cp in LAW or LAWS units at 300-level) or (39cp including ENV267) or (ENVG212 and 6cp at 300 level and admission to BPlan)

Corequisites

Co-badged status

Unit description
This unit examines contemporary issues in land use planning law. The focus is on land in an urban context with particular emphasis on the regulation of land use under the Environmental Planning and Assessment Law 1979 (NSW). The unit provides an understanding of the workings of land use regulation in New South Wales and the underlying social, cultural and economic objectives of the key legislation. A critical analysis is undertaken of the effectiveness of the current regulatory regime including reform proposals and options. Discussion and analysis of the relevant case law with practical examples of planning issues are included.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at http://students.mq.edu.au/student_admin/enrolmentguide/academicdates/

Learning Outcomes

1. Describe the key principles and policies underlying planning and development law.
2. Identify, explain and apply the regulatory scheme for assessment and approval of land use development at federal, state and local levels. This study will include the powers, functions and environmental responsibilities of each tier of government with a focus on local government decision–making in the context of land use management.
3. Critically analyse and evaluate the principles and policies and promoting Ecologically Sustainable Development in contexts relevant to planning and development law at the state and federal level.

4. Evaluate the effectiveness and accountability of public authorities (executive and judicial) and citizens involved in environmental planning and assessment with a focus on the local and state levels of government.

5. Identify and critique public participation mechanisms and the role of the Land and Environment Court in the assessment of development and protection of the environment.

6. Analyze environmental challenges that will affect planning law in the future and how to combat these issues whilst balancing competing interests related to economic benefits of land use planning and development.

7. Undertake research of contemporary and future problems for land use planning and development law and policy and report such research findings in appropriate oral and written arguments.

**Assessment Tasks**

**Class Participation**

Due: **Ongoing**  
Weighting: 15%

Class participation will be assessed in weekly tutorials for internal students and during the On Campus Session (OCS) for external students. Students should ensure they have completed the required reading before tutorials or the OCS. The dates from the OCS can be found on the timetable.

Students must be prepared to discuss this material during the OCS.

Readings and tutorial questions will be supplied in a separate document posted on the iLearn webpage.
Participation will involve: exploring, analysing and applying the principal issues covered in the unit, answering questions put directly to you, engaging in formal and informal debates, group work, and constructing and presenting legal arguments.

Class participation will be assessed on:

- Demonstration of knowledge of the readings.
- Level of critical analysis displayed
- Relevant original contributions
- Ability to engage constructively with other students

Your ability to make an educated and legally feasible arguments in class. Note that no marks are awarded just for attending class, and that assessment is based on the quality, not quantity, of your work in class. Students should also note that the onus to participate in class is on you, not on the Convener. In other words, it is not the job of the Convener to engage you in discussion so that you may avail yourself of the class participation assessment.

This Assessment Task relates to the following Learning Outcomes:

- Describe the key principles and policies underlying planning and development law.
- Identify, explain and apply the regulatory scheme for assessment and approval of land use development at federal, state and local levels. This study will include the powers, functions and environmental responsibilities of each tier of government with a focus on local government decision-making in the context of land use management.
- Critically analyse and evaluate the principles and policies and promoting Ecologically Sustainable Development in contexts relevant to planning and development law at the state and federal level.
- Evaluate the effectiveness and accountability of public authorities (executive and judicial) and citizens involved in environmental planning and assessment with a focus on the local and state levels of government.
- Identify and critique public participation mechanisms and the role of the Land and Environment Court in the assessment of development and protection of the environment.
- Analyze environmental challenges that will affect planning law in the future and how to combat these issues whilst balancing competing interests related to economic benefits of land use planning and development.
• Undertake research of contemporary and future problems for land use planning and development law and policy and report such research findings in appropriate oral and written arguments.

LEP research task
Due: End of Week/Module 3
Weighting: 0%

The LEP (Local Environmental Plan) is a vital instrument in environment and planning law. The task, which is non-assessable but mandatory, requires students to search for and identify the LEP that regulates the area in which they live.

Having located the relevant LEP students must then answer a set of prescribed questions that shall be made available within the first week of session 1.

The task is designed to introduce students early to the rationale, objects and purpose of planning instruments in a manner that utilises the context of a local community that the student is inherently familiar with. This will prepare students for the later tasks of analysing how LEPs and other planning instruments are made, the legal value attached to them and other themes that correlate with the overall objectives of the course.

This task (like all assessment tasks) is to be submitted via iLearn.

This Assessment Task relates to the following Learning Outcomes:
• Describe the key principles and policies underlying planning and development law.
• Analyze environmental challenges that will affect planning law in the future and how to combat these issues whilst balancing competing interests related to economic benefits of land use planning and development.

Research Essay
Due: April 10
Weighting: 35%

All students are required to answer a research essay question in 2,500 words based primarily (but NOT exclusively) on the unit readings for weeks 1 to 6 and additional references as set out on the Course Schedule and Reading List. Further research should also be undertaken.

The question(s) will be released in the early stages of the semester.

*The assignment is due April 10, 2015.*
This Assessment Task relates to the following Learning Outcomes:

- Describe the key principles and policies underlying planning and development law.
- Identify, explain and apply the regulatory scheme for assessment and approval of land use development at federal, state and local levels. This study will include the powers, functions and environmental responsibilities of each tier of government with a focus on local government decision-making in the context of land use management.
- Critically analyse and evaluate the principles and policies and promoting Ecologically Sustainable Development in contexts relevant to planning and development law at the state and federal level.
- Evaluate the effectiveness and accountability of public authorities (executive and judicial) and citizens involved in environmental planning and assessment with a focus on the local and state levels of government.
- Analyze environmental challenges that will affect planning law in the future and how to combat these issues whilst balancing competing interests related to economic benefits of land use planning and development.
- Undertake research of contemporary and future problems for land use planning and development law and policy and report such research findings in appropriate oral and written arguments.

Final Assessment

Due: June 12
Weighting: 50%

A take-home exam involving hypothetical scenarios for critical analysis will be released via the iLearn page. Further details will be provided during the course of the semester.
Critically analyse and evaluate the principles and policies and promoting Ecologically Sustainable Development in contexts relevant to planning and development law at the state and federal level.

Evaluate the effectiveness and accountability of public authorities (executive and judicial) and citizens involved in environmental planning and assessment with a focus on the local and state levels of government.

Identify and critique public participation mechanisms and the role of the Land and Environment Court in the assessment of development and protection of the environment.

Analyze environmental challenges that will affect planning law in the future and how to combat these issues whilst balancing competing interests related to economic benefits of land use planning and development.

Delivery and Resources

The unit will be taught as both an External unit and as an Internal unit. Attendance at the On Campus Session (OCS) is compulsory. If you cannot attend the OCS then you are advised to not enrol in the course. If you refer to the assessment section you will see that class participation is assessed during the OCS.

Workload

Based upon University Senate Guidelines there should be 3 hours study per credit point per week. However, this is a guide only and each student should assess the hours required based on his/her own specific needs. Note that students are expected to work on private study, assignments completion, etc, in the two-week mid-semester break.

Delivery

This unit heavily utilizes iLearn for all communication purposes. Announcements, lecture recordings, assessments etc. all operate upon the iLearn platform.

It is therefore vital that students familiarize themselves with the iLearn platform and its operations if they haven’t done so previously.

Students should regularly check the unit web page on iLearn to keep up with information for students entered by the Unit Convenor. There may be information placed on the web page at short notice concerning attendance, cancelled or postponed classes and relevant assessment items and dates. Attending on the right dates is your responsibility and mistakes with attendance may result in your failing of the unit.

Further, iLearn is utilised for the purposes of discussion forums both teacher led and those that are exclusively for the use of students. It is highly recommended that students keep up to date with forum discussion as it features topical news items relevant to the course etc.

Resources -

Some weeks will feature additional or alternative readings. Readings are available via the "Unit readings" tab in MultiSearch on the library website. These readings must be completed in advance of classes.

**NB:** A weekly lecture guide and tutorial questions will be supplied in a separate document posted on the iLearn website.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

Academic Honesty Policy http://mq.edu.au/policy/docs/academic_honesty/policy.html
Disruption to Studies Policy http://www.mq.edu.au/policy/docs/disruption_studies/policy.html The Disruption to Studies Policy is effective from March 3 2014 and replaces the Special Consideration Policy.

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/support/student_conduct/

Results

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au.

Attendance Policy

Internal students are required to attend the weekly tutorials – If you cannot attend a tutorial you must email your tutor to inform them of your absence. Extended absences from tutorials must meet the criteria for the Disruption to Studies Policy and be approved by the Unit Convenor. Applications for Disruption to Studies are made online at ask.mq.edu.au.

Tutors will raise any concerns about poor participation with the student involved. Students will be given an opportunity to submit remedial work where there are concerns about participation or unexplained absences

Assessment Policy

Students must comply with the due date. In the absence of a successful application under the Disruption To Studies Policy, any assessment task submitted after its published deadline will not be graded and receive a mark of zero.
Student Support
Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills
Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

Student Enquiry Service
For all student enquiries, visit Student Connect at ask.mq.edu.au

Equity Support
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help
For help with University computer systems and technology, visit http://informatics.mq.edu.au/help/.

When using the University’s IT, you must adhere to the Acceptable Use Policy. The policy applies to all who connect to the MQ network including students.

Changes from 2014

Environment and planning law remains in a state of flux in the early stages of 2015. In 2014 the change of leadership in the NSW government meant that the process initiated by the ousted O'Farrell regime in 2011 has yet to result in the full-scale legislative changes to the current legislative apparatus under the Environmental Planning and Assessment Act 1979 (NSW).

The election of the Abbott government at federal level has also resulted in changes to planning and development law and consequently how this unit is taught. The emergence of the 'one stop shop' policy has altered the relationship between state and federal levels of environmental assessment and approval.

This year will see a slight change in emphasis. Across the globe the role of local government is receiving more attention in the context of international and national environmental change motivated in part by the indentification of environmental risk. As such risk will be one of the
guiding overall themes for the course in the context of contemporary and future challenges to planning and development law.
