Credit points
4

Prerequisites
Admission to MClinNeuro or DClinNeuro

Corequisites

Co-badged status
The first 5 weeks of this unit is co-badged with PSY961 - Psychopathology (Clinical Psychologists)

Unit description
This unit provides an overview of the basic principles of neuropharmacology with particular emphasis on the disorders seen in the clinical practice of neuropsychologists and clinical psychologists. It begins with a review of basic principles and then covers the major neurotransmitter systems and how they are disordered in brain injury and psychological disorders such as depression, schizophrenia and the anxiety disorders.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at http://students.mq.edu.au/student_admin/enrolmentguide/academicdates/

Learning Outcomes
1. Communication and information technology skills: using electronic data bases to search for papers in relevant topics
2. Written and oral communication skills: taking part in class discussions, and presenting papers
3. Self-awareness skills: identifying and setting targets, time management
4. Information skills: formulating arguments, judging the relevance and accuracy of information, comparing different points of view
5. Problem solving: comparing alternative interpretations of neuroscience data, formulating new explanations

**Assessment Tasks**

<table>
<thead>
<tr>
<th>Name</th>
<th>Weighting</th>
<th>Due</th>
</tr>
</thead>
<tbody>
<tr>
<td>Test</td>
<td>30%</td>
<td>Week 5</td>
</tr>
<tr>

<td>15%</td>
<td>Week 8, 9 or 10</td>
</tr>
<tr>
<td>Class Participation</td>
<td>10%</td>
<td>Week 8, 9 and 10</td>
</tr>
</tbody>
</table>

**Test**

Due: **Week 5**  
Weighting: **30%**

*Multiple choice exam (30%)* – 40 MCQ (5-choice) to assess the material covered in week 1-4 inclusive. The exam will be held in class in week 5 of semester 1, March 23rd 2015.

This Assessment Task relates to the following Learning Outcomes:
- Self-awareness skills: identifying and setting targets, time management
- Information skills: formulating arguments, judging the relevance and accuracy of information, comparing different points of view
- Problem solving: comparing alternative interpretations of neuroscience data, formulating new explanations

**Essay**

Due: **Week 12**  
Weighting: **45%**

*Essay (45%)* due to be emailed to Jen by 5pm Monday May 25th, 2015 (week 12). *Topics should be selected by the student following approval from the convener.* The report is to be **1500 words** in 12-point times new roman, using a margin of 2.5 centimetres. *Over page or late will result in loss of 5% per 100 words/day* (eg 1 day late = 2.25 marks from 45). *This means that you can have 99 words over before penalty.* Please submit an electronic WORD version to jennifer.cornish@mq.edu.au by 5pm on the due date. Please also scan and attach an assignment coversheet.

This Assessment Task relates to the following Learning Outcomes:
Communication and information technology skills: using electronic data bases to search for papers in relevant topics

Written and oral communication skills: taking part in class discussions, and presenting papers

Self-awareness skills: identifying and setting targets, time management

Information skills: formulating arguments, judging the relevance and accuracy of information, comparing different points of view

Problem solving: comparing alternative interpretations of neuroscience data, formulating new explanations

Oral Presentation
Due: Week 8, 9 or 10
Weighting: 15%

Oral Presentation (15%) on a journal article of your choice (must involve neuropsychopharmacology) that has been approved by the convener. Students will be allocated to a presentation week at the beginning of semester. Please let the convener know of your paper for presentation by semester break, 2015. Feedback on presentations will be provided by email the week following the final student presentation.

This Assessment Task relates to the following Learning Outcomes:

• Communication and information technology skills: using electronic data bases to search for papers in relevant topics
• Written and oral communication skills: taking part in class discussions, and presenting papers
• Self-awareness skills: identifying and setting targets, time management
• Information skills: formulating arguments, judging the relevance and accuracy of information, comparing different points of view
• Problem solving: comparing alternative interpretations of neuroscience data, formulating new explanations

Class Participation
Due: Week 8, 9 and 10
Weighting: 10%

Class Participation (10%). Students are expected to participate in class discussions, particularly at oral presentation (seminar) sessions to foster understanding and critical evaluation of research papers.

This Assessment Task relates to the following Learning Outcomes:
Written and oral communication skills: taking part in class discussions, and presenting papers

Information skills: formulating arguments, judging the relevance and accuracy of information, comparing different points of view

Problem solving: comparing alternative interpretations of neuroscience data, formulating new explanations

Delivery and Resources

How unit is taught: Each week the biological bases for neuropsychological disorders will be presented and discussed. Contemporary research literature on a given topic will be presented and discussed.

Unit is taught as 1 x 2 hour lectures/seminars Monday 10am-12pm, W6B 282, Semester 1, 2015

The unit is available on iLearn and iLecture.

Unit Schedule

How unit is taught: Each week the biological bases for neuropsychological disorders will be presented and discussed.

Weekly list of topics to be covered:

Week 1 (Feb 23rd): Review of basic physiological psychology, Drug Abuse

Week 2 (March 2nd): Anxiety Disorders

Week 3 (March 9th): Depression

Week 4 (March 16th): Psychosis

Week 5 (March 23rd): In class examination (on week 1-4 inclusive)

Week 6 (March 30th): Neurogenesis, Neuroplasticity & Neurodegeneration

SESSION BREAK
Week 7 (April 20th): Alzheimer’s Disease

Week 8 (April 27th): Student Presentations

Week 9 (May 4th): Student Presentations

Week 10 (May 11th): Student Presentations

Week 11 (May 18th): Visiting Speaker

Week 12 (May 25th): Parkinson’s Disease

Week 13 (June 1st): Paediatrics

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

Academic Honesty Policy http://mq.edu.au/policy/docs/academic_honesty/policy.html
Disruption to Studies Policy http://www.mq.edu.au/policy/docs/disruption_studies/policy.html The Disruption to Studies Policy is effective from March 3 2014 and replaces the Special Consideration Policy.

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/support/student_conduct/

Results

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your
Student Support
Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills
Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

Student Enquiry Service
For all student enquiries, visit Student Connect at ask.mq.edu.au

Equity Support
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help
For help with University computer systems and technology, visit http://informatics.mq.edu.au/help/.

When using the University’s IT, you must adhere to the Acceptable Use Policy. The policy applies to all who connect to the MQ network including students.

Graduate Capabilities
PG - Discipline Knowledge and Skills
Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

**Learning outcomes**

- Communication and information technology skills: using electronic data bases to search for papers in relevant topics
• Written and oral communication skills: taking part in class discussions, and presenting papers
• Information skills: formulating arguments, judging the relevance and accuracy of information, comparing different points of view
• Problem solving: comparing alternative interpretations of neuroscience data, formulating new explanations

Assessment tasks
• Test
• Essay
• Oral Presentation
• Class Participation

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes
• Written and oral communication skills: taking part in class discussions, and presenting papers
• Information skills: formulating arguments, judging the relevance and accuracy of information, comparing different points of view
• Problem solving: comparing alternative interpretations of neuroscience data, formulating new explanations

Assessment tasks
• Test
• Essay
• Oral Presentation
• Class Participation

PG - Research and Problem Solving Capability

Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or
practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

**Learning outcomes**

- Communication and information technology skills: using electronic data bases to search for papers in relevant topics
- Written and oral communication skills: taking part in class discussions, and presenting papers
- Self-awareness skills: identifying and setting targets, time management
- Information skills: formulating arguments, judging the relevance and accuracy of information, comparing different points of view
- Problem solving: comparing alternative interpretations of neuroscience data, formulating new explanations

**Assessment tasks**

- Test
- Essay
- Oral Presentation
- Class Participation

**PG - Effective Communication**

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.

This graduate capability is supported by:

**Learning outcomes**

- Communication and information technology skills: using electronic data bases to search for papers in relevant topics
- Written and oral communication skills: taking part in class discussions, and presenting papers
- Information skills: formulating arguments, judging the relevance and accuracy of information, comparing different points of view
- Problem solving: comparing alternative interpretations of neuroscience data, formulating new explanations
Assessment tasks

• Test
• Essay
• Oral Presentation
• Class Participation

PG - Engaged and Responsible, Active and Ethical Citizens

Our postgraduates will be ethically aware and capable of confident transformative action in relation to their professional responsibilities and the wider community. They will have a sense of connectedness with others and country and have a sense of mutual obligation. They will be able to appreciate the impact of their professional roles for social justice and inclusion related to national and global issues.

This graduate capability is supported by:

Learning outcomes

• Written and oral communication skills: taking part in class discussions, and presenting papers
• Self-awareness skills: identifying and setting targets, time management
• Information skills: formulating arguments, judging the relevance and accuracy of information, comparing different points of view
• Problem solving: comparing alternative interpretations of neuroscience data, formulating new explanations

Assessment tasks

• Test
• Essay
• Oral Presentation
• Class Participation

PG - Capable of Professional and Personal Judgment and Initiative

Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

Learning outcomes

• Communication and information technology skills: using electronic data bases to search for papers in relevant topics
Written and oral communication skills: taking part in class discussions, and presenting papers
Self-awareness skills: identifying and setting targets, time management
Information skills: formulating arguments, judging the relevance and accuracy of information, comparing different points of view
Problem solving: comparing alternative interpretations of neuroscience data,formulating new explanations

Assessment tasks

• Test
• Essay
• Oral Presentation
• Class Participation
