Research and Practice, Global and Sustainability

This Unit has been designed as a 3 credit point undergraduate Unit, requiring the equivalent of 13 weeks of work over one session. Being a three credit-points Unit you should expect to spend a minimum of 9 hours per week to meet the requirements of the Unit.

As you work through the Unit, try to:

- share your insights with others in your tutorial group
- contribute to critical analysis and debate of business law concepts and the views of other class members.

In completing the Unit, you are expected to:

- participate fully in tutorial classes
- complete all three online quizzes
- pre-read and prepare all compulsory tutorial questions prior to attending tutorial classes
- research, prepare and present to the tutorial class a selected business law case or topic

This unit addresses global and sustainability issues as direct areas of study and as necessary implications arising from the materials, assessment and academic discussion and debate in classes/seminars. We promote sustainability by developing ability in students to research and locate information within the accounting discipline in particular legal rules and regulations. We aim to provide students with an opportunity to obtain skills which will benefit them throughout their career.

The unit materials have a reference list at the end of each chapter/module/text containing all references cited by the author. These provide some guidance to references that could be used to research particular issues.
