Unit description

"We cannot not communicate." (Watzlawick, 1973). This unit introduces a theoretical framework for the study of international communication. It provides students with a toolbox that can be used to critically approach and analyse communication processes and the creation of meaning. The aim of this unit, and of international communication in general, is to create an awareness of the self and the other and to facilitate, analyse and improve communication processes between these entities. Tutorials focus on practical tasks and consist of the application of theory and methodology, the examination of the institutional settings of international communication through case studies, and on issues around advertising, public relations, new media, global media and development communication. Students will practise semiotic analysis, content analysis, case study, and close reading.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

On successful completion of this unit, you will be able to:

- Recognise and define different areas of International Communication theory
- Explain the key theories in various different fields and apply them to International Communication

Identify and apply key theories to set texts

Construct a position using research methodologies from which to answer a question relevant to International Communication

Demonstrate the importance and relevance of academic literacy skills for International Communication
