Unit description

This unit focuses on special topics concerned with issues in both financial and management accounting in international contexts. Topics range from ethical behaviour in accounting, external and corporate reporting, to organising, managing and evaluating their global operations and focus on the impact of national culture and how an understanding of cultural differences provides insights into cross-national differences in accounting behaviour and practice. Topics are chosen to encourage students to explore issues in international accounting, and to develop skills in analysis and investigation that are necessary and that are required to undertake more advanced research. A solid understanding of cultural influences on international accounting practices is a requirement for any advanced study of accounting theory. This unit provides students with essential internationally contextualised accounting experiences that develop the concepts and skills necessary for advanced research in accounting and corporate governance.

Research and Practice, Global and Sustainability

This unit gives you opportunities to conduct research with regard to group report. Further information on the group report is provided in the Assessment guide.

This unit addresses global and sustainability issues as direct areas of study and as necessary implications arising from the materials, assessment and academic discussion and debate in classes. We promote sustainability by developing ability in students to research and locate information within accounting discipline. We aim to provide students with an opportunity to obtain skills which will benefit them throughout their career.

The unit materials have a reference list at the end of each chapter/module/text containing all references cited by the author. These provide some guidance to references that could be used to research particular issues.
