Co-badged status

Unit description
This unit provides an introduction to a range of topics in mathematics which do not form part of the traditional undergraduate curriculum, and is designed to prepare students to engage with mathematical research literature and areas of current research interest.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at http://students.mq.edu.au/student_admin/enrolmentguide/academicdates/

Learning Outcomes

1. Demonstrate the ability to construct logical, clearly presented and justified mathematical arguments. Be able to express yourself clearly and logically in writing in this context.

2. Be able to apply the principles, concepts, and techniques learned in this unit to solve practical and abstract problems.
3. Demonstrate appropriate interpretation of information communicated in mathematical form. Be able to understand what is being said in mathematical expressions and be able to formulate ideas using mathematical form.

4. Ethical application of mathematical approaches to solving problems and appropriately reference and acknowledge sources in a mathematical context.

5. Be able to work effectively, responsibly and safely in an individual or team context.

### Assessment Tasks

<table>
<thead>
<tr>
<th>Name</th>
<th>Weighting</th>
<th>Due</th>
</tr>
</thead>
<tbody>
<tr>
<td>PART A</td>
<td>25%</td>
<td>TBA</td>
</tr>
<tr>
<td>PART B</td>
<td>25%</td>
<td>TBA</td>
</tr>
<tr>
<td>PART C</td>
<td>25%</td>
<td>TBA</td>
</tr>
<tr>
<td>PART D</td>
<td>25%</td>
<td>TBA</td>
</tr>
</tbody>
</table>

#### PART A

**Due:** TBA  
**Weighting:** 25%

This Assessment Task relates to the following Learning Outcomes:

- Demonstrate the ability to construct logical, clearly presented and justified mathematical arguments. Be able to express yourself clearly and logically in writing in this context.
- Be able to apply the principles, concepts, and techniques learned in this unit to solve practical and abstract problems.
- Demonstrate appropriate interpretation of information communicated in mathematical form. Be able to understand what is being said in mathematical expressions and be able to formulate ideas using mathematical form.
- Ethical application of mathematical approaches to solving problems and appropriately reference and acknowledge sources in a mathematical context.
- Be able to work effectively, responsibly and safely in an individual or team context.

#### PART B

**Due:** TBA  
**Weighting:** 25%
This Assessment Task relates to the following Learning Outcomes:

- Demonstrate the ability to construct logical, clearly presented and justified mathematical arguments. Be able to express yourself clearly and logically in writing in this context.
- Be able to apply the principles, concepts, and techniques learned in this unit to solve practical and abstract problems.
- Demonstrate appropriate interpretation of information communicated in mathematical form. Be able to understand what is being said in mathematical expressions and be able to formulate ideas using mathematical form.
- Be able to work effectively, responsibly and safely in an individual or team context.

PART C
Due: TBA
Weighting: 25%

This Assessment Task relates to the following Learning Outcomes:

- Demonstrate the ability to construct logical, clearly presented and justified mathematical arguments. Be able to express yourself clearly and logically in writing in this context.
- Be able to apply the principles, concepts, and techniques learned in this unit to solve practical and abstract problems.
- Demonstrate appropriate interpretation of information communicated in mathematical form. Be able to understand what is being said in mathematical expressions and be able to formulate ideas using mathematical form.
- Ethical application of mathematical approaches to solving problems and appropriately reference and acknowledge sources in a mathematical context.
- Be able to work effectively, responsibly and safely in an individual or team context.

PART D
Due: TBA
Weighting: 25%

This Assessment Task relates to the following Learning Outcomes:

- Demonstrate the ability to construct logical, clearly presented and justified mathematical arguments. Be able to express yourself clearly and logically in writing in this context.
• Be able to apply the principles, concepts, and techniques learned in this unit to solve practical and abstract problems.
• Demonstrate appropriate interpretation of information communicated in mathematical form. Be able to understand what is being said in mathematical expressions and be able to formulate ideas using mathematical form.
• Ethical application of mathematical approaches to solving problems and appropriately reference and acknowledge sources in a mathematical context.
• Be able to work effectively, responsibly and safely in an individual or team context.

Delivery and Resources

Classes
Lectures: you should attend two hours lecture each week.

Technology Used and Required
Students are expected to have access to an internet enabled computer with a web browser and Adobe Reader software. Several areas of the university provide wireless access for portable computers. There are computers for student use in the Library and in the Numeracy Centre (C5A 255).

Difficulties with your home computer or internet connection do not constitute a reasonable excuse for lateness of, or failure to submit, assessment tasks.

Unit Schedule
TBA

Policies and Procedures
Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

Academic Honesty Policy http://mq.edu.au/policy/docs/academic_honesty/policy.html
Disruption to Studies Policy http://www.mq.edu.au/policy/docs/disruption_studies/policy.html The Disruption to Studies Policy is effective from March 3 2014 and replaces the Special Consideration Policy.

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.
Student Support
Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills
Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

Student Enquiry Service
For all student enquiries, visit Student Connect at ask.mq.edu.au

Equity Support
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help
For help with University computer systems and technology, visit http://informatics.mq.edu.au/help/.

When using the University's IT, you must adhere to the Acceptable Use Policy. The policy applies to all who connect to the MQ network including students.

Graduate Capabilities
Discipline Specific Knowledge and Skills
Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where
relevant, professional technical competence and meet professional standards. They will be able
to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific
knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary
solutions to problems.

This graduate capability is supported by:

Learning outcomes

• Demonstrate the ability to construct logical, clearly presented and justified mathematical
arguments. Be able to express yourself clearly and logically in writing in this context.
• Be able to apply the principles, concepts, and techniques learned in this unit to solve
practical and abstract problems.
• Demonstrate appropriate interpretation of information communicated in mathematical
form. Be able to understand what is being said in mathematical expressions and be able
to formulate ideas using mathematical form.
• Ethical application of mathematical approaches to solving problems and appropriately
reference and acknowledge sources in a mathematical context.

Assessment tasks

• PART A
• PART B
• PART C
• PART D

Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing
data and information in various forms; of drawing connections across fields of knowledge; and
they should be able to relate their knowledge to complex situations at work or in the world, in
order to diagnose and solve problems. We want them to have the confidence to take the initiative
in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

Learning outcomes

• Demonstrate the ability to construct logical, clearly presented and justified mathematical
arguments. Be able to express yourself clearly and logically in writing in this context.
• Be able to apply the principles, concepts, and techniques learned in this unit to solve
practical and abstract problems.
• Demonstrate appropriate interpretation of information communicated in mathematical
form. Be able to understand what is being said in mathematical expressions and be able
to formulate ideas using mathematical form.
**Assessment tasks**

- PART A
- PART B
- PART C
- PART D

**Effective Communication**

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

**Learning outcomes**

- Demonstrate the ability to construct logical, clearly presented and justified mathematical arguments. Be able to express yourself clearly and logically in writing in this context.
- Demonstrate appropriate interpretation of information communicated in mathematical form. Be able to understand what is being said in mathematical expressions and be able to formulate ideas using mathematical form.
- Ethical application of mathematical approaches to solving problems and appropriately reference and acknowledge sources in a mathematical context.
- Be able to work effectively, responsibly and safely in an individual or team context.

**Assessment tasks**

- PART A
- PART B
- PART C
- PART D

**Capable of Professional and Personal Judgement and Initiative**

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:
Learning outcomes

- Demonstrate the ability to construct logical, clearly presented and justified mathematical arguments. Be able to express yourself clearly and logically in writing in this context.
- Ethical application of mathematical approaches to solving problems and appropriately reference and acknowledge sources in a mathematical context.
- Be able to work effectively, responsibly and safely in an individual or team context.

Assessment tasks

- PART B
- PART C
- PART D

Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

Learning outcomes

- Demonstrate the ability to construct logical, clearly presented and justified mathematical arguments. Be able to express yourself clearly and logically in writing in this context.
- Be able to apply the principles, concepts, and techniques learned in this unit to solve practical and abstract problems.
- Demonstrate appropriate interpretation of information communicated in mathematical form. Be able to understand what is being said in mathematical expressions and be able to formulate ideas using mathematical form.

Assessment tasks

- PART A
- PART B
- PART C
- PART D
Creative and Innovative

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

Learning outcomes

- Demonstrate the ability to construct logical, clearly presented and justified mathematical arguments. Be able to express yourself clearly and logically in writing in this context.
- Be able to apply the principles, concepts, and techniques learned in this unit to solve practical and abstract problems.
- Be able to work effectively, responsibly and safely in an individual or team context.

Assessment tasks

- PART A
- PART B
- PART C
- PART D

Engaged and Ethical Local and Global citizens

As local citizens our graduates will be aware of indigenous perspectives and of the nation's historical context. They will be engaged with the challenges of contemporary society and with knowledge and ideas. We want our graduates to have respect for diversity, to be open-minded, sensitive to others and inclusive, and to be open to other cultures and perspectives: they should have a level of cultural literacy. Our graduates should be aware of disadvantage and social justice, and be willing to participate to help create a wiser and better society.

This graduate capability is supported by:

Learning outcomes

- Ethical application of mathematical approaches to solving problems and appropriately reference and acknowledge sources in a mathematical context.
- Be able to work effectively, responsibly and safely in an individual or team context.

Assessment tasks

- PART A
- PART C
- PART D
Socially and Environmentally Active and Responsible

We want our graduates to be aware of and have respect for self and others; to be able to work with others as a leader and a team player; to have a sense of connectedness with others and country; and to have a sense of mutual obligation. Our graduates should be informed and active participants in moving society towards sustainability.

This graduate capability is supported by:

**Learning outcomes**

- Ethical application of mathematical approaches to solving problems and appropriately reference and acknowledge sources in a mathematical context.
- Be able to work effectively, responsibly and safely in an individual or team context.

**Assessment tasks**

- PART B
- PART D

Commitment to Continuous Learning

Our graduates will have enquiring minds and a literate curiosity which will lead them to pursue knowledge for its own sake. They will continue to pursue learning in their careers and as they participate in the world. They will be capable of reflecting on their experiences and relationships with others and the environment, learning from them, and growing - personally, professionally and socially.

This graduate capability is supported by:

**Learning outcomes**

- Be able to apply the principles, concepts, and techniques learned in this unit to solve practical and abstract problems.
- Demonstrate appropriate interpretation of information communicated in mathematical form. Be able to understand what is being said in mathematical expressions and be able to formulate ideas using mathematical form.

**Assessment tasks**

- PART A
- PART C
- PART D
