### General Information

Unit convenor and teaching staff

**Unit Convenor**
Kate Scrivener  
kate.scrivener@mq.edu.au  
75 Talavera Rd  
Available Wednesday, Thursday and Friday

**Lecturer**
Catherine Dean  
catherine.dean@mq.edu.au

**Lecturer/Tutor**
Taryn Jones  
taryn.jones@mq.edu.au  
Available Tuesday and Friday

**Lecturer/Tutor**
Carolyn Gates  
carolyn.gates@mq.edu.au

**Tutor**
Bill Zafiropoulos  
bill.zafiropoulos@mq.edu.au  
Available Wednesday

**Sherrie Love**  
sherrie.love@mq.edu.au

**Credit points**
4

**Prerequisites**
PHTY800 and PHTY801 and PHTY802 and PHTY803

**Corequisites**
PHTY804

**Co-badged status**
Unit description
This unit will focus on the development of knowledge, skills and attributes required by physiotherapists to assess and treat clients of all ages with disorders of the cardiorespiratory and neurological systems. This unit builds on knowledge and skill attained in session 1 and integrates with the concurrent unit PHTY804. Students will develop the ability to select and implement interventions based on clinical reasoning, principles of evidence-based practice and safety in preparation for clinical placements next session.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at http://students.mq.edu.au/student_admin/enrolmentguide/academicdates/

Learning Outcomes
1. Describe common disorders of the cardiorespiratory and neurological systems and understand the principles of medical and physiotherapy treatment of these conditions.
2. Describe the role of other health professionals in the treatment of individuals with cardiorespiratory and/or neurological conditions.
3. Plan and conduct an assessment of people with cardiorespiratory and neurological disorders including a comprehensive history and physical examination.
4. Analyse assessment findings to form a diagnosis and a prioritised list of problems in impairments, activity limitations and participation restrictions.
5. Demonstrate competency in communicating with people with cardiorespiratory and neurological disorders to provide appropriate information about their diagnosis and prognosis and to select a treatment with consideration of the individual’s preferences and expectations.
6. Describe the efficacy of physiotherapy treatments for cardiorespiratory and neurological disorders based on current evidence and demonstrate competence in implementing these treatments with peers.
7. Develop and implement a person-centred physiotherapy plan that addresses the individual’s goals, utilises evidence-based treatment and is evaluated using appropriate outcome measures.
8. Demonstrate competency in performing technical skills for both assessment and treatment

General Assessment Information
Assessment/Standards
Grade descriptors and other information concerning grading are contained in the Macquarie University Grading Policy, which is available at: http://www.mq.edu.au/policy/docs/grading/policy.html

To pass this unit, students must demonstrate sufficient evidence of achievement of the learning outcomes.

Further details for each assessment task will available on iLearn including marking rubrics.

All final grades in the Department of Health Professions are determined by a grading committee and are not the sole responsibility of the Unit Convenor.

Students will be awarded one of these grades plus a Standardised Numerical Grade (SNG). The SNG is not necessarily a summation of the individual assessment components. The final grade and SNG that are awarded reflect the corresponding grade descriptor in the Grading Policy.

This unit consists of two distinct modules: cardiorespiratory physiotherapy and neurological physiotherapy. To pass this unit, students must demonstrate sufficient evidence of achievement of learning outcomes for both the neurological physiotherapy and cardiorespiratory physiotherapy modules. Students who do not reach a satisfactory standard in one or both of the modules will achieve a Standardised Numerical Grade (SNG) of no more than 45 Fail for the unit.

**Extensions for Assessment Tasks**

Applications for assessment task extensions must be submitted via www.ask.mq.edu.au. For further details please refer to the Disruption to Studies Policy available at http://mq.edu.au/policy/docs/disruption_studies/policy.html

**Late Submission of Work**

All assignments which are officially received after the due date, and where no extension has been granted by the course convenor or tutor, will incur a deduction of 10% for the first day, and 10% for each subsequent day including the actual day on which the work is received. Weekends and public holidays are included. For example:

</table>

Students will perform a practical examination which involves assessment and treatment of another student simulating a person with a neurological condition.

This Assessment Task relates to the following Learning Outcomes:

- Describe common disorders of the cardiorespiratory and neurological systems and understand the principles of medical and physiotherapy treatment of these conditions.
- Describe the role of other health professionals in the treatment of individuals with cardiorespiratory and/or neurological conditions.
- Plan and conduct an assessment of people with cardiorespiratory and neurological disorders including a comprehensive history and physical examination.
- Analyse assessment findings to form a diagnosis and a prioritised list of problems in impairments, activity limitations and participation restrictions.
- Demonstrate competency in communicating with people with cardiorespiratory and neurological disorders to provide appropriate information about their diagnosis and prognosis and to select a treatment with consideration of the individual’s preferences and expectations.
- Describe the efficacy of physiotherapy treatments for cardiorespiratory and neurological disorders based on current evidence and demonstrate competence in implementing these treatments with peers.
- Develop and implement a person-centred physiotherapy plan that addresses the individual’s goals, utilises evidence-based treatment and is evaluated using appropriate outcome measures.
- Demonstrate competency in performing technical skills for both assessment and treatment.

Clinical Simulation Exam 2

Due: End of session exam period

Weighting: 25%
Students will perform a practical examination which involves assessment and treatment of another student simulating a person with a cardiorespiratory condition.

This Assessment Task relates to the following Learning Outcomes:

- Describe common disorders of the cardiorespiratory and neurological systems and understand the principles of medical and physiotherapy treatment of these conditions.
- Describe the role of other health professionals in the treatment of individuals with cardiorespiratory and/or neurological conditions.
- Plan and conduct an assessment of people with cardiorespiratory and neurological disorders including a comprehensive history and physical examination.
- Analyse assessment findings to form a diagnosis and a prioritised list of problems in impairments, activity limitations and participation restrictions.
- Demonstrate competency in communicating with people with cardiorespiratory and neurological disorders to provide appropriate information about their diagnosis and prognosis and to select a treatment with consideration of the individual’s preferences and expectations.
- Describe the efficacy of physiotherapy treatments for cardiorespiratory and neurological disorders based on current evidence and demonstrate competence in implementing these treatments with peers.
- Develop and implement a person-centred physiotherapy plan that addresses the individual’s goals, utilises evidence-based treatment and is evaluated using appropriate outcome measures.
- Demonstrate competency in performing technical skills for both assessment and treatment.

Written Examination

Due: End of session exam period
Weighting: 40%

Final written examination covering all content from this unit. 20% of the exam will be devoted to cardiorespiratory physiotherapy and 20% to neurological physiotherapy.

This Assessment Task relates to the following Learning Outcomes:

- Describe common disorders of the cardiorespiratory and neurological systems and understand the principles of medical and physiotherapy treatment of these conditions.
- Describe the role of other health professionals in the treatment of individuals with cardiorespiratory and/or neurological conditions.
• Plan and conduct an assessment of people with cardiorespiratory and neurological
disorders including a comprehensive history and physical examination.
• Analyse assessment findings to form a diagnosis and a prioritised list of problems in
impairments, activity limitations and participation restrictions.
• Demonstrate competency in communicating with people with cardiorespiratory and
neurological disorders to provide appropriate information about their diagnosis and
prognosis and to select a treatment with consideration of the individual’s preferences and
expectations.
• Describe the efficacy of physiotherapy treatments for cardiorespiratory and neurological
disorders based on current evidence and demonstrate competence in implementing
these treatments with peers.
• Develop and implement a person-centred physiotherapy plan that addresses the
individual's goals, utilises evidence-based treatment and is evaluated using appropriate
outcome measures.

Mastery of clinical skills
Due: Friday 10th June
Weighting: 10%

Students will be required to demonstrate mastery of 10 specified key clinical skills (5 neurological
physiotherapy and 5 cardiorespiratory physiotherapy skills). Students will be responsible for
ensuring that their tutor assesses their competence on the 10 skills during the semester. When
students demonstrate competency in a skill the tutor will sign their mastery registry.

This Assessment Task relates to the following Learning Outcomes:
• Describe the efficacy of physiotherapy treatments for cardiorespiratory and neurological
disorders based on current evidence and demonstrate competence in implementing
these treatments with peers.
• Demonstrate competency in performing technical skills for both assessment and
treatment

Delivery and Resources

Textbooks and Readings
The following texts are essential resources and available in the library reserve.
Recommendations about specific readings from these and other resources (such as research
papers, books, websites and videos) will be listed on iLearn.
Technology and Equipment
Teaching rooms are equipped with state of art audio-visual and ICT equipment including iPads, internet connection, high quality video cameras and multiple LCD screens. Students will use a range of physiotherapy specific equipment typically used in the assessment and management of neurological and cardiorespiratory conditions. Videos of many of the assessment and treatment skills will be available on the iLearn site.

Consultation with staff: all staff will be available for individual consultations, please see iLearn site for information on staff availability for consultation.

Teaching and Learning Strategy
This unit will have 1 lecture and 2 tutorials per week. Lectures will provide foundation knowledge and also use large group demonstrations and discussion, enabling students to use tutorial time efficiently to develop technical clinical skills and clinical decision making. Tutorials will rely heavily on the use of case studies and authentic learning environments to assist student engagement and preparation for clinical placements in the following semester.

Attendance
All lectures and tutorials are scheduled in your individual timetable. You may make a request to your tutor to attend a different tutorial on a one-off basis for extenuating circumstances. In most cases lectures are recorded; however, attendance is expected at both lectures and tutorials, as this is where the majority of learning occurs. Failure to attend may impact your final results. It is the responsibility of the student to contact their tutor by email to inform tutors if they are going to be absent. The timetable for classes can be found on the University web site at: http://www.timetables.mq.edu.au/.

iLearn
This unit’s iLearn site will provide weekly resources for students, including:

- lecture notes
- tutorial worksheets
- preparation and consolidation material
- videos
- other teaching resources
- assessment details

http://unitguides.mq.edu.au/unit_offers/55068/unit_guide/print
Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct:  [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

Results

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit  [ask.mq.edu.au](http://ask.mq.edu.au).

Student Support

Macquarie University provides a range of support services for students. For details, visit  [http://students.mq.edu.au/support/](http://students.mq.edu.au/support/)

Learning Skills

Learning Skills ([mq.edu.au/learningskills](http://mq.edu.au/learningskills)) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
Student Enquiry Service
For all student enquiries, visit Student Connect at ask.mq.edu.au

Equity Support
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help
For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

Graduate Capabilities
PG - Critical, Analytical and Integrative Thinking
Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes

- Describe common disorders of the cardiorespiratory and neurological systems and understand the principles of medical and physiotherapy treatment of these conditions.
- Describe the role of other health professionals in the treatment of individuals with cardiorespiratory and/or neurological conditions.
- Plan and conduct an assessment of people with cardiorespiratory and neurological disorders including a comprehensive history and physical examination.
- Analyse assessment findings to form a diagnosis and a prioritised list of problems in impairments, activity limitations and participation restrictions.
- Demonstrate competency in communicating with people with cardiorespiratory and neurological disorders to provide appropriate information about their diagnosis and prognosis and to select a treatment with consideration of the individual’s preferences and expectations.
• Describe the efficacy of physiotherapy treatments for cardiorespiratory and neurological disorders based on current evidence and demonstrate competence in implementing these treatments with peers.
• Develop and implement a person-centred physiotherapy plan that addresses the individual’s goals, utilises evidence-based treatment and is evaluated using appropriate outcome measures.
• Demonstrate competency in performing technical skills for both assessment and treatment

Assessment tasks

• Clinical Simulation Exam 1
• Clinical Simulation Exam 2
• Written Examination

PG - Capable of Professional and Personal Judgment and Initiative

Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

Learning outcomes

• Describe the role of other health professionals in the treatment of individuals with cardiorespiratory and/or neurological conditions.
• Plan and conduct an assessment of people with cardiorespiratory and neurological disorders including a comprehensive history and physical examination.
• Demonstrate competency in communicating with people with cardiorespiratory and neurological disorders to provide appropriate information about their diagnosis and prognosis and to select a treatment with consideration of the individual’s preferences and expectations.
• Describe the efficacy of physiotherapy treatments for cardiorespiratory and neurological disorders based on current evidence and demonstrate competence in implementing these treatments with peers.
• Develop and implement a person-centred physiotherapy plan that addresses the individual’s goals, utilises evidence-based treatment and is evaluated using appropriate outcome measures.
Assessment tasks

• Clinical Simulation Exam 1
• Clinical Simulation Exam 2
• Written Examination
• Mastery of clinical skills

PG - Discipline Knowledge and Skills

Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

Learning outcomes

• Describe common disorders of the cardiorespiratory and neurological systems and understand the principles of medical and physiotherapy treatment of these conditions.
• Describe the role of other health professionals in the treatment of individuals with cardiorespiratory and/or neurological conditions.
• Plan and conduct an assessment of people with cardiorespiratory and neurological disorders including a comprehensive history and physical examination.
• Analyse assessment findings to form a diagnosis and a prioritised list of problems in impairments, activity limitations and participation restrictions.
• Demonstrate competency in communicating with people with cardiorespiratory and neurological disorders to provide appropriate information about their diagnosis and prognosis and to select a treatment with consideration of the individual’s preferences and expectations.
• Describe the efficacy of physiotherapy treatments for cardiorespiratory and neurological disorders based on current evidence and demonstrate competence in implementing these treatments with peers.
• Develop and implement a person-centred physiotherapy plan that addresses the individual’s goals, utilises evidence-based treatment and is evaluated using appropriate outcome measures.
• Demonstrate competency in performing technical skills for both assessment and treatment

Assessment tasks

• Clinical Simulation Exam 1
• Clinical Simulation Exam 2
PG - Research and Problem Solving Capability

Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

**Learning outcomes**

- Plan and conduct an assessment of people with cardiorespiratory and neurological disorders including a comprehensive history and physical examination.
- Analyse assessment findings to form a diagnosis and a prioritised list of problems in impairments, activity limitations and participation restrictions.
- Demonstrate competency in communicating with people with cardiorespiratory and neurological disorders to provide appropriate information about their diagnosis and prognosis and to select a treatment with consideration of the individual’s preferences and expectations.
- Describe the efficacy of physiotherapy treatments for cardiorespiratory and neurological disorders based on current evidence and demonstrate competence in implementing these treatments with peers.
- Develop and implement a person-centred physiotherapy plan that addresses the individual’s goals, utilises evidence-based treatment and is evaluated using appropriate outcome measures.
- Demonstrate competency in performing technical skills for both assessment and treatment

**Assessment tasks**

- Clinical Simulation Exam 1
- Clinical Simulation Exam 2
- Written Examination

PG - Effective Communication

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.
This graduate capability is supported by:

**Learning outcomes**

- Describe the role of other health professionals in the treatment of individuals with cardiorespiratory and/or neurological conditions.
- Plan and conduct an assessment of people with cardiorespiratory and neurological disorders including a comprehensive history and physical examination.
- Demonstrate competency in communicating with people with cardiorespiratory and neurological disorders to provide appropriate information about their diagnosis and prognosis and to select a treatment with consideration of the individual’s preferences and expectations.
- Describe the efficacy of physiotherapy treatments for cardiorespiratory and neurological disorders based on current evidence and demonstrate competence in implementing these treatments with peers.
- Develop and implement a person-centred physiotherapy plan that addresses the individual's goals, utilises evidence-based treatment and is evaluated using appropriate outcome measures.
- Demonstrate competency in performing technical skills for both assessment and treatment

**Assessment tasks**

- Clinical Simulation Exam 1
- Clinical Simulation Exam 2
- Written Examination
- Mastery of clinical skills

**PG - Engaged and Responsible, Active and Ethical Citizens**

Our postgraduates will be ethically aware and capable of confident transformative action in relation to their professional responsibilities and the wider community. They will have a sense of connectedness with others and country and have a sense of mutual obligation. They will be able to appreciate the impact of their professional roles for social justice and inclusion related to national and global issues.

This graduate capability is supported by:

**Learning outcomes**

- Describe the role of other health professionals in the treatment of individuals with cardiorespiratory and/or neurological conditions.
• Plan and conduct an assessment of people with cardiorespiratory and neurological disorders including a comprehensive history and physical examination.
• Demonstrate competency in communicating with people with cardiorespiratory and neurological disorders to provide appropriate information about their diagnosis and prognosis and to select a treatment with consideration of the individual’s preferences and expectations.
• Describe the efficacy of physiotherapy treatments for cardiorespiratory and neurological disorders based on current evidence and demonstrate competence in implementing these treatments with peers.
• Develop and implement a person-centred physiotherapy plan that addresses the individual’s goals, utilises evidence-based treatment and is evaluated using appropriate outcome measures.

Assessment tasks
• Clinical Simulation Exam 1
• Clinical Simulation Exam 2
• Written Examination

Changes from Previous Offering
No substantial changes are planned for this unit in 2016
