Unit description

This unit focuses on the generation of information for internal decision making and examines how cost information is developed and used within organisations. To this end, a number of different costing and budgeting techniques are explained and demonstrated in seminars. As well as understanding the mechanics of each technique, students use case studies to assist them in developing an understanding of which technique is most appropriate in particular situations.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

Demonstrate an understanding of management accounting concepts and apply such concepts to real-life case scenarios.

Critically analyse data to determine the relevant information and costing techniques required to make decisions.

Demonstrate effective written and oral communication skills.

Demonstrate an understanding of and the ability to apply Excel spreadsheet functions to

solve management accounting problems.

General Assessment Information

Participation

Due: Ongoing

Weighting: 15%

Submission: Students are expected to attend the weekly seminars, have completed the weekly assignment questions, and actively participate in the activities conducted during the seminars. This assessment mark will be awarded in line with the ability of student's to meet the criteria outlined in the unit assessment guide.

Extension: No extension will be granted, except in circumstances where a disruption to studies is made and approved.

Penalties: A mark of zero will be awarded for non-attendance. Students must attend the seminars to receive marks for participation.

Class Tests

Graduate Capabilities

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

- Demonstrate an understanding of management accounting concepts and apply such concepts to real-life case scenarios.
- Critically analyse data to determine the relevant information and costing techniques required to make decisions.
- Demonstrate an understanding of and the ability to apply Excel spreadsheet functions to solve management accounting problems.

Assessment tasks

- Participation
- Class Tests
- Excel Assignment
- Final Examination

Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

Learning outcomes

- Demonstrate an understanding of management accounting concepts and apply such concepts to real-life case scenarios.
- Critically analyse data to determine the relevant information and costing techniques required to make decisions.
- Demonstrate effective written and oral communication skills.

Assessment tasks

- Participation
- Final Examination

Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

Learning outcomes

- Demonstrate an understanding of management accounting concepts and apply such concepts to real-life case scenarios.
- Critically analyse data to determine the relevant information and costing techniques required to make decisions.
- Demonstrate effective written and oral communication skills.
