Unit description

This unit focuses on special topics concerned with issues in both financial and management accounting in international contexts. Topics range from ethical behaviour in accounting, external and corporate reporting, organising, managing and evaluating global operations focusing on the impact of national culture and how an understanding of cultural differences provides insights into cross-national differences in accounting behaviour and practice. Topics are chosen to encourage students to explore issues in international accounting, and to develop skills in analysis and investigation that are necessary and that are required to undertake more advanced research. A sound understanding of cultural influences on international accounting practices is a requirement for any advanced study of accounting theory. This unit provides students with essential internationally contextualised accounting experiences that develop the concepts and skills necessary for advanced research in accounting and corporate governance.

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

## Learning Outcomes

On successful completion of this unit, you will be able to:

Understand some of the differences in accounting methods and disclosure practices we might find when we compare the financial reports of companies from different countries. Appreciate how accounting and corporate disclosure is regulated in a range of different nations, and the role that the accounting profession, government and other bodies have in that regulation.

Recognise the cultural, economic, political and historical factors that help explain differences and similarities in patterns of accounting and regulation across nations, and how these factors may influence the move towards international harmonisation.

Critically explore and evaluate the state of contemporary and professional research in the area of International Accounting.

Comprehend the issues and problems, including ethical behavioural issues, facing international companies in organising, managing, planning, controlling and evaluating their global operations.

## General Assessment Information

### Turnitin

All text based assessments must be submitted through Turnitin as per instructions provided in the unit guide. It is the student's responsibility to ensure that work is submitted correctly prior to the due date.

Multiple submissions may be possible prior to the final due date and time of an assessment task and originality reports may be made available to students to view and check their work. All identified matching text will be reconsidered carefully. Students should note that the system will not immediately produce the similarity score on a second or subsequent submission - it approximately takes 24 hours for the report to be generated. This may be after the due date so students should plan any resubmissions carefully. Please refer to these instructions on how to submit your assignment through Turnitin and access similarity reports and feedback provided by teaching staff. Should you have questions about Turnitin or experience issues submitting through the system, you must inform your unit coordinator immediately. If the issue is technical in nature may also lodge OneHelp Ticket, refer to the IT help page.

It is the responsibility of the student to retain a copy of any work submitted. Students must produce these documents upon request. Copies should be retained until the end of the grade appeal period each term. In the event that a student is asked to produce another copy of work submitted and is unable to do so, they may be awarded zero (0) for that particular assessment task.

## Research and Practice, Global and Sustainability

This unit gives you opportunities to conduct research with regard to group report. Further information on the group report is provided in the Assessment guide.

This unit addresses global and sustainability issues as direct areas of study and as necessary implications arising from the materials, assessment and academic discussion and debate in classes. We promote sustainability by developing ability in students to research and locate information within accounting discipline. We aim to provide students with an opportunity to obtain skills which will benefit them throughout their career.

The unit materials have a reference list at the end of each chapter/module/text containing all references cited by the author. These provide some guidance to references that could be used to research particular issues.
