Unit description
This unit focuses on developmental and acquired language disorders. In the first part of this unit the focus will be on developmental language disorders in school-age children, and adolescents. In the second part of this unit, students will focus on complex issues in aphasia assessment and treatment, communication disorders caused by right hemisphere brain damage, traumatic brain injury, and dementia.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at http://students.mq.edu.au/student_admin/enrolmentguide/academicdates/

Learning Outcomes

1. recognise and analyse language and communication problems resulting from damage to areas of the brain outside the classical language areas, including the frontal lobes and the right hemisphere
2. apply and synthesise knowledge of normal language development (normative research and theoretical perspectives) to language impairments in school-aged children
3. recognise and analyse the manifestations of specific language impairment in school-aged children and adolescents, with particular emphasis on pragmatic impairment
4. recognise and analye the relationship between language, communication, culture, and cognition
5. select, analyse, and interpret a variety of clinical assessment procedures relevant for acquired, school-aged, and adolescent language and communication disorders
6. apply theoretically-motivated, evidenced-based management principles to acquired, school-aged, and adolescent language and communication disorders
7. apply a social, collaborative, client-centred model of assessment and treatment to acquired, school-aged, and adolescent language and communication disorders
8. recognise and evaluate other professionals’ roles in assessment and treatment for acquired, school-aged, and adolescent language and communication disorders

Assessment Tasks

<tr>
<td>Assessment 2(b)</td>
<td>30%</td>
<td>Week 13</td>
</tr>
</tbody>
</table>

Assessment 1(a)
Due: **Week 6**
Weighting: **20%**

Students will be required to critically appraise 2 recently published research papers on treatment for language disorders in (1) early school-age children and (2) adolescents. Each critically appraised paper (CAP; 500 words) will be followed by a commentary (250 words) on the clinical significance of the paper related to the student’s clinical experience. A template will be provided for the CAP and for the reflective statement.

This Assessment Task relates to the following Learning Outcomes:
- apply and synthesise knowledge of normal language development (normative research and theoretical perspectives) to language impairments in school-aged children
- recognise and analyse the manifestations of specific language impairment in school-aged children and adolescents, with particular emphasis on pragmatic impairment
- recognise and analyse the relationship between language, communication, culture, and cognition
• select, analyse, and interpret a variety of clinical assessment procedures relevant for acquired, school-aged, and adolescent language and communication disorders
• apply theoretically-motivated, evidenced-based management principles to acquired, school-aged, and adolescent language and communication disorders
• apply a social, collaborative, client-centred model of assessment and treatment to acquired, school-aged, and adolescent language and communication disorders

Assessment 1(b)

Due: Week 6
Weighting: 20%

Students will be provided with a case description of a person with aphasia who speaks more than one language. Students will critically discuss the impact of bi- and multilingualism on clinical assessment practices for acquired language and communication disorders, and develop an assessment plan suitable for the case provided.

This Assessment Task relates to the following Learning Outcomes:
• recognise and analyse language and communication problems resulting from damage to areas of the brain outside the classical language areas, including the frontal lobes and the right hemisphere
• recognise and analyse the relationship between language, communication, culture, and cognition
• select, analyse, and interpret a variety of clinical assessment procedures relevant for acquired, school-aged, and adolescent language and communication disorders
• apply theoretically-motivated, evidenced-based management principles to acquired, school-aged, and adolescent language and communication disorders
• apply a social, collaborative, client-centred model of assessment and treatment to acquired, school-aged, and adolescent language and communication disorders

Assessment 2(a)

Due: Week 14
Weighting: 30%

Case studies of language-impaired school-aged children will be provided. Students will be required to answer questions that relate to assessment and intervention, including explanation of clinical reasoning. This assessment task is a barrier assessment. Students must pass this assessment to complete the requirements for SPH802.

This Assessment Task relates to the following Learning Outcomes:
• apply and synthesise knowledge of normal language development (normative research and theoretical perspectives) to language impairments in school-aged children
• recognise and analyse the manifestations of specific language impairment in school-aged children and adolescents, with particular emphasis on pragmatic impairment
• recognise and analyse the relationship between language, communication, culture, and cognition
• select, analyse, and interpret a variety of clinical assessment procedures relevant for acquired, school-aged, and adolescent language and communication disorders
• apply theoretically-motivated, evidenced-based management principles to acquired, school-aged, and adolescent language and communication disorders
• apply a social, collaborative, client-centred model of assessment and treatment to acquired, school-aged, and adolescent language and communication disorders
• recognise and evaluate other professionals’ roles in assessment and treatment for acquired, school-aged, and adolescent language and communication disorders

Assessment 2(b)

Due: Week 13
Weighting: 30%

Students will be provided with a case description of a person with traumatic brain injury. The case description will include information concerning the client’s brain injury, the nature of their communication disorder, and social history. Students will critically evaluate the case information, and develop an intervention plan suitable for the case provided. The intervention plan will involve development of intervention goals, selection of intervention procedures, and selection of outcome measures. This assessment task is a barrier assessment. Students must pass this assessment to complete the requirements for SPH802.

This Assessment Task relates to the following Learning Outcomes:
• recognise and analyse language and communication problems resulting from damage to areas of the brain outside the classical language areas, including the frontal lobes and the right hemisphere
• recognise and analyse the relationship between language, communication, culture, and cognition
• select, analyse, and interpret a variety of clinical assessment procedures relevant for acquired, school-aged, and adolescent language and communication disorders
• apply theoretically-motivated, evidenced-based management principles to acquired, school-aged, and adolescent language and communication disorders
apply a social, collaborative, client-centred model of assessment and treatment to acquired, school-aged, and adolescent language and communication disorders

recognise and evaluate other professionals’ roles in assessment and treatment for acquired, school-aged, and adolescent language and communication disorders

**Delivery and Resources**

Classes for SPH802 will be delivered over the regular 13 week semester. Lecturers will include a variety of expert researchers and clinicians working across the populations under study.

**Policies and Procedures**

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the [Learning and Teaching Category](http://www.mq.edu.au/policy/docs/) of Policy Central.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

**Results**

Results shown in *iLearn*, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in *eStudent*. For more information visit [ask.mq.edu.au](http://ask.mq.edu.au).
Student Support
Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills
Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

Student Enquiry Service
For all student enquiries, visit Student Connect at ask.mq.edu.au

Equity Support
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help
For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

Graduate Capabilities
PG - Capable of Professional and Personal Judgment and Initiative
Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

Learning outcomes
- recognise and analyse language and communication problems resulting from damage to areas of the brain outside the classical language areas, including the frontal lobes and the right hemisphere
apply and synthesise knowledge of normal language development (normative research and theoretical perspectives) to language impairments in school-aged children
• recognise and analyse the manifestations of specific language impairment in school-aged children and adolescents, with particular emphasis on pragmatic impairment
• recognise and analyse the relationship between language, communication, culture, and cognition
• select, analyse, and interpret a variety of clinical assessment procedures relevant for acquired, school-aged, and adolescent language and communication disorders
• apply theoretically-motivated, evidenced-based management principles to acquired, school-aged, and adolescent language and communication disorders
• apply a social, collaborative, client-centred model of assessment and treatment to acquired, school-aged, and adolescent language and communication disorders
• recognise and evaluate other professionals’ roles in assessment and treatment for acquired, school-aged, and adolescent language and communication disorders

Assessment tasks
• Assessment 1(a)
• Assessment 1(b)
• Assessment 2(a)
• Assessment 2(b)

PG - Discipline Knowledge and Skills
Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

Learning outcomes
• recognise and analyse language and communication problems resulting from damage to areas of the brain outside the classical language areas, including the frontal lobes and the right hemisphere
• apply and synthesise knowledge of normal language development (normative research and theoretical perspectives) to language impairments in school-aged children
• recognise and analyse the manifestations of specific language impairment in school-aged children and adolescents, with particular emphasis on pragmatic impairment
• recognise and analyse the relationship between language, communication, culture, and cognition
Unit guide SPH 802 Developmental and Acquired Language Disorders II

- select, analyse, and interpret a variety of clinical assessment procedures relevant for acquired, school-aged, and adolescent language and communication disorders
- apply theoretically-motivated, evidenced-based management principles to acquired, school-aged, and adolescent language and communication disorders
- apply a social, collaborative, client-centred model of assessment and treatment to acquired, school-aged, and adolescent language and communication disorders
- recognise and evaluate other professionals’ roles in assessment and treatment for acquired, school-aged, and adolescent language and communication disorders

Assessment tasks
- Assessment 1(a)
- Assessment 1(b)
- Assessment 2(a)
- Assessment 2(b)

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes
- recognise and analyse language and communication problems resulting from damage to areas of the brain outside the classical language areas, including the frontal lobes and the right hemisphere
- apply and synthesise knowledge of normal language development (normative research and theoretical perspectives) to language impairments in school-aged children
- recognise and analyse the manifestations of specific language impairment in school-aged children and adolescents, with particular emphasis on pragmatic impairment
- recognise and analyse the relationship between language, communication, culture, and cognition
- select, analyse, and interpret a variety of clinical assessment procedures relevant for acquired, school-aged, and adolescent language and communication disorders
- apply theoretically-motivated, evidenced-based management principles to acquired, school-aged, and adolescent language and communication disorders
• apply a social, collaborative, client-centred model of assessment and treatment to acquired, school-aged, and adolescent language and communication disorders
• recognise and evaluate other professionals’ roles in assessment and treatment for acquired, school-aged, and adolescent language and communication disorders

Assessment tasks

• Assessment 1(a)
• Assessment 1(b)
• Assessment 2(a)
• Assessment 2(b)

PG - Research and Problem Solving Capability

Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

Learning outcomes

• select, analyse, and interpret a variety of clinical assessment procedures relevant for acquired, school-aged, and adolescent language and communication disorders
• apply theoretically-motivated, evidenced-based management principles to acquired, school-aged, and adolescent language and communication disorders
• apply a social, collaborative, client-centred model of assessment and treatment to acquired, school-aged, and adolescent language and communication disorders
• recognise and evaluate other professionals’ roles in assessment and treatment for acquired, school-aged, and adolescent language and communication disorders

Assessment tasks

• Assessment 1(a)
• Assessment 1(b)
• Assessment 2(a)
• Assessment 2(b)

PG - Effective Communication

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.
This graduate capability is supported by:

**Learning outcomes**

- select, analyse, and interpret a variety of clinical assessment procedures relevant for acquired, school-aged, and adolescent language and communication disorders
- apply theoretically-motivated, evidenced-based management principles to acquired, school-aged, and adolescent language and communication disorders
- apply a social, collaborative, client-centred model of assessment and treatment to acquired, school-aged, and adolescent language and communication disorders
- recognise and evaluate other professionals’ roles in assessment and treatment for acquired, school-aged, and adolescent language and communication disorders

**Assessment tasks**

- Assessment 1(a)
- Assessment 1(b)
- Assessment 2(a)
- Assessment 2(b)

**PG - Engaged and Responsible, Active and Ethical Citizens**

Our postgraduates will be ethically aware and capable of confident transformative action in relation to their professional responsibilities and the wider community. They will have a sense of connectedness with others and country and have a sense of mutual obligation. They will be able to appreciate the impact of their professional roles for social justice and inclusion related to national and global issues.

This graduate capability is supported by:

**Learning outcomes**

- recognise and analyse the relationship between language, communication, culture, and cognition
- select, analyse, and interpret a variety of clinical assessment procedures relevant for acquired, school-aged, and adolescent language and communication disorders
- apply theoretically-motivated, evidenced-based management principles to acquired, school-aged, and adolescent language and communication disorders
- apply a social, collaborative, client-centred model of assessment and treatment to acquired, school-aged, and adolescent language and communication disorders
- recognise and evaluate other professionals’ roles in assessment and treatment for acquired, school-aged, and adolescent language and communication disorders
Assessment tasks

• Assessment 1(a)
• Assessment 1(b)
• Assessment 2(a)
• Assessment 2(b)
