Unit description

This unit aims to provide students who want to explore aspects of learning and teaching within their discipline with the knowledge and skills to enable them to be effective peer assisted learning leaders at undergraduate level. Each student is placed in a teaching and learning role during their study of this unit, so that they will be in a position to apply what they are learning (and reflect on their experiences). Where possible, the teaching and learning support role involves interaction with students within their substantive discipline area. The unit develops students' personal and professional skills in line with the University's graduate capabilities.

## Delivery and Resources

### Unit Content

The specific unit content is partially negotiated with students, but will cover three board areas:

- *Theoretical* Issues in Peer Assisted Learning:

In this section of the unit we will explore a range of theoretical issues that ground PAL. This will include discussions and exploration of Communities of Practice, Communities of Enquiry, Constructivist Learning principles and the notion of student-centred learning. Further, we will examine the empirical literature for results relevant to the efficacy, efficiency and generalizability of PAL. These discussions will inform the practical skills we will explore and develop in section

two.

- *Practical Skills for Peer Assisted Learning Leadership:*

In this section we will explore, develop and practice a range of practical skills relevant to PAL leadership. These practical skills will be related back to the Theoretical Issues explored earlier and will act as a catalyst for self-reflection and identification of ongoing professional development needs.

- *Discipline Issues in the Leading Peer Assisted Learning Sessions:*

In this section we will examine if and how PAL leadership need to be adapted to different discipline contexts. Each student will explore the literature from their home discipline(s) and develop any discipline-specific skills required to be an effective PAL Leader. Reflection on discipline-specific skills, issues and problems will allow us to develop a more robust and generalizable notion of PAL Leadership. Further, this section will enable us to refocus on the underlying theoretical basis of PAL.

## Readings
