Unit description
This unit examines health, wellbeing, nutrition and safety of children from infancy to 12 years. Implications for children, families and communities are addressed, including practices in a range of settings. Issues and debates arising from research, available technology, community attitudes and values are critically examined. This unit introduces students to the syllabus content associated with the personal development, health and physical education (PDHPE) key learning area with particular focus on the safe living, personal health choices, and growth and development strands. Skills and knowledge in planning, teaching and assessing PDHPE programs are examined, including modifications to the curriculum to meet the needs of diverse learners.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at http://students.mq.edu.au/student_admin/enrolmentguide/academicdates/

Learning Outcomes

1. Understand different approaches to health from international policy to individual choice.
2. Know how to access and use key early childhood, school and government documents relating to health.
3. Know how to access key research findings relating to infant and child health.
4. Understand their own knowledge and biases regarding health issues.
5. Appreciate the multifactorial nature of health problems and differential impacts of health issues on various groups within society.
6. Have an understanding of the diverse range of health issues in Australia.
7. Acquire basic skills in teaching young children about health and developing safe but challenging learning environments.
8. Understand basic strategies to prevent or intervene.
9. Appreciate the multidisciplinary nature of health problems.

**General Assessment Information**

In order to successfully complete the assessment you must:

- Consult the Assessment Guide published through the unit's iLearn site.
- Have access to the textbook and read at least the required chapters.
- Listen to all lecture recordings.
- Use the Assessment Guide to ensure correct preparation and completion of assessments.

**Online Survey**

Due: **20 March, 11.59pm**
Weighting: **3%**

As a student enrolled in ECH130, you are invited to participate in a research project being conducted by Dr Helen Little. The project aims to investigate approaches to undergraduate education related to outdoor learning environments and students’ development of knowledge and skills in relation to the provision of challenging, physically active learning experiences for children aged from birth to 5 years.

If you participate, you will be asked to complete an online survey at four time points during your degree and one after graduation. Each survey will ask for information about your program of study, your work experience and examine your understanding relating to aspects of supporting children’s physically challenging play in the context of outdoor learning environments in Early
Childhood settings. It is anticipated that the survey should take approximately 30 minutes to complete.

Initial participation in the first survey will count as 3% credit towards your ECH130 grade. The survey needs to be completed by the end of Week 3 (Sunday 20 March, 2016). Details of how to access the survey will be provided on iLearn.

Participation in the study is voluntary. You are not obliged to participate and if you decide to participate, you are free to withdraw at any time without having to give a reason and without consequence.

If you do not wish to participate in the study you will need to submit a 800 word essay (worth 3%) examining children’s levels of physical activity in early childhood settings. You should use at least 3 refereed journal articles to support your discussion. The essay is due midnight on 20 March 2016. Submit through Turnitin link on iLearn.

This Assessment Task relates to the following Learning Outcomes:
  • Understand basic strategies to prevent or intervene.

EYLF & PDHPE
Due: Open 4 April, 2pm-11.59pm
Weighting: 10%

Teachers use a range of documents to support the health and well being of infants and children. Key documents are the Early Years Learning Framework (for Birth to 5 years) and the Personal Development, Health and Physical Education (Kindergarten to Year 6) Syllabus. The purpose of this quiz is to support your understanding of these key documents.

There will be 10 questions, worth 1 mark each.

This online quiz will be open for 8 hours, Tuesday 28 March, from 2pm - 11.59pm. You will have one hour to complete and only one attempt is permitted.

Required readings
http://docs.education.gov.au/node/2632
'http://syllabus.bos.nsw.edu.au/pdhpe/

Online quizzes are an individual assessment task and MUST BE COMPLETED by each student individually.

This Assessment Task relates to the following Learning Outcomes:
  • Know how to access and use key early childhood, school and government documents relating to health.
• Acquire basic skills in teaching young children about health and developing safe but challenging learning environments.
• Understand basic strategies to prevent or intervene.

Major Essay
Due: 1 May, 11.59pm
Weighting: 45%

The essay focus is on maternal exposure to racism and the impact on infant and child health. Further details, such as the marking rubric, will be made available in the Assessment Guide on iLearn.

This Assessment Task relates to the following Learning Outcomes:
• Understand different approaches to health from international policy to individual choice.
• Know how to access key research findings relating to infant and child health.
• Understand their own knowledge and biases regarding health issues.
• Appreciate the multifactorial nature of health problems and differential impacts of health issues on various groups within society.

Overview of Unit
Due: Exam period
Weighting: 42%

The exam will cover content from lectures and your textbook. Additional details will be published in the Assessment Guide available on iLearn.

Students are required to be available throughout the duration of the exam period http://www.mq.edu.au/policy/docs/examination/procedure.html If you are unavailable on the day of the exam and it’s not due to unavoidable circumstances such as hospitalisation, then you will be marked as absent from the exam and you will fail the unit. The exam cannot be completed before the date listed in the University exam timetable.

Students who live outside of the Sydney Metropolitan Area who are registered for a regional exam centre will be able to complete the exam at their exam centre.

This Assessment Task relates to the following Learning Outcomes:
• Understand different approaches to health from international policy to individual choice.
• Know how to access and use key early childhood, school and government documents relating to health.
• Know how to access key research findings relating to infant and child health.
- Understand their own knowledge and biases regarding health issues.
- Appreciate the multifactorial nature of health problems and differential impacts of health issues on various groups within society.
- Have an understanding of the diverse range of health issues in Australia.
- Acquire basic skills in teaching young children about health and developing safe but challenging learning environments.
- Understand basic strategies to prevent or intervene.
- Appreciate the multidisciplinary nature of health problems.

**Delivery and Resources**

**Delivery**

For external students ECH130 has a series of pre-recorded lectures. Some of the lectures will be made available at the beginning of semester, and - due to a refresh and update of certain lectures - others will be made during semester once they have been revised and delivered.

Attendance at the on-campus is voluntary. You must register for the on-campus no later than 17 March if you wish to attend. Details will be available on iLearn from the first week of session 1.

**Textbook**

The textbook for ECH130 is:

You must have access to this textbook throughout the unit. Please purchase the textbook as soon as possible. The *Marketing Excerpt* PDF at [http://www.cambridge.org/at/academic/subjects/education/education-history-theory/health-and-wellbeing-childhood#contentsTabAnchor](http://www.cambridge.org/at/academic/subjects/education/education-history-theory/health-and-wellbeing-childhood#contentsTabAnchor) provides part of Chapter 1 and may be useful if you want to look at the textbook in advance.

**IEC Unit Expectations**

- In order to be eligible for a passing grade, students must meet the following attendance requirements:
  - Internal Students: Attend at least 80% of all tutorials – punctuality is expected. Consistent lateness or absence will jeopardise a passing grade
  - Students are required to contribute to all online and tutorials tasks
- Students are expected to read weekly readings before completing tasks and attending tutorials
- Students are expected to listen/attend weekly lectures before completing tasks and attending tutorials
- All assessment tasks must be submitted
Assessment

When preparing your assignments, it is essential that:

- Students must retain a copy of all assignments before submission, and retain the copy until your final grade for the subject has been received;
- Marks will be deducted if you submit your assessment late (refer to the ‘late assessments’ section below for more details);
- Unless there are exceptional circumstances, no assessment will be accepted after the date that the assessment has been returned to other students.
- If an assessment is considered to be below passing standard, another staff member on the unit will provide a second opinion. No failed assessment may be re-submitted.

Final Submissions

- Students are responsible for checking that their submission has been successful and has been submitted by the due date and time.
- Late submissions due to last minute technical difficulties will incur a lateness penalty.

Late Assessments

A deduction of 5% of the total possible mark allocated for that assessment would be made for each day or part day that assessment is late, weekends counting as two days. For example, if an assessment is worth 20 marks and you submit it 2 days late, you will have 2 marks (2 x 5% of 20 marks) subtracted from your awarded mark.

Extensions

In extenuating circumstances, students may apply to the unit coordinator for an extension to the assessment due date. Reasons for the extension need to be documented through the Disruption to Studies form accessible through ask.mq.edu.au under "Disruption" and supported (e.g., a Professional Authority Form must be used in the case of illness). Note that:

- Students MUST speak with the unit coordinator prior to submitting their request through https://ask.mq.edu.au
- Extensions will only be granted in receipt of the completed form submitted through ask.mq.edu.au plus documentation.
- Emails are not appropriate means of extension requests.
- It is essential that you plan ahead and organise your study time effectively. Poor time management is not grounds for an extension.
- In the case of computer malfunction, a draft of your assignment may be requested.

Please ensure that you print out a draft regularly, so that it is available for submission on request.
• Extensions are usually not granted on the due date.

**IEC Academic Honesty Guidelines**

All assignments should cite and provide full bibliographical details of all material that you have used to inform or support your ideas. At the Institute of Early Childhood, students are required to use the American Psychological Association (APA) referencing procedures. Full details about how to cite and reference correctly can be found in Perrin (2015) and in the IEC Academic Honesty Handbook.

The following guide can be purchased from the Co-op Bookshop. This is a required text:

**Final Grades**

The final grade a student receives signifies their overall performance in meeting the learning outcomes for the unit. The number assigned to a grade (Standard Numerical Grade or SNG) reflects the extent to which student attainment matches the grade descriptors.

Your raw mark for the unit (i.e., the total of your marks for each assessment item) may not be the same as the SNG which you receive. Results may be scaled to ensure there is a degree of comparability across the university, so that units with the same past performances of their students should achieve similar results. The process of scaling does not change the order of marks among students. A student who receives a higher raw score mark than another will also receive a higher final scaled mark.

**Policies and Procedures**

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the [Learning and Teaching Category] of Policy Central.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/]

**Results**

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au.

**Student Support**

Macquarie University provides a range of support services for students. For details, visit [http://students.mq.edu.au/support/]

**Learning Skills**

Learning Skills ([mq.edu.au/learningskills]) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

**Student Enquiry Service**

For all student enquiries, visit Student Connect at [ask.mq.edu.au]

**Equity Support**

Students with a disability are encouraged to contact the [Disability Service] who can provide appropriate help with any issues that arise during their studies.

**IT Help**

For help with University computer systems and technology, visit [http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/].

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy]. The policy applies to all who connect to the MQ network including students.
Graduate Capabilities

Engaged and Ethical Local and Global citizens
As local citizens our graduates will be aware of indigenous perspectives and of the nation’s historical context. They will be engaged with the challenges of contemporary society and with knowledge and ideas. We want our graduates to have respect for diversity, to be open-minded, sensitive to others and inclusive, and to be open to other cultures and perspectives: they should have a level of cultural literacy. Our graduates should be aware of disadvantage and social justice, and be willing to participate to help create a wiser and better society.

This graduate capability is supported by:

Learning outcomes

• Understand different approaches to health from international policy to individual choice.
• Have an understanding of the diverse range of health issues in Australia.

Assessment tasks

• Online Survey
• Overview of Unit

Socially and Environmentally Active and Responsible
We want our graduates to be aware of and have respect for self and others; to be able to work with others as a leader and a team player; to have a sense of connectedness with others and country; and to have a sense of mutual obligation. Our graduates should be informed and active participants in moving society towards sustainability.

This graduate capability is supported by:

Learning outcome

• Have an understanding of the diverse range of health issues in Australia.

Assessment task

• Overview of Unit

Capable of Professional and Personal Judgement and Initiative
We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:
Assessment task

- EYLF & PDHPE

Commitment to Continuous Learning

Our graduates will have enquiring minds and a literate curiosity which will lead them to pursue knowledge for its own sake. They will continue to pursue learning in their careers and as they participate in the world. They will be capable of reflecting on their experiences and relationships with others and the environment, learning from them, and growing - personally, professionally and socially.

This graduate capability is supported by:

Learning outcome

- Know how to access key research findings relating to infant and child health.

Assessment task

- Online Survey

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

- Understand different approaches to health from international policy to individual choice.
- Know how to access and use key early childhood, school and government documents relating to health.
- Know how to access key research findings relating to infant and child health.
- Understand their own knowledge and biases regarding health issues.
- Appreciate the multifactorial nature of health problems and differential impacts of health issues on various groups within society.
- Have an understanding of the diverse range of health issues in Australia.
- Acquire basic skills in teaching young children about health and developing safe but challenging learning environments.
- Understand basic strategies to prevent or intervene.
• Appreciate the multidisciplinary nature of health problems.

Assessment tasks
• EYLF & PDHPE
• Overview of Unit

Critical, Analytical and Integrative Thinking
We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systematically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

Learning outcomes
• Understand their own knowledge and biases regarding health issues.
• Appreciate the multifactorial nature of health problems and differential impacts of health issues on various groups within society.
• Appreciate the multidisciplinary nature of health problems.

Assessment tasks
• EYLF & PDHPE
• Major Essay
• Overview of Unit

Problem Solving and Research Capability
Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

Learning outcomes
• Understand their own knowledge and biases regarding health issues.
• Appreciate the multifactorial nature of health problems and differential impacts of health issues on various groups within society.

Assessment task
• Online Survey
Effective Communication

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:
