### Credit points
3

### Prerequisites
COMP115 or (admission to BCom-ActStud or BActStud)

### Corequisites

### Co-badged status
ITEC625

### Unit description
This unit studies programming as a systematic discipline and introduces more formal software design methods. Programming skills are extended to include elementary data structures and abstract data types. There is a strong emphasis on problem solving and algorithms, including aspects of correctness, complexity and computability.

---

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at [http://students.mq.edu.au/student_admin/enrolmentguide/academicdates/](http://students.mq.edu.au/student_admin/enrolmentguide/academicdates/)
Learning Outcomes

1. Apply enhanced problem solving skills to develop algorithms
2. Implement programs (from algorithms), showing an understanding of the underlying architecture of the computer
3. Follow standard software engineering practices (in particular document, test and debug programs)
4. Compare different methods available for the same problem in terms of efficiency and other criteria

General Assessment Information

Late Submission

Late submission of assignments will not be accepted, except in the event of unavoidable disruption.

If you experience unavoidable disruption, and wish to apply for late submission, please submit a Disruption to Studies notification with appropriate evidence.

Assessment Tasks

</tbody>
</table>

Weekly exercise

Due: During each workshop
Weighting: 15%

Students need to prepare for the workshop questions before the start of each workshop. Each week, starting from week 2, students would be asked to answer one workshop question, and would be assessed on their response. Selection of students will be done at random. If a student is picked and is not present in the workshop, they automatically get a zero for that week. Each student will be selected at least 2 times during the semester.
This Assessment Task relates to the following Learning Outcomes:

- Apply enhanced problem solving skills to develop algorithms
- Implement programs (from algorithms), showing an understanding of the underlying architecture of the computer
- Follow standard software engineering practices (in particular document, test and debug programs)
- Compare different methods available for the same problem in terms of efficiency and other criteria

Assignment 1

Due: **23:45, Sunday 10th April**
Weighting: 5%

This will be a programming assignment that will help you to practise concepts from weeks 1 - 3. Your code will be assessed via automated tests that will be provided to you. You will also be marked on code quality and completeness.

Assignment 2

Due: **23:45, Sunday 5th June**
Weighting: 10%

This will be a programming assignment that will help you to practise concepts from weeks 7 - 11. Your code will be assessed via automated tests that will be provided to you.
Follow standard software engineering practices (in particular document, test and debug programs)

Compare different methods available for the same problem in terms of efficiency and other criteria

**Mid-semester practical exam**

**Due:** Week 8 workshop  
**Weighting:** 10%

The practical exam will assess students on topics from weeks 2 to 7.

This Assessment Task relates to the following Learning Outcomes:

- Apply enhanced problem solving skills to develop algorithms
- Implement programs (from algorithms), showing an understanding of the underlying architecture of the computer
- Follow standard software engineering practices (in particular document, test and debug programs)

**End-of-semester Practical Exam**

**Due:** Week 13 Workshop  
**Weighting:** 10%

The practical exam will assess students on topics from the entire semester.

This Assessment Task relates to the following Learning Outcomes:

- Apply enhanced problem solving skills to develop algorithms
- Implement programs (from algorithms), showing an understanding of the underlying architecture of the computer
- Follow standard software engineering practices (in particular document, test and debug programs)
- Compare different methods available for the same problem in terms of efficiency and other criteria

**Final examination**

**Due:** TBA  
**Weighting:** 50%

This will be a three hour written invigilated examination which will cover all four topic groupings (that is, weeks 1-12).
This Assessment Task relates to the following Learning Outcomes:

- Apply enhanced problem solving skills to develop algorithms
- Implement programs (from algorithms), showing an understanding of the underlying architecture of the computer
- Follow standard software engineering practices (in particular document, test and debug programs)
- Compare different methods available for the same problem in terms of efficiency and other criteria

**Delivery and Resources**

**CLASSES**

Each week you should attend

- three hours of lectures and
- a one and a half hour mixed workshop class, consisting of a one hour tutorial followed by 30 minutes of independent practical activities, in which your tutor is available for consultation, in the same lab.

For details of days, times and rooms consult the [timetables webpage](http://unitguides.mq.edu.au/unit_offerings/58906/unit_guide/print).

**Note that Workshops commence in week 1.**

You should have selected a workshop during enrolment. **You should attend the workshop you are enrolled in.** If you do not have a class, or if you wish to change one, you should see the enrolment operators in the E7B courtyard during the first two weeks of the semester. Thereafter you should go to the Science and Engineering Student Services Centre.

Please note that you are **required** to submit work regularly. You will get the help that you need by attending your workshop. Failure to submit work may result in you failing the unit (see the precise requirements in the "Grading Standards" section) or being excluded from the final examination.

**HELP101**

A help desk where tutors are available for consultation on 100-level units.

**REQUIRED AND RECOMMENDED TEXTS AND/OR MATERIALS**

**Textbook**

The first book in the following list, namely *Starting out with Java*, is the required text book for COMP125. The other books listed are helpful references.
• B. Eckel, *Thinking in Java* (electronic book, 3rd edition available within iLearn is fine and is free but does not cover data structures)
• A. Drozdek, *Data Structures and Algorithms in Java* (Cengage) 2nd edition. ISBN 9780534492526 (this book will also be used in COMP225)
• D. Carlson, *Eclipse Distilled* (Addison-Wesley) 1st edition. ISBN 9780321288158 (extensive coverage of the software development platform eclipse)

TECHNOLOGY USED AND REQUIRED

Audio Lecture

Digital recordings of lectures are available from within iLearn via [Echo360](https://www.echo360.com/).

Technology

- [Eclipse](https://www.eclipse.org/) - download Eclipse IDE for Java Developers
- [Java SE JDK](https://www.oracle.com/technetwork/java/javase/downloads/index.html) - download Java SE 8 to be compatible with the labs
- Note that you need the Java JDK 8 which includes the compiler tools. Make sure that you also the Java Runtime Environment JRE 8 to allow you to run Java applications.
- Learning Management System [iLearn](http://unitguides.mq.edu.au/unit_offerings/58906/unit_guide/print)
- [iQ system](http://unitguides.mq.edu.au/unit_offerings/58906/unit_guide/print) for the quizzes

Discussion Boards

The unit makes use of forums hosted within [iLearn](http://unitguides.mq.edu.au/unit_offerings/58906/unit_guide/print). Please post questions there, they are monitored by the unit staff.

Unit Schedule

Note that three important themes will pervade the entire unit:

1. Problem solving. A crucial skill for all of the weekly topics will be to write appropriate code to meet a given problem specification. This theme relates to the first two learning outcomes for this unit.
2. Software development. Use of the Java JUnit testing framework is an important development practice which will be taught from the beginning, and used throughout the unit. This theme relates to the third learning outcome of this unit.
3. Comparing different solution methods. Very often different algorithms are available for the same problem. Another important skill to develop throughout this unit is the ability to
compare different algorithms in terms of efficiency and other criteria. This theme relates to the fourth learning outcome of this unit.

**Policies and Procedures**

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

**Results**

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au.

**Disruption to Studies**

The University recognises that students may experience disruption that adversely affects their academic performance in assessment activities. Support services are provided by the University, and it is the student's responsibility to access such services as appropriate. For information concerning the Disruption policy and procedures please visit [http://students.mq.edu.au/student_admin/exams/disruption_to_studies/](http://students.mq.edu.au/student_admin/exams/disruption_to_studies/)

**Student Support**

Macquarie University provides a range of support services for students. For details, visit [http://students.mq.edu.au/support/](http://students.mq.edu.au/support/)

**Learning Skills**

Learning Skills ([mq.edu.au/learningskills](http://mq.edu.au/learningskills)) provides academic writing resources and study strategies to improve your marks and take control of your study.

- **Workshops**
- **StudyWise**
- **Academic Integrity Module for Students**
- **Ask a Learning Adviser**

**Student Enquiry Service**

For all student enquiries, visit Student Connect at [ask.mq.edu.au](http://ask.mq.edu.au)

**Equity Support**

Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.
IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

• Apply enhanced problem solving skills to develop algorithms
• Implement programs (from algorithms), showing an understanding of the underlying architecture of the computer
• Follow standard software engineering practices (in particular document, test and debug programs)
• Compare different methods available for the same problem in terms of efficiency and other criteria

Assessment tasks

• Weekly exercise
• Assignment 1
• Assignment 2
• Mid-semester practical exam
• End-of-semester Practical Exam
• Final examination

Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in
order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

**Learning outcomes**

- Apply enhanced problem solving skills to develop algorithms
- Follow standard software engineering practices (in particular document, test and debug programs)
- Compare different methods available for the same problem in terms of efficiency and other criteria

**Assessment tasks**

- Weekly exercise
- Assignment 1
- Assignment 2
- Mid-semester practical exam
- End-of-semester Practical Exam
- Final examination

**Creative and Innovative**

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

**Assessment tasks**

- Weekly exercise
- Assignment 1
- Assignment 2
- End-of-semester Practical Exam

**Effective Communication**

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:
Assessment tasks

- End-of-semester Practical Exam
- Final examination

Capable of Professional and Personal Judgement and Initiative

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:

Assessment task

- Final examination

Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

Learning outcome

- Compare different methods available for the same problem in terms of efficiency and other criteria

Assessment tasks

- End-of-semester Practical Exam
- Final examination

Changes from Previous Offering

1. Change of textbook from "Absolute Java" to "Starting out with Java". Please refer to "Delivery and resources" for more details about the textbook.
2. Classes-first approach will be adopted this semester. We will try to familiarize students with the object-oriented environment that is Java, and then move on to more complex problem solving.
3. Exceptions and queues have been removed from the course content.
4. In-class tests replaced by practical examinations.
5. Weekly submissions replaced by in-class oral assessments.
6. Quizzes introduced as a pre-requisite to assignments.
7. Number of assignments reduced to two.

**Grading Standards**

Three standards, namely Developing, Functional, and Proficient, summarize as many different levels of achievement. Each standard is precisely defined to help students know what kind of performance is expected to deserve a certain mark. The standards corresponding to the learning outcomes of this unit are given below:

<table>
<thead>
<tr>
<th>L.O. #1</th>
<th>Limited ability to solve problems. Limited knowledge of basic data structures.</th>
<th>Ability to write simple algorithms and solve simple problems using OOD. Know basic data structures (queues, stacks, linked lists) and how to manipulate them.</th>
<th>Ability to write complex algorithms and solve complex problems using OOD and recursion. Ability to select the most appropriate data structures to solve a problem.</th>
</tr>
</thead>
<tbody>
<tr>
<td>L.O. #2</td>
<td>Show poor programming skills. Limited ability to write code that compiles or executes properly.</td>
<td>Show basic programming skills. Understand notions of compiler and virtual machine. Know types, how to implement simple conditions, simple loops, simple data structures, simple objects.</td>
<td>Show advanced programming skills. Understand notions of compiler and virtual machine. Know types, how to implement conditions, loops, data structures, objects. Understand inheritance and polymorphism.</td>
</tr>
<tr>
<td>L.O. #3</td>
<td>Unability to follow specifications. Poor coding style. Poor documentation. Submission of incorrect programs showing no sign of testing/debugging skills.</td>
<td>Follow simple specifications. Document code (e.g. pre-post conditions). Test and debug a simple program. Understand the notion of modularity/object file.</td>
<td>Understand the importance of specifications. Neat code/consistent programming style. Clear and insightful comments. Design test cases and debug programs.</td>
</tr>
</tbody>
</table>

At the end of the semester, you will receive a grade that reflects your achievement in the unit.

- **Fail (F):** does not provide evidence of attainment of all learning outcomes. There is missing or partial or superficial or faulty understanding and application of the fundamental concepts in the field of study; and incomplete, confusing or lacking
communication of ideas in ways that give little attention to the conventions of the discipline.

- **Pass (P):** provides sufficient evidence of the achievement of learning outcomes. There is demonstration of understanding and application of fundamental concepts of the field of study; and communication of information and ideas adequately in terms of the conventions of the discipline. The learning attainment is considered satisfactory or adequate or competent or capable in relation to the specified outcomes.

- **Credit (Cr):** provides evidence of learning that goes beyond replication of content knowledge or skills relevant to the learning outcomes. There is demonstration of substantial understanding of fundamental concepts in the field of study and the ability to apply these concepts in a variety of contexts; plus communication of ideas fluently and clearly in terms of the conventions of the discipline.

- **Distinction (D):** provides evidence of integration and evaluation of critical ideas, principles and theories, distinctive insight and ability in applying relevant skills and concepts in relation to learning outcomes. There is demonstration of frequent originality in defining and analysing issues or problems and providing solutions; and the use of means of communication appropriate to the discipline and the audience.

- **High Distinction (HD):** provides consistent evidence of deep and critical understanding in relation to the learning outcomes. There is substantial originality and insight in identifying, generating and communicating competing arguments, perspectives or problem solving approaches; critical evaluation of problems, their solutions and their implications; creativity in application.

In this unit, your final grade depends on your performance for each component of the assessment. Indeed, for each task, you receive a mark that captures your standard of performance regarding each learning outcome assessed by this task. Then the different component marks are added up to determine your total mark out of 100. Your grade then depends on this total mark and your overall standard of performance.

Concretely, you will pass the unit, if

- your total mark is at least 50 out of 100; and
- you pass the final examination.

In order to obtain a higher grade than a Pass, you must fulfill the conditions for a Pass and have a total mark of at least

- 85 for High Distinction;
- 75 for Distinction;
- 65 for Credit.
