Credit points
3

Prerequisites
39cp including (COMP260 and MECO319)

Corequisites
COMP330 or MECO329

Co-badged status

Unit description
Students will work in groups to create a videogame using a commercial-level game engine. This will enable them to apply their previously acquired skills in videogame design and implementation to a substantial project. Teams will be expected to develop their own concept for the game. This will require creative design, the production of supporting documentation, quality control, and other associated skills and concepts. Teams will be expected to produce a compelling game proposal and meet regular agreed milestones as well as producing game documentation and giving a final presentation.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at http://students.mq.edu.au/student_admin/enrolmentguide/academicdates/

Learning Outcomes

1. Be able to apply the agile development process (prototyping and playtesting) to a large scale video game design and development project.
2. Have developed their ability to turn creative ideas into actual products, including the tradeoffs necessary in this process.

3. Understand and be able to make use of the basic principles of project management, teamwork, the roles and responsibilities of the project manager and appreciate the importance of working closely with the project’s client and the delivered game’s target audience.

4. Have improved their communication skills, both oral and written, in describing and documenting their game design work.

### Elevator Pitch

**Due:** Week 2  
**Weighting:** 5%

A two-minute pitch of a game idea to class.

This Assessment Task relates to the following Learning Outcomes:

- Have developed their ability to turn creative ideas into actual products, including the tradeoffs necessary in this process.
• Have improved their communication skills, both oral and written, in describing and
documenting their game design work.

Pitch
Due: Week 3
Weighting: 5%
A pitch of a proposed design to clients. Should include:

1. Design outline
2. Storyboards
3. Art style

All team members are expected to present and will be individually assessed for their contribution.

This Assessment Task relates to the following Learning Outcomes:
• Be able to apply the agile development process (prototyping and playtesting) to a large
scale video game design and development project.
• Have improved their communication skills, both oral and written, in describing and
documenting their game design work.

Project Plan
Due: Week 4
Weighting: 10%
A written project plan based on feedback from the pitch.

This Assessment Task relates to the following Learning Outcomes:
• Be able to apply the agile development process (prototyping and playtesting) to a large
scale video game design and development project.
• Understand and be able to make use of the basic principles of project management,
teamwork, the roles and responsibilities of the project manager and appreciate the
importance of working closely with the project's client and the delivered game's target
audience

Milestone 1
Due: Week 6
Weighting: 5%
A prototype and progress report based on agreed milestone targets. Individual team members
will be assessed based on their activity on the project.
This Assessment Task relates to the following Learning Outcomes:

- Be able to apply the agile development process (prototyping and playtesting) to a large scale video game design and development project.
- Have developed their ability to turn creative ideas in actual products, including the tradeoffs necessary in this process
- Understand and be able to make use of the basic principles of project management, teamwork, the roles and responsibilities of the project manager and appreciate the importance of working closely with the project's client and the delivered game's target audience

Milestone 2
Due: Week 7
Weighting: 5%

A prototype and progress report based on agreed milestone targets. Individual team members will be assessed based on their activity on the project.

This Assessment Task relates to the following Learning Outcomes:

- Be able to apply the agile development process (prototyping and playtesting) to a large scale video game design and development project.
- Have developed their ability to turn creative ideas in actual products, including the tradeoffs necessary in this process
- Understand and be able to make use of the basic principles of project management, teamwork, the roles and responsibilities of the project manager and appreciate the importance of working closely with the project's client and the delivered game's target audience

Milestone 3
Due: Week 9
Weighting: 5%

A prototype and progress report based on agreed milestone targets. Individual team members will be assessed based on their activity on the project.

This Assessment Task relates to the following Learning Outcomes:

- Be able to apply the agile development process (prototyping and playtesting) to a large scale video game design and development project.
• Have developed their ability to turn creative ideas into actual products, including the tradeoffs necessary in this process
• Understand and be able to make use of the basic principles of project management, teamwork, the roles and responsibilities of the project manager and appreciate the importance of working closely with the project's client and the delivered game's target audience

Milestone 4
Due: **Week 11**
Weighting: 5%

A prototype and progress report based on agreed milestone targets. Individual team members will be assessed based on their activity on the project.

This Assessment Task relates to the following Learning Outcomes:
• Be able to apply the agile development process (prototyping and playtesting) to a large scale video game design and development project.
• Understand and be able to make use of the basic principles of project management, teamwork, the roles and responsibilities of the project manager and appreciate the importance of working closely with the project's client and the delivered game's target audience

Complete game
Due: **Week 13**
Weighting: 10%

Final game demonstrated to industry sponsor. Mark is determined by sponsor.

This Assessment Task relates to the following Learning Outcomes:
• Be able to apply the agile development process (prototyping and playtesting) to a large scale video game design and development project.
• Have developed their ability to turn creative ideas into actual products, including the tradeoffs necessary in this process.
• Understand and be able to make use of the basic principles of project management, teamwork, the roles and responsibilities of the project manager and appreciate the importance of working closely with the project's client and the delivered game's target audience.
Design document

Due: **Week 14**  
Weighting: **15%**

A 2500 word report thoroughly describing of the final game mechanics of the game, justified in terms of the effect they are intended to achieve.

This Assessment Task relates to the following Learning Outcomes:

- Be able to apply the agile development process (prototyping and playtesting) to a large scale video game design and development project.
- Have developed their ability to turn creative ideas in actual products, including the tradeoffs necessary in this process.
- Have improved their communication skills, both oral and written, in describing and documenting their game design work.

Playtesting report

Due: **Week 14**  
Weighting: **15%**

A 2500 word report describing the playtesting process applied to the game including:

1. The hypotheses being tested  
2. The experiment design  
3. The results

This Assessment Task relates to the following Learning Outcomes:

- Be able to apply the agile development process (prototyping and playtesting) to a large scale video game design and development project.
- Have improved their communication skills, both oral and written, in describing and documenting their game design work.

Post-mortem

Due: **Week 15**  
Weighting: **20%**

A 3000 word report reflecting on the project including:

1. What aspects of the final game were successful/unsuccessful  
2. What aspects of the group-work process were helpful/unhelpful
This Assessment Task relates to the following Learning Outcomes:

- Understand and be able to make use of the basic principles of project management, teamwork, the roles and responsibilities of the project manager and appreciate the importance of working closely with the project's client and the delivered game's target audience.
- Have improved their communication skills, both oral and written, in describing and documenting their game design work.

**Delivery and Resources**

**CLASSES**

Classes will only be held in the weeks scheduled below. The lecturer will be available for consultation in the other weeks if desired.

**REQUIRED AND RECOMMENDED TEXTS AND/OR MATERIALS**

There is no prescribed text for this unit. However we recommend:

**UNIT WEBPAGE**

Please login to ilearn [http://ilearn.mq.edu.au/](http://ilearn.mq.edu.au/)

**TECHNOLOGIES USED AND REQUIRED**

The technology you use will depend on your project's needs. You will have access to the games lab computers and the software on them. Extra software required may be added if a good case can be made for it. You may also want to use resources that your sponsor and team members have access to. Your technology needs will be determined and defined by you in your project plan.

**Unit Schedule**

Learning and Teaching Activities

Learning and Teaching Strategies

COMP352 is taught through the involvement in a group project. Much of what is learnt is gained through experience and problem solving at the individual and group level. The unit will require the student to apply knowledge and skills gained in previous units and also require the student to acquire new knowledge and skills which will vary for each student and project according to the problem needing to be solved. The content of the unit includes: Preparation of a detailed project proposal and plan. Undertaking an extended group project. Preparation of intermediate and final project deliverables. Preparation of a final reflective report. A group project presentation.

Learning and Teaching Tips

To be successful you should: Meet with your group regularly, ideally weekly. Make sure you take notes, set agendas and action items and at the start of each meeting check the status of all action items. Attend the compulsory class sessions. Read appropriate material to support the technical and management aspects of your project. Perform the tasks assigned to you. Undertake self-study to acquire missing knowledge and skills needed for your particular project. Continually review and revise your project plan and ensure you are working to meet delivery of milestones by the specified time.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

Academic Honesty Policy http://mq.edu.au/policy/docs/academic_honesty/policy.html

In addition, a number of other policies can be found in the [Learning and Teaching Category](http://www.mq.edu.au/policy/docs/) of Policy Central.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

**Results**

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit [ask.mq.edu.au](http://ask.mq.edu.au).

**Plagiarism**

Please refer to the Department of Computing [Plagiarism Policy](http://comp.mq.edu.au/undergrad/policies/special_consideration_policy.htm) for the definition of plagiarism, advice on avoiding it and the penalties in place if you are found to have submitted plagiarised work.

**Student Support**

Macquarie University provides a range of support services for students. For details, visit [http://students.mq.edu.au/support/](http://students.mq.edu.au/support/)

**Learning Skills**

Learning Skills ([mq.edu.au/learningskills](http://mq.edu.au/learningskills)) provides academic writing resources and study strategies to improve your marks and take control of your study.

- **StudyWise**
Graduate Capabilities

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

- Be able to apply the agile development process (prototyping and playtesting) to a large scale video game design and development project.
- Have developed their ability to turn creative ideas in actual products, including the tradeoffs necessary in this process

Assessment tasks

- Pitch
- Project Plan
- Milestone 1
- Milestone 2
- Milestone 3
Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

**Learning outcomes**

- Be able to apply the agile development process (prototyping and playtesting) to a large scale video game design and development project.
- Have developed their ability to turn creative ideas into actual products, including the tradeoffs necessary in this process

**Assessment tasks**

- Pitch
- Project Plan
- Milestone 1
- Milestone 2
- Milestone 3
- Milestone 4
- Complete game
- Design document
- Playtesting report

Creative and Innovative

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

**Learning outcomes**

- Be able to apply the agile development process (prototyping and playtesting) to a large scale video game design and development project.
• Have developed their ability to turn creative ideas into actual products, including the tradeoffs necessary in this process.

**Assessment tasks**

- Elevator Pitch
- Pitch
- Project Plan
- Milestone 1
- Milestone 2
- Milestone 3
- Milestone 4
- Complete game
- Design document
- Playtesting report

**Effective Communication**

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

**Learning outcome**

- Have improved their communication skills, both oral and written, in describing and documenting their game design work.

**Assessment tasks**

- Elevator Pitch
- Pitch
- Design document
- Playtesting report
- Post-mortem

**Capable of Professional and Personal Judgement and Initiative**

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to
handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:

**Learning outcome**

- Understand and be able to make use of the basic principles of project management, teamwork, the roles and responsibilities of the project manager and appreciate the importance of working closely with the project's client and the delivered game's target audience

**Assessment tasks**

- Project Plan
- Milestone 1
- Milestone 2
- Milestone 3
- Milestone 4
- Complete game
- Post-mortem

**Grading and Passing**

Your final grade will depend on your performance in the project. In particular:

- You must contribute to all parts of the project (and your team members should agree) in order to pass this unit.
- You must attend all compulsory class sessions or have been given prior approval not to attend or provide medical evidence of why you could not attend.
- At the end of the course, in rare circumstances and at the discretion of the unit convenor, a bonus mark of up to 5% will be awarded to any student who repeatedly demonstrated exceptional performance, dedication and engagement with the unit. This attainment will typically be identified by comments from the client, other team members and/or my observation of the student.

The group-work component of the assessment (Design overview, Design Document, Playtesting document) will be marked in common for all group members, but individual marks will be modulated based on peer assessment feedback, based on performance in the team.

All work submitted should be readable and presented in a business-like and professional format. Late work will not be accepted. As you are working in a team and also are expected to perform risk management, sickness or other misadventure needs to be planned for and managed.
### Grade Assessment Standards

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>Has participated in group-based projects which delivered satisfactory outputs throughout the semester.</td>
</tr>
<tr>
<td>CR</td>
<td>Has participated in group-based projects throughout the semester which delivered quality outputs.</td>
</tr>
<tr>
<td>D</td>
<td>Has participated in group-based projects throughout the semester which consistently delivered high quality outputs. All the assignment, practical and tutorial tasks (programming and written) completed to a very high standard.</td>
</tr>
<tr>
<td>HD</td>
<td>Has participated in group-based projects throughout the semester which consistently delivered high quality outputs. Students achieving this grade are often distinguished by a high level of effort, enthusiasm, competence and often leadership in their project groups.</td>
</tr>
</tbody>
</table>
