Unit description

The purpose of this unit is to equip students with the ability to approach complex business problems from the cross-functional and multidimensional perspective of the general manager. The process of formulating and implementing competitive strategy at the business level requires the systematic analysis of a firm's internal resources and capabilities in conjunction with a structured examination of the various dimensions of its (external) macro and industry environments. Once this is achieved, management can develop appropriate strategies with which to pursue sustainable competitive advantage in domestic and international markets. Students learn how to use several diagnostic models to evaluate a firm's relative strengths and weaknesses, the threats and opportunities in its external environment, and the key issues that influence how the firm should compete. Case analysis is used extensively to link concepts and frameworks to real-world examples. Group work engages students in the challenges of interpersonal communication, task allocation, coordination and control.

Graduate Capabilities

Capable of Professional and Personal Judgement and Initiative

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:

Learning outcomes

- Evaluate the importance of strategic business planning.
- Analyse environmental information for use in strategic plans
- Appraise the different approaches to strategy

Assessment tasks

- Final Examination
- Essay
- Case Study/Report

Learning and teaching activities

- be able to apply concepts in tutorial exercises; respond to questions raised during lectures; demonstrate enthusiasm for the subject and attend all group meetings.

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

- Assess the nature of an industry's strategic issues and the environment in which they are generated

- Evaluate the importance of strategic business planning.
- Analyse environmental information for use in strategic plans
- Review competitive dynamics and rivalry and its impacts on the industry
