Unit description

This unit explores theories of learning in mathematics, science and technology for young children (birth to five years). Students will examine the specialist role of play and conceptual development in a range of early childhood settings. Current issues in research and practice will be investigated through independent study. Students acquire autonomy and expert knowledge of pedagogy and content for mathematics, science and technology as they design and evaluate learning experiences for young children. All enrolment queries should be directed to Open Universities Australia (OUA): see www.open.edu.au

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.open.edu.au/student-admin-and-support/key-dates/>

Learning Outcomes

On successful completion of this unit, you will be able to:

1. Demonstrate a fundamental understanding of the major theoretical developments in early childhood mathematics, science and technology education;

2. Examine the role of play in children's mathematics, science and technology learning;
3. Demonstrate how children use play to represent their experiences, construct knowledge about, and make sense of their world;
4. Evaluate a variety of mathematics, science and technology resources;
5. Engage in the multi-faceted task of early childhood curriculum design with an emphasis on mathematics, science and technology;
6. Locate, analyse and synthesise a wide range of current research literature;
7. Identify problems or issues of relevance to early childhood mathematics, science, and technology education;
8. Identify strategies to successfully link mathematics, science and technology learning to the child's home environment and community.

General Assessment Information

There are three separate assessment tasks for this unit.

Assessment Tasks

Name	Weighting	Due
Technology for learning	35%	5 September 2016
Mathematics and science	35%	7 November 2016
Critical reflections	30%	Weekly

Technology for learning

Due: **5 September 2016**

Weighting: **35%**

Review of technology for learning in mathematics and science

On successful completion you will be able to:

- 1. Demonstrate a fundamental understanding of the major theoretical developments in early childhood mathematics, science and technology education;
- 2. Examine the role of play in children's mathematics, science and technology learning;
- 3. Demonstrate how children use play to represent their experiences, construct knowledge about, and make sense of their world;
- 4. Evaluate a variety of mathematics, science and technology resources;
- 5. Engage in the multi-faceted task of early childhood curriculum design with an emphasis on mathematics, science and technology;

- 6. Locate, analyse and synthesise a wide range of current research literature;
- 7. Identify problems or issues of relevance to early childhood mathematics, science, and technology education;
- 8. Identify strategies to successfully link mathematics, science and technology learning to the child's home environment and community.

Mathematics and science

Due: **7 November 2016**

Weighting: **35%**

Journal article detailing mathematics and science learning experience.

On successful completion you will be able to:

- 1. Demonstrate a fundamental understanding of the major theoretical developments in early childhood mathematics, science and technology education;
- 2. Examine the role of play in children's mathematics, science and technology learning;
- 3. Demonstrate how children use play to represent their experiences, construct knowledge about, and make sense of their world;
- 4. Evaluate a variety of mathematics, science and technology resources;
- 5. Engage in the multi-faceted task of early childhood curriculum design with an emphasis on mathematics, science and technology;
- 6. Locate, analyse and synthesise a wide range of current research literature;
- 7. Identify problems or issues of relevance to early childhood mathematics, science, and technology education;
- 8. Identify strategies to successfully link mathematics, science and technology learning to the child's home environment and community.

Critical reflections

Due: **Weekly**

Weighting: **30%**

Weekly reflective blog posts

On successful completion you will be able to:

- 1. Demonstrate a fundamental understanding of the major theoretical developments in early childhood mathematics, science and technology education;
- 2. Examine the role of play in children's mathematics, science and technology learning;
- 3. Demonstrate how children use play to represent their experiences, construct

knowledge about, and make sense of their world;

- 4. Evaluate a variety of mathematics, science and technology resources;
- 5. Engage in the multi-faceted task of early childhood curriculum design with an emphasis on mathematics, science and technology;
- 6. Locate, analyse and synthesise a wide range of current research literature;
- 7. Identify problems or issues of relevance to early childhood mathematics, science, and technology education;
- 8. Identify strategies to successfully link mathematics, science and technology learning to the child's home environment and community.

Delivery and Resources

All students are required to:

1. Download the topic notes and tutorial activities from iLearn. Topic notes and tutorial activities are available from iLearn, one week prior to each tutorial.
2. Read the set weekly readings *prior* to the seminars each week/ on campus session
3. Respond to the readings, by posting a 300 word reflection each week on the discussion board and
4. Actively participate in online discussions and complete tutorial activities each week.

Policies and Procedures

Late Submission - applies unless otherwise stated elsewhere in the unit guide

Unless a Special Consideration request has been submitted and approved, (a) a penalty for lateness will apply – two (2) marks out of 100 will be deducted per day for assignments submitted after the due date – and (b) no assignment will be accepted more than seven (7) days (incl. weekends) after the original submission deadline. No late submissions will be accepted for timed assessments – e.g. quizzes, online tests.

Extension Request

Special Consideration Policy and Procedure
(<https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policies/special-consideration>)

The University recognises that students may experience events or conditions that adversely affect their academic performance. If you experience serious and unavoidable difficulties at exam time or when assessment tasks are due, you can consider applying

for Special Consideration.

You need to show that the circumstances:

1. were serious, unexpected and unavoidable
2. were beyond your control
3. caused substantial disruption to your academic work
4. substantially interfered with your otherwise satisfactory fulfilment of the unit requirements
5. lasted at least three consecutive days or a total of 5 days within the teaching period and prevented completion of an assessment task scheduled for a specific date.

If you feel that your studies have been impacted submit an application as follows:

1. Visit [Ask MQ](#) and use your OneID to log in
2. Fill in your relevant details
3. Attach supporting documents by clicking 'Add a reply', click 'Browse' and navigating to the files you want to attach, then click 'Submit Form' to send your notification and supporting documents
4. Please keep copies of your original documents, as they may be requested in the future as part of the assessment process

Outcome

Once your submission is assessed, an appropriate outcome will be organised.

OUA Specific Policies and Procedures

Withdrawal from a unit after the census date

You can withdraw from your subjects prior to [the census date](#) (last day to withdraw). If you successfully withdraw before the census date, you won't need to apply for Special Circumstances. If you find yourself unable to withdraw from your subjects before the census date - you might be able to [apply for Special Circumstances](#). If you're eligible, we can refund your fees and overturn your fail grade.

If you're studying Single Subjects using FEE-HELP or paying up front, you can [apply online](#).

If you're studying a degree using HECS-HELP, you'll need to [apply directly to Macquarie University](#).

Macquarie University policies and procedures are accessible from [Policy Central](#). Students should be aware of the following policies in particular with regard to Learning and Teaching:

Academic Honesty Policy http://mq.edu.au/policy/docs/academic_honesty/policy.html

New Assessment Policy in effect from Session 2 2016 http://mq.edu.au/policy/docs/assessment/policy_2016.html. For more information visit http://students.mq.edu.au/events/2016/07/19/new_assessment_policy_in_place_from_session_2/

Assessment Policy prior to Session 2 2016 <http://mq.edu.au/policy/docs/assessment/policy.html>

Grading Policy prior to Session 2 2016 <http://mq.edu.au/policy/docs/grading/policy.html>

Grade Appeal Policy <http://mq.edu.au/policy/docs/gradeappeal/policy.html>

Complaint Management Procedure for Students and Members of the Public http://www.mq.edu.au/policy/docs/complaint_management/procedure.html

Disruption to Studies Policy http://www.mq.edu.au/policy/docs/disruption_studies/policy.html *The Disruption to Studies Policy is effective from March 3 2014 and replaces the Special Consideration Policy.*

In addition, a number of other policies can be found in the [Learning and Teaching Category](#) of Policy Central.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/support/student_conduct/

Results

Results shown in *iLearn*, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](#). For more information visit ask.mq.edu.au.

Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- [Workshops](#)
- [StudyWise](#)
- [Academic Integrity Module for Students](#)
- [Ask a Learning Adviser](#)

Student Services and Support

Students with a disability are encouraged to contact the [Disability Service](#) who can provide appropriate help with any issues that arise during their studies.

Student Enquiries

For all student enquiries, visit Student Connect at ask.mq.edu.au

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

PG - Capable of Professional and Personal Judgment and Initiative

Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

Learning outcomes

- 5. Engage in the multi-faceted task of early childhood curriculum design with an emphasis on mathematics, science and technology;
- 8. Identify strategies to successfully link mathematics, science and technology learning to the child's home environment and community.

Assessment tasks

- Technology for learning
- Critical reflections

PG - Discipline Knowledge and Skills

Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

Learning outcomes

- 1. Demonstrate a fundamental understanding of the major theoretical developments in early childhood mathematics, science and technology education;
- 2. Examine the role of play in children's mathematics, science and technology learning;
- 3. Demonstrate how children use play to represent their experiences, construct

knowledge about, and make sense of their world;

- 4. Evaluate a variety of mathematics, science and technology resources;
- 5. Engage in the multi-faceted task of early childhood curriculum design with an emphasis on mathematics, science and technology;
- 7. Identify problems or issues of relevance to early childhood mathematics, science, and technology education;
- 8. Identify strategies to successfully link mathematics, science and technology learning to the child's home environment and community.

Assessment tasks

- Technology for learning
- Mathematics and science
- Critical reflections

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes

- 1. Demonstrate a fundamental understanding of the major theoretical developments in early childhood mathematics, science and technology education;
- 2. Examine the role of play in children's mathematics, science and technology learning;
- 4. Evaluate a variety of mathematics, science and technology resources;
- 6. Locate, analyse and synthesise a wide range of current research literature;
- 7. Identify problems or issues of relevance to early childhood mathematics, science, and technology education;
- 8. Identify strategies to successfully link mathematics, science and technology learning to the child's home environment and community.

Assessment tasks

- Technology for learning
- Mathematics and science
- Critical reflections

PG - Research and Problem Solving Capability

Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

Learning outcomes

- 1. Demonstrate a fundamental understanding of the major theoretical developments in early childhood mathematics, science and technology education;
- 5. Engage in the multi-faceted task of early childhood curriculum design with an emphasis on mathematics, science and technology;
- 6. Locate, analyse and synthesise a wide range of current research literature;
- 7. Identify problems or issues of relevance to early childhood mathematics, science, and technology education;
- 8. Identify strategies to successfully link mathematics, science and technology learning to the child's home environment and community.

Assessment tasks

- Technology for learning
- Mathematics and science

PG - Effective Communication

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.

This graduate capability is supported by:

Learning outcomes

- 3. Demonstrate how children use play to represent their experiences, construct knowledge about, and make sense of their world;
- 6. Locate, analyse and synthesise a wide range of current research literature;

Assessment tasks

- Mathematics and science
- Critical reflections

PG - Engaged and Responsible, Active and Ethical Citizens

Our postgraduates will be ethically aware and capable of confident transformative action in relation to their professional responsibilities and the wider community. They will have a sense of connectedness with others and country and have a sense of mutual obligation. They will be able to appreciate the impact of their professional roles for social justice and inclusion related to national and global issues

This graduate capability is supported by:

Learning outcomes

- 4. Evaluate a variety of mathematics, science and technology resources;
- 5. Engage in the multi-faceted task of early childhood curriculum design with an emphasis on mathematics, science and technology;
- 7. Identify problems or issues of relevance to early childhood mathematics, science, and technology education;
- 8. Identify strategies to successfully link mathematics, science and technology learning to the child's home environment and community.

Assessment task

- Critical reflections
