Unit description

International Commercial Law examines contract law as it applies in an international context, addressing in particular concepts of the international sale of goods; contracts of sale under the Vienna Sales Convention; contracts for carriage of goods by sea, air and land; and bills of exchange and letters of credit in international trade. These studies incorporate analyses of different legal systems and relevant national jurisdictions, as well as key economic theories and political contexts underpinning the operation of this body of law. International commercial arbitration is highlighted as the key mode of dispute settlement.
