Unit description

Communication is central to the functioning of human society, forming the basis of how 'things get done'. This includes how our social institutions and service delivery therein are managed through both spoken and written communication. In this unit, we introduce a range of analytical tools and techniques to look at communication in social institutions and professional practice. Starting with some basic principles in linguistics, we examine language and communication from a sociolinguistic and applied linguistic approach, covering a range of communication activities across several social institutions, including the classroom, the clinical interaction, and the courtroom.

Materials and resources required to study this unit will be available to students via ilearn. Students will attend a weekly 2 hour on campus workshop in which they will discuss and put into practice their leanings for that week as well as the theory and concepts that underpin LING289.

There is no set textbook for this unit. Readings will be provided via ilearn or available through the library e-reserve.
