## General Information

**Unit convenor and teaching staff**

**Unit Convenor, Lecturer**  
Abhaya Nayak  
[abhaya.nayak@mq.edu.au](mailto:abhaya.nayak@mq.edu.au)  
Contact via Email  
E6A382  
Wednesday 13:00 - 14:00

**Lecturer**  
Yan Wang  
[yan.wang@mq.edu.au](mailto:yan.wang@mq.edu.au)  
Contact via Email  
E6A 339

**Lecturer**  
Akther Shermin  
[akther.shermin@mq.edu.au](mailto:akther.shermin@mq.edu.au)  
Contact via Email

**Tutor**  
Mohammad Huq  
Contact via Email

**Tutor**  
Hedieh Ranjbartabar  
[hedieh.ranjbartabar@mq.edu.au](mailto:hedieh.ranjbartabar@mq.edu.au)  
Contact via Email

**Tutor**  
Charles Liu  
[charles.liu@mq.edu.au](mailto:charles.liu@mq.edu.au)  
Contact via Email

**Credit points**  
3

**Prerequisites**  
ISYS114

**Corequisites**
### Learning Outcomes

1. Demonstrate understanding of the basic concepts that underlie modern database management systems.
2. Design and develop small, functional database applications using modern database design methods.
3. Develop skills in using an industrial-strength database tools and interactive development environments for building databases.
4. Complete different database programming tasks to specification using SQL.

### General Assessment Information

#### Assessment Tasks Submission/Completion Process

The assessments of this unit consist of two online tests, two assignments and a final exam. You will complete the two tests on iLearn. The solutions to the two assignments should be submitted via iLearn by the due date. The final examination is a closed book examination, and will be taken in person on the appropriate date. Note that students who are approved to sit a **Supplementary Exam** will be required to take it in the week of **December 11 – 15**.

#### Late Submission Policy

Late assignments (not tests) will be accepted up to 48 hours after the submission deadline. There will be a deduction of 20% of the total available marks made from the total awarded mark for each 24 hour period or part thereof that the submission is late (for example, 25 hours late in submission – 40% penalty). This penalty does not apply for cases in which an application for special consideration is made and approved. In such cases a compensating mechanism will be decided on a case by case basis.
Assessment Standards

ISYS224 will be assessed and graded according to the University assessment and grading policies.

The following general standards of achievement will be used to assess each of the assessment tasks with respect to the letter grades.

Pass: Can demonstrate a broad knowledge of database concepts but with limited understanding. Can design and develop functional database with documentation. Is familiar with tools and interactive development environments, and comfortable with database programming.

Credit/Distinction: As for Pass plus: Exhibits breadth and depth of understanding of concepts. Can demonstrate critical analysis skills in fundamental database concepts. Able to design and develop functional and highly maintainable database, with documentation. Very familiar with tools and interactive development environments with good ability to solve database problems. Very familiar with database programming and quite able to implement solutions to database problems.

High Distinction: As for Credit/Distinction plus: Is aware of the context in which the concepts are developed and their limitations. Has demonstrated critical analysis skills in fundamental database concepts who also has exceptional analytical and critical thinking capability. Able to design and develop functional and highly maintainable database, with documentation and familiarity with tools and interactive development environments, and has exceptional ability to solve challenging database problems. Very familiar with tools and interactive development environments, and has exceptional ability to solve challenging database problems. Has exceptional database programming skills and able to implement maintainable solutions to challenging database problems.

Assessment Process

These assessment standards will be used to give a numeric mark to each assessment submission during marking. The mark will correspond to an appropriate letter grade when relevantly weighted. The final mark for the unit will be calculated by combining the marks for all assessment tasks according to the percentage weightings shown in the assessment summary.

Assessment Tasks

<table>
<thead>
<tr>
<th>Name</th>
<th>Weighting</th>
<th>Hurdle</th>
<th>Due</th>
</tr>
</thead>
<tbody>
<tr>
<td>Test 1</td>
<td>5%</td>
<td>No</td>
<td>Week 4</td>
</tr>
<tr>
<td>Assignment 1</td>
<td>20%</td>
<td>No</td>
<td>Week 7</td>
</tr>
<tr>
<td>Test 2</td>
<td>5%</td>
<td>No</td>
<td>Week 10</td>
</tr>
<tr>
<td>Assignment 2</td>
<td>20%</td>
<td>No</td>
<td>Week 12</td>
</tr>
<tr>
<td>Final Examination</td>
<td>50%</td>
<td>No</td>
<td>TBA</td>
</tr>
</tbody>
</table>
Test 1
Due: Week 4
Weighting: 5%
The focus of this test will be on database modeling.

This Assessment Task relates to the following Learning Outcomes:
• Demonstrate understanding of the basic concepts that underlie modern database management systems.

Assignment 1
Due: Week 7
Weighting: 20%
Assignment 1 will focus on logical design and implementation of databases

This Assessment Task relates to the following Learning Outcomes:
• Demonstrate understanding of the basic concepts that underlie modern database management systems.
• Design and develop small, functional database applications using modern database design methods.
• Develop skills in using a industrial-strength database tools and interactive development environments for building databases.
• Complete different database programming tasks to specification using SQL.

Test 2
Due: Week 10
Weighting: 5%
The focus of this test will be on database programming.

This Assessment Task relates to the following Learning Outcomes:
• Demonstrate understanding of the basic concepts that underlie modern database management systems.
• Complete different database programming tasks to specification using SQL.

Assignment 2
Due: Week 12
Weighting: 20%
Assignment 2 will assess certain fundamental aspects of database systems including database programming.

This Assessment Task relates to the following Learning Outcomes:
- Demonstrate understanding of the basic concepts that underlie modern database management systems.
- Design and develop small, functional database applications using modern database design methods.
- Develop skills in using a industrial-strength database tools and interactive development environments for building databases.
- Complete different database programming tasks to specification using SQL.

Final Examination

Due: TBA
Weighting: 50%

The final examination will assess students' understanding of the fundamental concepts behind database management systems, and their skills in database programming and development.

This Assessment Task relates to the following Learning Outcomes:
- Demonstrate understanding of the basic concepts that underlie modern database management systems.
- Design and develop small, functional database applications using modern database design methods.
- Complete different database programming tasks to specification using SQL.

Delivery and Resources

Classes

Each week you should attend three hours of lectures, a tutorial class and a practical session. For details of days, times and rooms consult the timetables webpage. Students are urged to actively participate in the tutorials; this helps enhancing the understanding by students.

Note that practicals and tutorials commence in week 2. You should have selected a practical session and a tutorial session during enrolment. You should attend the sessions you are enrolled in.

Required and Recommended Texts and/or Materials

Textbook

http://unitguides.mq.edu.au/unit_offerings/72564/unit_guide/print
The textbook listed below cover much of the required material that will be used in preparation of lectures and/or assignments and/or practicals.

For some parts of learning, other necessary material will be made available on the ISYS224 iLearn site.

**Unit Webpage and Technology Used and Required**

Digital recordings of lectures are available from echo360 at iLearn. Read these instructions for details.

**Websites**

The web page for this unit can be found at [http://ilearn.mq.edu.au](http://ilearn.mq.edu.au)

**Technology**

In this unit you will be exposed to the following technology and tools

- MySQL - Database Management System
- MySQL Workbench - Data Modeling Software Tool

**Discussion Boards**

The unit will make use of discussion boards hosted within iLearn. Please post questions there, they will be monitored by the staff on the unit regularly.

**Unit Schedule**

<table>
<thead>
<tr>
<th>Week</th>
<th>Topic</th>
<th>Reading</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Introduction to Databases: Relational model</td>
<td>Connolly &amp; Begg, Chapters 1,2,4 + Class Notes</td>
</tr>
<tr>
<td>2</td>
<td>Database modeling (ER modeling, EER modeling)</td>
<td>Connolly &amp; Begg, Chapters 12-13</td>
</tr>
<tr>
<td>3</td>
<td>Conceptual &amp; Logical Database design</td>
<td>Connolly &amp; Begg, Chapters 16-17</td>
</tr>
<tr>
<td>4-6</td>
<td>Data Manipulation and Database Normalisation</td>
<td>Connolly &amp; Begg, Chapters 6, 14-15</td>
</tr>
<tr>
<td>7</td>
<td>Relational Algebra</td>
<td>Connolly &amp; Begg, Chapter 5</td>
</tr>
</tbody>
</table>
Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

**Results**

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au/
Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

**Learning Skills**
Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

**Student Enquiry Service**
For all student enquiries, visit Student Connect at ask.mq.edu.au

**Equity Support**
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

**IT Help**
For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

**Graduate Capabilities**

**Discipline Specific Knowledge and Skills**
Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

**Learning outcomes**

- Demonstrate understanding of the basic concepts that underlie modern database
management systems.

- Design and develop small, functional database applications using modern database design methods.
- Develop skills in using a industrial-strength database tools and interactive development environments for building databases.
- Complete different database programming tasks to specification using SQL.

**Assessment tasks**

- Test 1
- Assignment 1
- Test 2
- Assignment 2
- Final Examination

**Problem Solving and Research Capability**

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

**Learning outcomes**

- Demonstrate understanding of the basic concepts that underlie modern database management systems.
- Design and develop small, functional database applications using modern database design methods.
- Complete different database programming tasks to specification using SQL.

**Assessment tasks**

- Test 1
- Assignment 1
- Test 2
- Assignment 2
- Final Examination

**Creative and Innovative**

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We
want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

Assessment tasks

- Assignment 2
- Final Examination

Effective Communication

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

Learning outcomes

- Demonstrate understanding of the basic concepts that underlie modern database management systems.
- Design and develop small, functional database applications using modern database design methods.

Assessment tasks

- Assignment 1
- Assignment 2
- Final Examination

Capable of Professional and Personal Judgement and Initiative

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:

Learning outcomes

- Demonstrate understanding of the basic concepts that underlie modern database management systems.
- Design and develop small, functional database applications using modern database design methods.
- Develop skills in using a industrial-strength database tools and interactive development
environments for building databases.
• Complete different database programming tasks to specification using SQL.

Assessment tasks
• Assignment 1
• Assignment 2
• Final Examination

Critical, Analytical and Integrative Thinking
We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

Learning outcomes
• Demonstrate understanding of the basic concepts that underlie modern database management systems.
• Design and develop small, functional database applications using modern database design methods.

Assessment tasks
• Test 1
• Assignment 1
• Test 2
• Assignment 2
• Final Examination

Commitment to Continuous Learning
Our graduates will have enquiring minds and a literate curiosity which will lead them to pursue knowledge for its own sake. They will continue to pursue learning in their careers and as they participate in the world. They will be capable of reflecting on their experiences and relationships with others and the environment, learning from them, and growing - personally, professionally and socially.

This graduate capability is supported by:

Assessment tasks
• Assignment 2
• Final Examination
Changes from Previous Offering

In earlier offerings of ISYS224, Oracle was used as the Database Management Systems, and PowerDesigner as the modelling too. In this offering MySQL and MySQL Workbench will be used in response to changing circumstances. The diagnostic test (10% in 2016) has been replaced by two online tests distributed across the two halves of the semester.
