Unit description
The study of public policy has traditionally been focused on the nation-state, and policy-making activities at the domestic level. With the growing recognition of the impact and extent of globalisation, policy scholars are increasingly concerned about the apparently diminishing capacity of the nation-state to determine its own policy directions. This unit reflects critically on this debate around globalisation and the state, and explores the impact of international institutions, interests and ideas on domestic policy-making. The unit examines direct and indirect, coercive and voluntary mechanisms of policy transfer and policy diffusion, and intergovernmental cooperation and coordination.
