Unit description

Religion has been an important feature of human life throughout history and it continues to shape human affairs across the planet today. All religions posit the existence of some divine force, and the major monotheistic religions - Judaism, Christianity and Islam - take this divinity to be a single all-powerful God. But what kind of justification can be given for belief in the existence of God, so conceived? Does science support or undermine belief in God? Or have science and religion got nothing to do with each other? Can religious belief be justified on practical grounds? Might religion provide a basis for morality and spiritual fulfilment that secular or non-religious people lack? Or are there secular sources of meaning available in the modern world that could make religion redundant? Is there a link between religion and violence? Should religion be viewed as an antidote to violent conflict or a cause of it? What place should there be for religion in the political sphere? The unit does not presuppose any religious commitment or particular religious perspective, just a willingness to explore these questions, and others like them, in an open-minded and rigorous way.
