Unit description

Global health recognizes a holistic understanding of health that transcends borders and encompasses the links and transnational movements of people, materials and ideas. This class offers a framework for understanding the complex ways health and disease intersect within a range of global contexts, institutions and practices. In order to affect change at the individual, community and global levels, we need to appreciate how human biology and health are shaped by the larger contexts in which they are embedded and the dynamic and uneven circulation of resources, technology, culture, values and people. In this class, we will examine the role of social, political-economic and environmental forces that shape patterns and the distribution of disease and health across communities and take a critical perspective when examining the underlying value systems in biomedical science, policy, health interventions, and global health practice. Particular topics include health determinants, measurements and trends; key actors in global health efforts; women's and children's health; communicable and non-communicable diseases; global mental health; nutrition; pharmaceuticals; disasters and humanitarian emergencies; science, technology and global health; and, health system design and evaluation.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

Synthesize the common anthropological, epidemiological, historical, policy, and political-economic approaches to major global health problems.

Discuss and evaluate the major issues confronting global health, including their trends, determinants, and effect on individuals and populations

Describe the global burden of disease, emerging global health problems, the causes and control of epidemics, and communicable and non-communicable diseases at the global level

Identify the role of poverty, inequality, and structural violence in global health contexts and how health can be distributed unequally within and between populations

Describe the particular health needs of vulnerable populations

Identify and evaluate the complex role and impact of policy, global institutions, non-governmental organizations, and major funders in global health

Assessment Tasks

Name	Weighting	Hurdle	Due
<u>Participation & Facilitation</u>	25%	No	Weekly
<u>Presentation</u>	10%	No	Weeks 6 and 7
<u>Essay Exam 1</u>	20%	No	Week 8
<u>Final Paper</u>	45%	No	14 Nov

Participation & Facilitation

Due: **Weekly**

Weighting: **25%**

Seminar attendance and participation are mandatory. Assessment includes summary of required readings for each week

On successful completion you will be able to:

- Synthesize the common anthropological, epidemiological, historical, policy, and political-economic approaches to major global health problems.
- Discuss and evaluate the major issues confronting global health, including their trends, determinants, and effect on individuals and populations

- Describe the global burden of disease, emerging global health problems, the causes and control of epidemics, and communicable and non-communicable diseases at the global level
- Identify the role of poverty, inequality, and structural violence in global health contexts and how health can be distributed unequally within and between populations
- Describe the particular health needs of vulnerable populations
- Identify and evaluate the complex role and impact of policy, global institutions, non-governmental organizations, and major funders in global health

Presentation

Due: **Weeks 6 and 7**

Weighting: **10%**

Students will work in teams to present on history, geography, epidemiology and socio-behavioural characteristics of a particular health challenge facing global health.

On successful completion you will be able to:

- Synthesize the common anthropological, epidemiological, historical, policy, and political-economic approaches to major global health problems.
- Discuss and evaluate the major issues confronting global health, including their trends, determinants, and effect on individuals and populations
- Identify the role of poverty, inequality, and structural violence in global health contexts and how health can be distributed unequally within and between populations

Essay Exam 1

Due: **Week 8**

Weighting: **20%**

A take-home essay exam with pre-set questions that cover the key concepts from first half of the semester.

On successful completion you will be able to:

- Synthesize the common anthropological, epidemiological, historical, policy, and political-economic approaches to major global health problems.
- Discuss and evaluate the major issues confronting global health, including their trends, determinants, and effect on individuals and populations
- Describe the global burden of disease, emerging global health problems, the causes and control of epidemics, and communicable and non-communicable diseases at the global level

- Identify the role of poverty, inequality, and structural violence in global health contexts and how health can be distributed unequally within and between populations
- Identify and evaluate the complex role and impact of policy, global institutions, non-governmental organizations, and major funders in global health

Final Paper

Due: **14 Nov**

Weighting: **45%**

A final paper on a topic to be chosen by student in consultation with convenor .

On successful completion you will be able to:

- Discuss and evaluate the major issues confronting global health, including their trends, determinants, and effect on individuals and populations
- Describe the global burden of disease, emerging global health problems, the causes and control of epidemics, and communicable and non-communicable diseases at the global level
- Identify the role of poverty, inequality, and structural violence in global health contexts and how health can be distributed unequally within and between populations
- Describe the particular health needs of vulnerable populations

Delivery and Resources

Seminar based discussion

Unit Schedule

Week	Date	Seminar	Assessment
1	1 Aug	Introduction. what is global health: disease burden, equity, global solutions, theoretical approaches	
2	8 Aug	Health Transitions, New infectious diseases, Structural Violence and measuring Burdens of Disease	
3	15 Aug	Global health and its links to colonial health (pathologisation of developing world)	
4	22 Aug	Biopower - medicalisation of perversity and its legacy in HIV programs	
5	29 Aug	Epidemiological risk categories in practice in HIV programs – CSW and MSM	
6	5 Sept	Student presentations Ebola, TB,	
7	12 Sept	Student presentations NTDs, NCDs	

Semester Break: 18 September-27 September			
8	3 Oct	Consultation week	
9	10 Oct	Market rules: a) politics of drug access and b) commodification of intimacy	
10	17 Oct	Maternal and Infant Health	
11	24 Oct	Global Mental Health and the Challenges of Mental Illness	
12	31 Oct	Malaria, health security and community engagement	
13	7 Nov	Health migration and human rights	

Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](#). Students should be aware of the following policies in particular with regard to Learning and Teaching:

Academic Honesty Policy http://mq.edu.au/policy/docs/academic_honesty/policy.html

Assessment Policy http://mq.edu.au/policy/docs/assessment/policy_2016.html

Grade Appeal Policy <http://mq.edu.au/policy/docs/gradeappeal/policy.html>

Complaint Management Procedure for Students and Members of the Public http://www.mq.edu.au/policy/docs/complaint_management/procedure.html

Disruption to Studies Policy (in effect until Dec 4th, 2017): http://www.mq.edu.au/policy/docs/disruption_studies/policy.html

Special Consideration Policy (in effect from Dec 4th, 2017): <https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policies/special-consideration>

In addition, a number of other policies can be found in the [Learning and Teaching Category](#) of Policy Central.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/support/student_conduct/

Results

Results shown in *iLearn*, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](#). For more information visit [ask.m](#)

mq.edu.au.

Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- [Workshops](#)
- [StudyWise](#)
- [Academic Integrity Module for Students](#)
- [Ask a Learning Adviser](#)

Student Services and Support

Students with a disability are encouraged to contact the [Disability Service](#) who can provide appropriate help with any issues that arise during their studies.

Student Enquiries

For all student enquiries, visit Student Connect at ask.mq.edu.au

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

PG - Capable of Professional and Personal Judgment and Initiative

Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

Learning outcome

- Identify the role of poverty, inequality, and structural violence in global health contexts and how health can be distributed unequally within and between populations

Assessment tasks

- Participation & Facilitation
- Final Paper

PG - Discipline Knowledge and Skills

Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

Learning outcomes

- Synthesize the common anthropological, epidemiological, historical, policy, and political-economic approaches to major global health problems.
- Discuss and evaluate the major issues confronting global health, including their trends, determinants, and effect on individuals and populations
- Describe the global burden of disease, emerging global health problems, the causes and control of epidemics, and communicable and non-communicable diseases at the global level
- Identify the role of poverty, inequality, and structural violence in global health contexts and how health can be distributed unequally within and between populations
- Describe the particular health needs of vulnerable populations
- Identify and evaluate the complex role and impact of policy, global institutions, non-governmental organizations, and major funders in global health

Assessment tasks

- Participation & Facilitation
- Presentation
- Essay Exam 1
- Final Paper

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes

- Discuss and evaluate the major issues confronting global health, including their trends, determinants, and effect on individuals and populations
- Describe the global burden of disease, emerging global health problems, the causes and control of epidemics, and communicable and non-communicable diseases at the global level
- Identify the role of poverty, inequality, and structural violence in global health contexts and how health can be distributed unequally within and between populations
- Identify and evaluate the complex role and impact of policy, global institutions, non-governmental organizations, and major funders in global health

Assessment tasks

- Participation & Facilitation
- Presentation
- Essay Exam 1
- Final Paper

PG - Research and Problem Solving Capability

Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

Learning outcomes

- Discuss and evaluate the major issues confronting global health, including their trends, determinants, and effect on individuals and populations
- Describe the global burden of disease, emerging global health problems, the causes and control of epidemics, and communicable and non-communicable diseases at the global level
- Identify the role of poverty, inequality, and structural violence in global health contexts and how health can be distributed unequally within and between populations
- Identify and evaluate the complex role and impact of policy, global institutions, non-governmental organizations, and major funders in global health

Assessment tasks

- Presentation

- Essay Exam 1
- Final Paper

PG - Effective Communication

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.

This graduate capability is supported by:

Learning outcomes

- Describe the global burden of disease, emerging global health problems, the causes and control of epidemics, and communicable and non-communicable diseases at the global level
- Identify and evaluate the complex role and impact of policy, global institutions, non-governmental organizations, and major funders in global health

Assessment tasks

- Participation & Facilitation
- Final Paper

PG - Engaged and Responsible, Active and Ethical Citizens

Our postgraduates will be ethically aware and capable of confident transformative action in relation to their professional responsibilities and the wider community. They will have a sense of connectedness with others and country and have a sense of mutual obligation. They will be able to appreciate the impact of their professional roles for social justice and inclusion related to national and global issues

This graduate capability is supported by:

Learning outcomes

- Discuss and evaluate the major issues confronting global health, including their trends, determinants, and effect on individuals and populations
- Describe the global burden of disease, emerging global health problems, the causes and control of epidemics, and communicable and non-communicable diseases at the global level
- Identify the role of poverty, inequality, and structural violence in global health contexts and how health can be distributed unequally within and between populations
- Describe the particular health needs of vulnerable populations
- Identify and evaluate the complex role and impact of policy, global institutions,

non-governmental organizations, and major funders in global health

Assessment tasks

- Participation & Facilitation
- Presentation
- Essay Exam 1
- Final Paper
