Unit description

To succeed in a globalised business environment, it is imperative for managers to understand contemporary approaches to leading and managing in culturally diverse environments and explore strategies and tactics for managing international assignments and teams. Core objectives of this unit are to enhance multicultural competence and skills and impart an understanding of how cultural diversity affects managerial behaviour and processes which is highly valued by future employers. The unit utilises a range of assessments such as simulations, experiential exercises, forums, reflective tasks, case studies, presentations and group activities in order to synthesise students' understanding of cross-cultural theories and their ability to apply their learning.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Brief description :

THE EU CULTURE

Britain may be in the front line of the Euro crisis, but it is not the only country affected. The Eurozone is a massive market for businesses from the United States, China, India, Japan, Russia and the other major world economic powers. China has considered lending money to Europe, they are that concerned that the Euro may collapse. Meanwhile, the International Monetary Fund (IMF), which was set up to help countries in economic difficulty, set aside hundreds of billions of dollars for a bailout of some of the Eurozone countries. The wider world is so keen to see the Euro survive — even if that means it has fewer members — for the following reasons.

To preserve the Eurozone's massive consumer market. A staggering 322 million Europeans use the Euro every day. It's the currency of seventeen nations. Besides daily activities, these people use the Euro to buy goods and services from overseas — if there was a collapse in its value, then they would be less able to buy imports.

To prevent a global recession. A collapse of the Euro or a situation where some European governments would be unable to repay their debt would have a huge, negative impact on the world economy. It would resemble the financial crisis of 2007 and 2008 (in truth, it could be much worse than that). At the very least, businesses around the globe would think twice about investing and taking on new staff while others might start to trim their operations and cut jobs. A global economic recession would be highly likely.

To protect the world financial system. Banks around the globe have invested in the government debt of Eurozone countries. These banks also hold large amounts of Euros. If the current crisis gets much worse, then the government debt and currency that they hold will fall in value, which could undermine their own financial well being. It could be like the 2007 and 2008 financial crash all over again, with the global banking system under threat. This would be bad news for everyone.

It's not just the 322 million people in the Eurozone which depend on their currency — there are 150 million people in African countries whose currencies are pegged to value the Euro. If the Eurozone fragments and the value of the Euro collapses, these African countries will see the value of currency collapse too.

Against a backdrop of this ongoing Euro zone volatility, companies are continuing to review their exposures in Europe, including the nature and extent of their Euro-related contracts, and are asking what measures they can put in place to protect their assets and limit cash flow threats. This uncertainty has affected business confidence in different ways in nations across the world.

YOUR TASK: You are a **consultant** tasked with a submission for developing a comprehensive analysis of the impact of the Euro crisis on "THE WORLD" in general and "AUSTRALIAN

BUSINESS" in particular to assist them with their strategy in the Euro zone. Whilst doing this your focus will be on the "CULTURE" of the European country you select and you will analyse the situation based on the cultural dimensions and cultural theories that you study in class. Your report should encompass all risks: Political, Cultural, Social, Legal, Economic and provide advice on their impact to Australia business operating in EU. Please note you can select any country of your choice in the EU. In particular you are required to critique, analyse and assess the following four issues with CULTURE as a basis:

- i. Global impact of Euro crisis on businesses and industries in EU, Australia and the World.

Learning and Teaching Activities

Learning and Teaching Activities

Learning and Teaching Activities This unit will be taught via the participant-centered and experiential learning method of teaching. “Experiential learning takes place when a person is involved in an activity, then looks back and evaluates it, determines what was useful or important to remember and uses this information to perform another activity” (John Dewey, 1938). Face-to-face lectures would comprise of seminars of three hours' duration. Students will partake in lectures, discussions, cases, video cases and experiential exercises in class. Students are advised to attend all lectures and participate in case discussions, missing classes and not participating in case discussions will affect grades. Case studies will be the extensively used. Case analyses are intended to be analytical critiques on some central issues of the case being discussed. As this is a discussion-oriented class, students will read all of the case studies indicated on the course schedule and come prepared to discuss and defend themselves in the tutorials. Every student is expected to participate. In your case analyses, please refrain from writing a summary of the case or repackaging the information already provided in the case. Based on the information provided in the case, be analytically judgemental, propose alternative managerial views and action plans, and discuss the relevance and appropriateness of the frameworks proposed in the readings and lectures to the case. In short, write what you think of the situation in the case and not merely repeat what the author says. The course teaches several models for cultural analysis of case studies. Some examples are: Hofstede, Trompenaars, and Edward Hall. These models are to be used for group case study assignments and research paper. This unit is presented through the following learning media: Thirteen weekly classroom

lectures combined with small group discussions, case studies, in lecture experiential exercise and videos. Students must attend at least 80% of the classes (lectures). Lectures are supported online on iLearn: <http://ilearn.mq.edu.au> Lecture notes, assignment details, assessment methods, case studies, reading and reference materials and a sample exam paper are posted on iLearn. Recommended readings can be found on eReserve. Every week one student group will discuss, analyse and present a relevant case study in the tutorial. Each group only presents once. All students will upload their case analysis and Individual report on turn it in . The Individual report is due on the 30th of May, 2017 before 5pm via turnitin. This report carries a weight-age of 20 marks. A further 10% is reserved for participation in case discussions and experiential exercises in class. The total assessment weightage is 60% and the final exam is weighed 40%. Timetables Portal: <http://timetables.mq.edu.au> Students need to complete and submit all assignments and attempt the final exam to complete the unit satisfactorily.
