Unit description

Macquarie is the international home of big history, and this is its flagship unit. While most history units look in detail at a particular country, theme or period, this unit surveys history on the biggest possible scale. It begins with the origins of the Universe and goes on to tell a series of linked stories about the origins of the stars and planets; the earth and its inhabitants; human beings; various types of human societies; and global interactions to the present day. Students in the unit explore the changing interactions between people, and people and the environment. In so doing, they are encouraged to think about the kinds of evidence available to historians and the role that history can play in understanding the local and global communities that people belong to today. In the final week we will ask what this large story may have to tell us about the future. Finally, the unit invites students to think about what they regard as the central themes of world histories and big history. No prior knowledge of science or history is required

Students are also required to do a small amount of research in preparation for each short answer. Weekly short answers are uploaded to the 'Workshop' tool in iLearn and are peer-reviewed. Each student will review one short answer per submission. At the end of semester, students submit their two best short answer pieces in a portfolio, based on feedback from the peer-review process. Students must also complete a small self-assessment task concurrently with this assessment task.
