Thursday 9-10am

Credit points

3

Prerequisites

39cp at 100 level or above including COMP257

Corequisites

ISYS358

Co-badged status

Unit description

Even simple tasks like counting elements can seem impossible when the amount of data to process is huge. This unit explores some of the key aspects related to processing and mining information from large volumes of data. We present technology commonly used in industry such as map-reduce, and show how a range of data processing methods can be realised using map-reduce. Especial emphasis will be placed in the adaptation of data mining techniques for large volumes of data and for data streaming.

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

## Learning Outcomes

On successful completion of this unit, you will be able to:

Explain the key Big Data concepts and techniques.

Apply Map-reduce techniques to a number of problems that involve Big Data.

Apply Big Data techniques to data mining.

Apply techniques for storing large volumes of data.

## General Assessment Information

All assignments will be submitted using iLearn. The results of all assignments will be available via iLearn.

Late submission to the assignments will be penalised with the following deductions:

- **Assignment 1:** 1 mark per day late.
- **Assignment 2:** 4 marks per day late.
- **Assignment 3:** 3 marks per day late.

The final exam is a **hurdle assessment**. This means that:

- If the exam mark is between 24 and 30 (out of a maximum of 60), you will be given a second opportunity to sit at the exam.
- If the final exam mark is less than 30 out of 60 (after the second opportunity if given), you will fail the unit.

The final mark of the unit will be obtained by summing the marks of all the assessment tasks for a total mark of 100. In order to pass the unit:

- The sum of all assessed tasks must be at least 50.
- The final mark of the exam must be at least 30 out of 60.

## Assessment Tasks

Name	Weighting	Hurdle	Due
<a href="#">Assignment 1</a>	5%	No	Week 3
<a href="#">Assignment 2</a>	20%	No	Week 8
<a href="#">Assignment 3</a>	15%	No	Week 12
<a href="#">Final Exam</a>	60%	Yes	Examination period

### Assignment 1

Due: **Week 3**

Weighting: **5%**

In this assignment you will acquire hands-on experience in designing, implementing and

querying a NoSQL database, i.e. MongoDB.

On successful completion you will be able to:

- Apply techniques for storing large volumes of data.

## Assignment 2

Due: **Week 8**

Weighting: **20%**

In this assignment you will implement MapReduce techniques for the processing of Big Data. You will build your assignment on top of Hadoop (i.e. an open-source version of MapReduce written in Java).

On successful completion you will be able to:

- Apply Map-reduce techniques to a number of problems that involve Big Data.

## Assignment 3

Due: **Week 12**

Weighting: **15%**

In this assignment you will implement a non-trivial problem that processes Big Data.

On successful completion you will be able to:

- Apply Map-reduce techniques to a number of problems that involve Big Data.
- Apply Big Data techniques to data mining.

## Final Exam

Due: **Examination period**

Weighting: **60%**

**This is a hurdle assessment task (see [assessment policy](#) for more information on hurdle assessment tasks)**

The final exam will focus on the theoretical aspects of the unit, including algorithms and implementation issues.

This is a **hurdle assessment**. This means that you need to pass the exam in order to pass the unit.

On successful completion you will be able to:

- Explain the key Big Data concepts and techniques.
- Apply Map-reduce techniques to a number of problems that involve Big Data.
- Apply Big Data techniques to data mining.

- Apply techniques for storing large volumes of data.

## Delivery and Resources

### Required and Recommended Texts

Much of the contents of the unit will be based on the following books:

- J. Leskovec, A. Rajaraman, J. Ullman, Mining of Massive Datasets. The book is free and available from <http://www.mmids.org/>, where you can also find links to a MOOC, slides, and videos.
- C. Coronel, S. Morris. Database Systems: Design, Implementation and Management. 13th edition. Chapter 14 is the most relevant chapter. This chapter will be made available to students attending the classes.

Additional material including lecture notes will be made available during the semester. See the unit schedule for a listing of the most relevant reading for each week.

### Technology Used and Required

The following software is used in COMP336:

- Java 8
  - Download: <http://download.oracle.com/otn-pub/java/jdk/8u162-b12/0da788060d494f5095bf8624735fa2f1/jdk-8u162-windows-x64.exe>
  - Installation instructions to set JAVA\_HOME:
    - [https://www.java.com/en/download/help/download\\_options.xml](https://www.java.com/en/download/help/download_options.xml)
    - [https://docs.oracle.com/cd/E19182-01/820-7851/inst\\_cli\\_jdk\\_javahome\\_t/](https://docs.oracle.com/cd/E19182-01/820-7851/inst_cli_jdk_javahome_t/)
- Hadoop
  - Download: <http://apache.mirror.amaze.com.au/hadoop/common/stable2/hadoop-2.9.0.tar.gz>
  - Installation instructions: <https://wiki.apache.org/hadoop/Hadoop2OnWindows>
- Python 3.6 (Anaconda version)
  - Download: <https://www.anaconda.com/download>
- MongoDB 3.6.2
  - Installation instructions: <https://docs.mongodb.com/tutorials/install-mongodb-on-windows/>

This software is installed in the labs; you should also ensure that you have working copies of all the above on your own machine. Note that some of this software requires internet access.

Many packages come in various versions; to avoid potential incompatibilities, you should install

versions as close as possible to those used in the labs.

## Unit Web Page

The unit web page will be hosted in iLearn, where you will need to login using your Student One ID and password. The unit will make extensive use of discussion boards also hosted in iLearn. Please post questions there, they will be monitored by the staff on the unit.

## Unit Schedule

Below is the tentative unit schedule.

Week	Topic	Reading
1	Data and Big Data	Leskovec et al. Ch 1
2	Organizing Big Data	
3	Curating Big Data	
4	Processing Big Data: Cloud computing	
5	Processing Big Data: MapReduce (I)	Leskovec et al. Ch 2
6	Processing Big Data: MapReduce (II)	Leskovec et al. Ch 2
7	Finding Similar Items	Leskovec et al. Ch 3
	RECESS	
8	Mining Data Streams	Leskovec et al. Ch 4
9	Link Analysis	Leskovec et al. Ch 5
10	Frequent Itemsets	Leskovec et al. Ch 7
11	Large-scale Machine Learning (I)	Leskovec et al. Ch 12
12	Large-scale Machine Learning (II)	Leskovec et al. Ch 12

## Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central \(https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central\)](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- [Academic Appeals Policy](#)
- [Academic Integrity Policy](#)
- [Academic Progression Policy](#)
- [Assessment Policy](#)

- [Fitness to Practice Procedure](#)
- [Grade Appeal Policy](#)
- [Complaint Management Procedure for Students and Members of the Public](#)
- [Special Consideration Policy](#) (**Note:** *The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.*)

Undergraduate students seeking more policy resources can visit the [Student Policy Gateway](https://students.mq.edu.au/support/study/student-policy-gateway) (<https://students.mq.edu.au/support/study/student-policy-gateway>). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit [Policy Central](http://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central) (<http://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central>).

## Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: <https://students.mq.edu.au/study/getting-started/student-conduct>

## Results

Results shown in *iLearn*, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](#). For more information visit [ask.mq.edu.au](http://ask.mq.edu.au).

## Final Examination

If you receive [special consideration](#) for the final exam, a supplementary exam will be scheduled in the interval between the regular exam period and the start of the next session. By making a special consideration application for the final exam you are declaring yourself available for a resit during the supplementary examination period and will not be eligible for a second special consideration approval based on pre-existing commitments. Please ensure you are familiar with the [policy](#) prior to submitting an application. You can check the supplementary exam information page on FSE101 in *iLearn* ([bit.ly/FSESupp](http://bit.ly/FSESupp)) for dates, and approved applicants will receive an individual notification one week prior to the exam with the exact date and time of their supplementary examination.

If you are given a second opportunity to sit the final examination as a result of failing to meet the minimum mark required, you will be offered that chance during the same supplementary examination period and will be notified of the exact day and time after the publication of final results for the unit.

## Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

## Learning Skills

Learning Skills ([mq.edu.au/learningskills](http://mq.edu.au/learningskills)) provides academic writing resources and study strategies to improve your marks and take control of your study.

- [Workshops](#)
- [StudyWise](#)
- [Academic Integrity Module for Students](#)
- [Ask a Learning Adviser](#)

## Student Services and Support

Students with a disability are encouraged to contact the [Disability Service](#) who can provide appropriate help with any issues that arise during their studies.

## Student Enquiries

For all student enquiries, visit Student Connect at [ask.mq.edu.au](http://ask.mq.edu.au)

## IT Help

For help with University computer systems and technology, visit [http://www.mq.edu.au/about\\_us/offices\\_and\\_units/information\\_technology/help/](http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/).

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.

## Graduate Capabilities

### Creative and Innovative

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

### Learning outcomes

- Apply Map-reduce techniques to a number of problems that involve Big Data.
- Apply Big Data techniques to data mining.
- Apply techniques for storing large volumes of data.

### Assessment tasks

- Assignment 1
- Assignment 2
- Assignment 3
- Final Exam

## Capable of Professional and Personal Judgement and Initiative

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:

### Learning outcomes

- Explain the key Big Data concepts and techniques.
- Apply Map-reduce techniques to a number of problems that involve Big Data.
- Apply Big Data techniques to data mining.
- Apply techniques for storing large volumes of data.

### Assessment tasks

- Assignment 1
- Assignment 2
- Assignment 3
- Final Exam

## Commitment to Continuous Learning

Our graduates will have enquiring minds and a literate curiosity which will lead them to pursue knowledge for its own sake. They will continue to pursue learning in their careers and as they participate in the world. They will be capable of reflecting on their experiences and relationships with others and the environment, learning from them, and growing - personally, professionally and socially.

This graduate capability is supported by:

### Learning outcomes

- Explain the key Big Data concepts and techniques.
- Apply Map-reduce techniques to a number of problems that involve Big Data.
- Apply Big Data techniques to data mining.
- Apply techniques for storing large volumes of data.

### Assessment tasks

- Assignment 1
- Assignment 2
- Assignment 3
- Final Exam

## Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

### Learning outcomes

- Explain the key Big Data concepts and techniques.
- Apply Map-reduce techniques to a number of problems that involve Big Data.
- Apply Big Data techniques to data mining.
- Apply techniques for storing large volumes of data.

### Assessment tasks

- Assignment 1
- Assignment 2
- Assignment 3
- Final Exam

## Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

### Learning outcomes

- Apply Map-reduce techniques to a number of problems that involve Big Data.
- Apply Big Data techniques to data mining.
- Apply techniques for storing large volumes of data.

### Assessment tasks

- Assignment 1
- Assignment 2
- Assignment 3

- Final Exam

## Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

### Learning outcomes

- Apply Map-reduce techniques to a number of problems that involve Big Data.
- Apply Big Data techniques to data mining.
- Apply techniques for storing large volumes of data.

### Assessment tasks

- Assignment 1
- Assignment 2
- Assignment 3
- Final Exam

## Effective Communication

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

### Learning outcome

- Explain the key Big Data concepts and techniques.

### Assessment tasks

- Assignment 1
- Assignment 2
- Assignment 3
- Final Exam

## Changes from Previous Offering

This is the first offering of the unit.
