Unit description

This is a general education unit for students of any discipline who are concerned about writing, especially writing for academic, professional and other functional purposes. It aims to provide insights into the English language as a communicative system, and to foster a critical and informed attitude to language use in various kinds of written texts. Both in lectures/workshops and tutorials we analyse various principles of linguistic choice and organisation that produce successful written communication. By developing an understanding of what makes for successful communication in the writing of others, writers can also learn to develop techniques for writing successfully themselves.

Changes from Previous Offering

The number of assessments has been reduced from 5 assignments plus a formal exam in previous years to 4 assignments plus a final exam, with relative weightings adjusted. The reason for this change was to give staff more time to deliver useful formative feedback on each assessment task before students submit the next one, and for students to have more time to reflect on this feedback and use it to inform the way they compose the next piece of assessed writing.

These changes were approved by Faculty of Human Sciences FSQC.
