Unit description

This unit broadens students' understanding of contemporary China's commercial law system, from both international and national perspectives. As China's Five Year Plans are crucial to understanding how China has developed and continues its development, they will be explored in detail in this unit. It also explores major changes in law and policies regarding labour issues, company, corporate governance, and foreign investments. China, the second largest economy in the world, has to address the downside of production exhibited through the environmental degradation of its air quality, water and waste. As these issues and that of energy production are the focus of China's development programmes for the twenty-first century, they are examined in the latter part of this unit.
