Unit description
This unit is a special topic unit that may be offered from time to time in new areas of computing and information systems, or as a special project under the supervision of a member of staff.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates

Learning Outcomes

1. Students in comp350 will have individual experience in scoping a significant research project (in collaboration with a staff member).
2. Development of management skills, including managing time, choosing appropriate methods and determining aims and objectives.
3. Development of technical skills applied in an unfamiliar situation. The precise skills will depend on the nature of the project.
4. Technical writing and communication skills will be developed to explain how the technical deliverable contributes to the overall project aims and objectives.
General Assessment Information

- Typically, we refer to the assessment items as "deliverables" to emphasise that they can take many forms. In fact, the majority of them are reports of some kind, but some projects include software deliverables, design deliverables, essays, draft papers, etc.

The number, nature, timing and weighting of the deliverables, will be negotiated with each student individually, but typically it will include a major piece of writing reporting summatively on the whole comp350 activities and due at the end of the study period. The other deliverables are more varied in nature depending upon students' individual projects.

- The assessment tasks above are intentionally broad, but the project should be designed so that the individual assessment tasks can be identified.

Project specification

Due: Negotiated.
Weighting: 10%

This task requires a short description of the project, its major aims and methods.

This Assessment Task relates to the following Learning Outcomes:

- Students in comp350 will have individual experience in scoping a significant research project (in collaboration with a staff member).
- Development of management skills, including managing time, choosing appropriate methods and determining aims and objectives.
- Development of technical skills applied in an unfamiliar situation. The precise skills will depend on the nature of the project.
Technical writing and communication skills will be developed to explain how the technical deliverable contributes to the overall project aims and objectives.

**Technical deliverable**

**Due:** *Negotiated*

**Weighting:** *50%*

The precise deliverable depends on the project and could be a design document, an implementation, or a detailed analysis.

This Assessment Task relates to the following Learning Outcomes:

- Students in comp350 will have individual experience in scoping a significant research project (in collaboration with a staff member).
- Development of management skills, including managing time, choosing appropriate methods and determining aims and objectives.
- Development of technical skills applied in an unfamiliar situation. The precise skills will depend on the nature of the project.
- Technical writing and communication skills will be developed to explain how the technical deliverable contributes to the overall project aims and objectives.

**Report**

**Due:** *Negotiated*

**Weighting:** *40%*

This could be a description of the technical deliverable plus a reflection on what was achieved. Together with the report, a short presentation can also be part of the report section as negotiated by the supervisor.

This Assessment Task relates to the following Learning Outcomes:

- Students in comp350 will have individual experience in scoping a significant research project (in collaboration with a staff member).
- Development of management skills, including managing time, choosing appropriate methods and determining aims and objectives.
- Development of technical skills applied in an unfamiliar situation. The precise skills will depend on the nature of the project.
- Technical writing and communication skills will be developed to explain how the technical deliverable contributes to the overall project aims and objectives.
COMP350 CySCA

Due: All year
Weighting: 0%

For students enrolled in COMP350 CySCA the assessment will be different.

Namely,

1. Participation: 15%
2. Group Presentation: 10%
3. Performance in the CTFs and reports (mix of group and individual tasks): 35%
4. Final practical exam and report: 40%

This Assessment Task relates to the following Learning Outcomes:

• Development of management skills, including managing time, choosing appropriate methods and determining aims and objectives.
• Development of technical skills applied in an unfamiliar situation. The precise skills will depend on the nature of the project.
• Technical writing and communication skills will be developed to explain how the technical deliverable contributes to the overall project aims and objectives.

Delivery and Resources

The resources used in comp350 will vary depending upon particular student projects and their corresponding deliverables.

In general students have access to departmental resources, computing time, knowledge bases, and individual advice negotiated as the project proceeds.

Unit Schedule

This unit is based on individual work by a student in collaboration with the supervising staff member and the unit convenor.

Appropriate schedules of activities will be negotiated individually.

In general students should plan on meeting with their supervising staff members at least weekly, at a time convenient to them both. The bulk of the work for comp350 will happen outside of these meetings, usually with students working individually on learning, skill development, and research, so it is important for students to plan significant concentrated time in their weekly schedule for comp350.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central (https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central). Students should be aware of the following policies in particular with regard to Learning and Teaching:
Undergraduate students seeking more policy resources can visit the Student Policy Gateway (https://students.mq.edu.au/support/study/student-policy-gateway). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit Policy Central (https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central).

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/study/getting-started/student-conduct

**Results**

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au.

**Student Support**

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

**Learning Skills**

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

**Student Enquiry Service**

For all student enquiries, visit Student Connect at ask.mq.edu.au
Equity Support

Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help

For help with University computer systems and technology, visit [http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/](http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/).

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/). The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

- Students in comp350 will have individual experience in scoping a significant research project (in collaboration with a staff member).
- Development of management skills, including managing time, choosing appropriate methods and determining aims and objectives.
- Development of technical skills applied in an unfamiliar situation. The precise skills will depend on the nature of the project.
- Technical writing and communication skills will be developed to explain how the technical deliverable contributes to the overall project aims and objectives.

- COMP350 CySCA
Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

**Learning outcomes**

- Students in comp350 will have individual experience in scoping a significant research project (in collaboration with a staff member).
- Development of management skills, including managing time, choosing appropriate methods and determining aims and objectives.
- Development of technical skills applied in an unfamiliar situation. The precise skills will depend on the nature of the project.
- Technical writing and communication skills will be developed to explain how the technical deliverable contributes to the overall project aims and objectives.

**Assessment tasks**

- Project specification
- Technical deliverable
- Report

Creative and Innovative

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

**Learning outcomes**

- Students in comp350 will have individual experience in scoping a significant research project (in collaboration with a staff member).
- Development of management skills, including managing time, choosing appropriate methods and determining aims and objectives.
- Development of technical skills applied in an unfamiliar situation. The precise skills will depend on the nature of the project.
- Technical writing and communication skills will be developed to explain how the technical deliverable contributes to the overall project aims and objectives.
Assessment tasks

• Project specification
• Technical deliverable

Effective Communication

We want to develop in our students the ability to communicate and convey their views in forms
effective with different audiences. We want our graduates to take with them the capability to
read, listen, question, gather and evaluate information resources in a variety of formats, assess,
write clearly, speak effectively, and to use visual communication and communication
technologies as appropriate.

This graduate capability is supported by:

Learning outcomes

• Students in comp350 will have individual experience in scoping a significant research
  project (in collaboration with a staff member).
• Development of management skills, including managing time, choosing appropriate
  methods and determining aims and objectives.
• Development of technical skills applied in an unfamiliar situation. The precise skills will
  depend on the nature of the project.
• Technical writing and communication skills will be developed to explain how the technical
  deliverable contributes to the overall project aims and objectives.

Assessment tasks

• Project specification
• Technical deliverable
• Report

Capable of Professional and Personal Judgement and Initiative

We want our graduates to have emotional intelligence and sound interpersonal skills and to
demonstrate discernment and common sense in their professional and personal judgement.
They will exercise initiative as needed. They will be capable of risk assessment, and be able to
handle ambiguity and complexity, enabling them to be adaptable in diverse and changing
environments.

This graduate capability is supported by:

Learning outcomes

• Students in comp350 will have individual experience in scoping a significant research
  project (in collaboration with a staff member).
• Development of management skills, including managing time, choosing appropriate
methods and determining aims and objectives.

- Development of technical skills applied in an unfamiliar situation. The precise skills will depend on the nature of the project.
- Technical writing and communication skills will be developed to explain how the technical deliverable contributes to the overall project aims and objectives.

### Assessment tasks

- Project specification
- Technical deliverable

### Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

### Learning outcomes

- Students in comp350 will have individual experience in scoping a significant research project (in collaboration with a staff member).
- Development of management skills, including managing time, choosing appropriate methods and determining aims and objectives.
- Development of technical skills applied in an unfamiliar situation. The precise skills will depend on the nature of the project.
- Technical writing and communication skills will be developed to explain how the technical deliverable contributes to the overall project aims and objectives.

### Assessment tasks

- Project specification
- Technical deliverable
- Report

### Commitment to Continuous Learning

Our graduates will have enquiring minds and a literate curiosity which will lead them to pursue knowledge for its own sake. They will continue to pursue learning in their careers and as they participate in the world. They will be capable of reflecting on their experiences and relationships with others and the environment, learning from them, and growing - personally, professionally and socially.
This graduate capability is supported by:

**Learning outcomes**

- Students in comp350 will have individual experience in scoping a significant research project (in collaboration with a staff member).
- Development of management skills, including managing time, choosing appropriate methods and determining aims and objectives.
- Development of technical skills applied in an unfamiliar situation. The precise skills will depend on the nature of the project.
- Technical writing and communication skills will be developed to explain how the technical deliverable contributes to the overall project aims and objectives.
