Credit points 3
Prerequisites Admission to BChiroSc
Corequisites HLTH108 or HLTH107
Co-badged status
Unit description This unit offers an introduction to Chiropractic practice including patient assessment and intervention using spinal palpation, range of motion and fundamentals of psychomotor skill acquisition. The clinical application of anatomical knowledge is explored. Research methodology and critical thinking skills essential for the health clinician are introduced as part of the research skills development program. Fundamental physics and biomechanics related to function and manual therapy intervention are introduced. The role of Chiropractic in the delivery of primary health care, both now and throughout history are explored.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

Understand principles related to patient assessment and therapeutic intervention.

Develop psychomotor skills in patient assessment and therapeutic intervention within a framework of ethical patient interaction.

Demonstrate practical use of anatomical knowledge related to patient assessment and basic intervention.

Demonstrate understanding of the role Chiropractic has in delivery of primary health care, both now and throughout history.

Demonstrate library, research, and critical thinking abilities.

Demonstrate research skills at the level of closed inquiry with a high degree of structured guidance as part of a research skills development (RSD) progression.

Develop safe and competent laboratory skills in handling equipment and making measurements.

Understand basic properties of solids, liquids, and gases, including atomic theory,

elasticity, and fluid static and dynamics, as applied to physiological problems.

Develop capacity to use quantitative calculations to analyse elastic behaviour of solids, fluid pressure, and fluid flow.

Analyse and report quantitative data using graphs, tables, and verbal explanations.

General Assessment Information

Competency based assessment

In higher education, assessments must be able to recognise various levels of competencies in order to encourage students to become not only competent, but progress onto developing expertise. A key component of effective assessment in competency-based education is for assessments to be criterion-based using a developmental perspective. Defining the criteria in developmental terms, commonly called milestones or benchmarks, allows programs to determine whether the trainee is on an appropriate 'trajectory'. Milestones provide specific guidance on trainee progress throughout the continuum of their training program. CHIR113 practical examinations are competency based.

For a more information see: "[Competency-based Assessment, Macquarie University](https://staff.mq.edu.au/public/download/?id=40618)"
<https://staff.mq.edu.au/public/download/?id=40618>

Passing the unit

There are 3 components to this unit:

- 1) Chiropractic technique
- 2) Chiropractic theory
- 3) Physics

Hurdle Requirements and Serious Attempt Defined

A hurdle is a passing requirement for the unit. A serious attempt is a threshold when a second chance will be provided as an opportunity to meet the hurdle requirement.

CHIR113 has 3 hurdles. The hurdles, their serious attempt threshold, and the method of the second attempt are described below.

Hurdle 1) Chiropractic technique participation. You must attend and participate in at least 15 of the 20 weekly CHIROPRACTIC tutorials. Participation will be recorded by your tutor. It is your responsibility to demonstrate participation. This is a hurdle requirement.

- Serious attempt: None
- Second chance: None

Hurdle 2) Chiropractic theory component (comprised of the online quiz, report, and the

chiropractic theory exam): must obtain 50% of the combined available marks

- Serious attempt: defined as gaining 40-49% in the final chiropractic theory exam.
- Second chance: a supplementary chiropractic theory examination

Hurdle 3) Physics theory component (comprised of the physics lab marks, the in-class physics exam, and the final physics theory exam): must obtain 50% of the combined available marks.

- Serious attempt: defined as gaining 40-49% in the final physics theory exam
- Second chance: a supplementary physics theory exam

Second-chance hurdle examinations will be offered during the FSE supplementary examination period. You will be notified shortly after that date of your eligibility for a hurdle retry and you must make yourself available during that week to take advantage of this opportunity.

Serious and unavoidable disruption

The University classifies a disruption as **serious and unavoidable** if it:

- could not have reasonably been anticipated, avoided or guarded against by the student; and
- was beyond the student's control; and
- caused substantial disruption to the student's capacity for effective study and/or completion of required work; and
- occurred during an event critical study period and was at least three (3) consecutive days duration, and/or
- prevented completion of a final examination.

Students with a pre-existing disability/health condition or prolonged adverse circumstances may be eligible for ongoing assistance and support. Such support is governed by other policies and may be sought and coordinated through Campus Wellbeing and Support Services.

Examinations

You are expected to present yourself for examination at the time and place designated in the University Examination Timetable. The timetable will be available in Draft form approximately eight weeks before the commencement of the examinations and in Final form approximately four weeks before the commencement of the examinations. <https://iexams.mq.edu.au/timetable>

The only exception to not sitting an examination at the designated time is because of documented illness or unavoidable disruption. In these circumstances, you may wish to submit an application for 'Special consideration'. Information about the special consideration process is available at **Policy Central**: <http://www.mq.edu.au/policy/>

If you receive special consideration for the final exam, a supplementary exam will be scheduled in the interval between the regular exam period and the start of the next session. By making a special consideration application for the final exam you are declaring yourself available for a resit during the supplementary examination period and will not be eligible for a second special consideration approval based on pre-existing commitments. Please ensure you are familiar with the policy prior to submitting an application. You can check the supplementary exam information page on FSE101 in iLearn (bit.ly/FSESupp) for dates, and approved applicants will receive an individual notification one week prior to the exam with the exact date and time of their supplementary examination.

Extensions and penalties

Extensions to assignments are at the discretion of the unit convenor. It is the responsibility of the student to prove to the convenor that there has been an unavoidable disruption. Please submit a 'Special consideration' and request an extension. The online form will ask you to provide evidence of the disruption.

Marks will be deducted for late submissions in the absence of an approved extension. Marks will be deducted at the rate of 10% of the available marks per day.

Grading descriptors

High Distinction : provides consistent evidence of deep and critical understanding in relation to the learning outcomes. There is substantial originality and insight in identifying, generating and communicating competing arguments, perspectives or problem-solving approaches; critical evaluation of problems, their solutions and their implications; creativity in application.

Distinction: provides evidence of integration and evaluation of critical ideas, principles and theories, distinctive insight and ability in applying relevant skills and concepts in relation to learning outcomes. There is a demonstration of frequent originality in defining and analysing issues or problems and providing solutions; and the use of means of communication appropriate to the discipline and the audience.

Credit : provides evidence of learning that goes beyond replication of content knowledge or skills relevant to the learning outcomes. There is demonstration of substantial understanding of fundamental concepts in the field of study and the ability to apply these concepts in a variety of contexts; plus communication of ideas fluently and clearly in terms of the conventions of the discipline.

Pass: provides sufficient evidence of the achievement of learning outcomes. There is demonstration of understanding and application of fundamental concepts of the field of study; and communication of information and ideas adequately in terms of the conventions of the discipline. The learning attainment is considered satisfactory or adequate or competent or capable in relation to the specified outcomes.

Fail: does not provide evidence of attainment of all learning outcomes. There is missing or partial or superficial or faulty understanding and application of the fundamental concepts in the field of study; and incomplete, confusing or lacking communication of ideas in ways that give little attention to the conventions of the discipline.

GRADE	REQUIREMENTS
Pass	A minimum of 50% in each of unit component AND a minimum 50% aggregate raw mark.
Credit	A minimum of 50% in each of unit component AND a minimum 65% aggregate raw mark.
Distinction	A minimum of 50% in each of unit component AND a minimum 75% aggregate raw mark.
High Distinction	A minimum of 50% in each of unit component AND a minimum 85% aggregate raw mark.

Assessment Tasks

Name	Weighting	Hurdle	Due
<u>Chiropractic: participation</u>	0%	Yes	Ongoing
<u>Chiropractic: Online Quiz</u>	2%	No	Week 3
<u>Chiropractic: Spot Test1</u>	0%	No	Week 4
<u>Chiropractic: Spot Test2</u>	5%	No	Week 7
<u>Chiropractic: Report</u>	10%	No	Week 7
<u>Chiropractic: Theory exam</u>	30%	Yes	Exam period
<u>Chiropractic: Practical exam</u>	33%	No	Week 10
<u>Physics: in-class test</u>	2%	No	Week 12 during lecture
<u>Physics: Laboratory assessment</u>	10%	No	Friday weeks 11, 12, 13
<u>Physics: Theory exam</u>	8%	Yes	Exam period

Chiropractic: participation

Due: **Ongoing**

Weighting: **0%**

This is a hurdle assessment task (see [assessment policy](#) for more information on hurdle assessment tasks)

You must attend and participate in **at least** 15 of the 20 weekly CHIROPRACTIC tutorials. This is a hurdle requirement.

On successful completion you will be able to:

- Understand principles related to patient assessment and therapeutic intervention.
- Develop psychomotor skills in patient assessment and therapeutic intervention within a framework of ethical patient interaction.
- Demonstrate practical use of anatomical knowledge related to patient assessment and basic intervention.

Chiropractic: Online Quiz

Due: **Week 3**

Weighting: **2%**

Multiple choice quiz delivered via iLearn covering content covered up to and including week 3.

On successful completion you will be able to:

- Understand principles related to patient assessment and therapeutic intervention.
- Demonstrate practical use of anatomical knowledge related to patient assessment and basic intervention.

Chiropractic: Spot Test1

Due: **Week 4**

Weighting: **0%**

Practical assessment during Technique lab

On successful completion you will be able to:

- Understand principles related to patient assessment and therapeutic intervention.
- Develop psychomotor skills in patient assessment and therapeutic intervention within a framework of ethical patient interaction.
- Demonstrate practical use of anatomical knowledge related to patient assessment and basic intervention.

Chiropractic: Spot Test2

Due: **Week 7**

Weighting: **5%**

Practical assessment during Technique lab

On successful completion you will be able to:

- Understand principles related to patient assessment and therapeutic intervention.
- Develop psychomotor skills in patient assessment and therapeutic intervention within a framework of ethical patient interaction.
- Demonstrate practical use of anatomical knowledge related to patient assessment and basic intervention.

Chiropractic: Report

Due: **Week 7**

Weighting: **10%**

You will explore the role Chiropractic has in delivery of primary health care.

On successful completion you will be able to:

- Demonstrate understanding of the role Chiropractic has in delivery of primary health care, both now and throughout history.
- Demonstrate library, research, and critical thinking abilities.
- Demonstrate research skills at the level of closed inquiry with a high degree of structured guidance as part of a research skills development (RSD) progression.

Chiropractic: Theory exam

Due: **Exam period**

Weighting: **30%**

This is a hurdle assessment task (see [assessment policy](#) for more information on hurdle assessment tasks)

These will cover the discipline specific content of the chiropractic material. Question format will be mixed and may include Multiple Choice, True and False, and short answer questions.

Chiropractic and Physics will be written at the same exam time.

On successful completion you will be able to:

- Understand principles related to patient assessment and therapeutic intervention.
- Demonstrate practical use of anatomical knowledge related to patient assessment and basic intervention.
- Demonstrate understanding of the role Chiropractic has in delivery of primary health care, both now and throughout history.

- Demonstrate library, research, and critical thinking abilities.
- Demonstrate research skills at the level of closed inquiry with a high degree of structured guidance as part of a research skills development (RSD) progression.

Chiropractic: Practical exam

Due: **Week 10**

Weighting: **33%**

Occurring week 10 and will consist of performing procedures as taught in the unit.

On successful completion you will be able to:

- Understand principles related to patient assessment and therapeutic intervention.
- Develop psychomotor skills in patient assessment and therapeutic intervention within a framework of ethical patient interaction.
- Demonstrate practical use of anatomical knowledge related to patient assessment and basic intervention.

Physics: in-class test

Due: **Week 12 during lecture**

Weighting: **2%**

Final exam preparation test.

On successful completion you will be able to:

- Understand basic properties of solids, liquids, and gases, including atomic theory, elasticity, and fluid static and dynamics, as applied to physiological problems.
- Develop capacity to use quantitative calculations to analyse elastic behaviour of solids, fluid pressure, and fluid flow.
- Analyse and report quantitative data using graphs, tables, and verbal explanations.

Physics: Laboratory assessment

Due: **Friday weeks 11, 12, 13**

Weighting: **10%**

These will occur during Physics laboratory sessions. Attendance is essential for all sessions.

On successful completion you will be able to:

- Develop safe and competent laboratory skills in handling equipment and making measurements.
- Understand basic properties of solids, liquids, and gases, including atomic theory,

elasticity, and fluid statistic and dynamics, as applied to physiological problems.

- Develop capacity to use quantitative calculations to analyse elastic behaviour of solids, fluid pressure, and fluid flow.
- Analyse and report quantitative data using graphs, tables, and verbal explanations.

Physics: Theory exam

Due: **Exam period**

Weighting: **8%**

This is a hurdle assessment task (see [assessment policy](#) for more information on hurdle assessment tasks)

These will cover the discipline specific content of the physics material. Question format MAY be mixed and may include Multiple Choice, True and False, and short answer questions.

Chiropractic and Physics will be written at the same exam time.

On successful completion you will be able to:

- Develop safe and competent laboratory skills in handling equipment and making measurements.
- Understand basic properties of solids, liquids, and gases, including atomic theory, elasticity, and fluid statistic and dynamics, as applied to physiological problems.
- Develop capacity to use quantitative calculations to analyse elastic behaviour of solids, fluid pressure, and fluid flow.
- Analyse and report quantitative data using graphs, tables, and verbal explanations.

Delivery and Resources

Technology Used and Required: iLearn, Echo360, Practical Audio/Visual Equipment, and Electronic Lectern

Delivery mode

Will be comprised of a combination of face-to-face lectures, pre-recorded lectures, self-directed learning, and hands-on tutorials/practicals:

- 1 two hour lecture per week on Friday at 1pm
- 2 two hour tutorial/practicals per week
- 2-3 hours per week self- instructional learning

Class times and locations

Lecture: FRIDAY 1300- 1500 17WW T1

Tutorials1, 2: Monday 1400-1600, or 1600-1800: for location see timetable

Friday 1300-1500, or 1500-1700:for location see timetable

Tutorial 3: Physics (see below)

Physics Lab (tutorial 3)

FRIDAY: Weeks 11, 12, 13 will involve Physics Laboratory sessions. Please note the following –

Friday Tutorial 2: will be replaced by Tutorial 3; Physics Laboratory sessions held in E7A 114, that is, the North-Eastern corner of E7A on the ground floor. You must wear appropriate clothing for the laboratory including covered footwear.

Required and recommended resources

Biel, Dorn. Trail Guide to the Body: How to locate Muscles, Bones and More. Books of Discovery.

Oatis C. Kinesiology: the mechanics & pathomechanics of human movement 2 ed. LWW

Sackett et al. Evidence-based Medicine: How to Practice and Teach EBM. Churchill Livingstone.

Polgar & Thomas. Introduction to Research in the Health Sciences. Churchill Livingstone.

Unit Schedule

See CHIR113 iLearn page for unit schedule

Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central) (<https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central>). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- [Academic Appeals Policy](#)
- [Academic Integrity Policy](#)
- [Academic Progression Policy](#)
- [Assessment Policy](#)
- [Fitness to Practice Procedure](#)
- [Grade Appeal Policy](#)
- [Complaint Management Procedure for Students and Members of the Public](#)
- [Special Consideration Policy](#) (**Note:** *The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.*)

Undergraduate students seeking more policy resources can visit the [Student Policy Gateway](https://students.mq.edu.au/support/study/student-policy-gateway) (<https://students.mq.edu.au/support/study/student-policy-gateway>). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit [Policy Central](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central) (<https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central>).

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: <https://students.mq.edu.au/study/getting-started/student-conduct>

Results

Results published on platform other than [eStudent](#), (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](#). For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- [Workshops](#)
- [StudyWise](#)
- [Academic Integrity Module for Students](#)
- [Ask a Learning Adviser](#)

Student Services and Support

Students with a disability are encouraged to contact the [Disability Service](#) who can provide appropriate help with any issues that arise during their studies.

Student Enquiries

For all student enquiries, visit Student Connect at ask.mq.edu.au

If you are a Global MBA student contact globalmba.support@mq.edu.au

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

Creative and Innovative

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

Learning outcomes

- Understand principles related to patient assessment and therapeutic intervention.
- Demonstrate understanding of the role Chiropractic has in delivery of primary health care, both now and throughout history.
- Demonstrate research skills at the level of closed inquiry with a high degree of structured guidance as part of a research skills development (RSD) progression.
- Understand basic properties of solids, liquids, and gases, including atomic theory, elasticity, and fluid statistic and dynamics, as applied to physiological problems.

Assessment tasks

- Chiropractic: Online Quiz
- Chiropractic: Spot Test1

- Chiropractic: Spot Test2
- Chiropractic: Report
- Chiropractic: Theory exam
- Chiropractic: Practical exam
- Physics: in-class test
- Physics: Laboratory assessment

Capable of Professional and Personal Judgement and Initiative

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:

Learning outcomes

- Understand principles related to patient assessment and therapeutic intervention.
- Develop psychomotor skills in patient assessment and therapeutic intervention within a framework of ethical patient interaction.
- Develop safe and competent laboratory skills in handling equipment and making measurements.

Assessment tasks

- Chiropractic: Online Quiz
- Chiropractic: Spot Test1
- Chiropractic: Spot Test2
- Chiropractic: Theory exam
- Chiropractic: Practical exam
- Physics: Laboratory assessment

Commitment to Continuous Learning

Our graduates will have enquiring minds and a literate curiosity which will lead them to pursue knowledge for its own sake. They will continue to pursue learning in their careers and as they participate in the world. They will be capable of reflecting on their experiences and relationships with others and the environment, learning from them, and growing - personally, professionally and socially.

This graduate capability is supported by:

Learning outcomes

- Understand principles related to patient assessment and therapeutic intervention.
- Demonstrate understanding of the role Chiropractic has in delivery of primary health care, both now and throughout history.
- Demonstrate library, research, and critical thinking abilities.
- Demonstrate research skills at the level of closed inquiry with a high degree of structured guidance as part of a research skills development (RSD) progression.

Assessment tasks

- Chiropractic: participation
- Chiropractic: Online Quiz
- Chiropractic: Spot Test1
- Chiropractic: Spot Test2
- Chiropractic: Report
- Chiropractic: Theory exam
- Chiropractic: Practical exam

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

- Understand principles related to patient assessment and therapeutic intervention.
- Develop psychomotor skills in patient assessment and therapeutic intervention within a framework of ethical patient interaction.
- Demonstrate practical use of anatomical knowledge related to patient assessment and basic intervention.
- Demonstrate understanding of the role Chiropractic has in delivery of primary health care, both now and throughout history.
- Demonstrate research skills at the level of closed inquiry with a high degree of structured guidance as part of a research skills development (RSD) progression.

- Develop safe and competent laboratory skills in handling equipment and making measurements.
- Understand basic properties of solids, liquids, and gases, including atomic theory, elasticity, and fluid static and dynamics, as applied to physiological problems.
- Develop capacity to use quantitative calculations to analyse elastic behaviour of solids, fluid pressure, and fluid flow.
- Analyse and report quantitative data using graphs, tables, and verbal explanations.

Assessment tasks

- Chiropractic: participation
- Chiropractic: Online Quiz
- Chiropractic: Spot Test1
- Chiropractic: Spot Test2
- Chiropractic: Report
- Chiropractic: Theory exam
- Chiropractic: Practical exam
- Physics: in-class test
- Physics: Laboratory assessment
- Physics: Theory exam

Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

Learning outcomes

- Understand principles related to patient assessment and therapeutic intervention.
- Demonstrate practical use of anatomical knowledge related to patient assessment and basic intervention.
- Demonstrate understanding of the role Chiropractic has in delivery of primary health care, both now and throughout history.
- Demonstrate library, research, and critical thinking abilities.
- Demonstrate research skills at the level of closed inquiry with a high degree of structured guidance as part of a research skills development (RSD) progression.
- Understand basic properties of solids, liquids, and gases, including atomic theory,

elasticity, and fluid static and dynamics, as applied to physiological problems.

- Develop capacity to use quantitative calculations to analyse elastic behaviour of solids, fluid pressure, and fluid flow.
- Analyse and report quantitative data using graphs, tables, and verbal explanations.

- Chiropractic: Spot Test1
- Chiropractic: Spot Test2
- Chiropractic: Report
- Chiropractic: Theory exam
- Chiropractic: Practical exam
- Physics: in-class test
- Physics: Laboratory assessment
- Physics: Theory exam

Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

Learning outcomes

- Understand principles related to patient assessment and therapeutic intervention.
- Demonstrate understanding of the role Chiropractic has in delivery of primary health care, both now and throughout history.
- Demonstrate library, research, and critical thinking abilities.
- Demonstrate research skills at the level of closed inquiry with a high degree of structured guidance as part of a research skills development (RSD) progression.
- Understand basic properties of solids, liquids, and gases, including atomic theory, elasticity, and fluid static and dynamics, as applied to physiological problems.
- Develop capacity to use quantitative calculations to analyse elastic behaviour of solids, fluid pressure, and fluid flow.
- Analyse and report quantitative data using graphs, tables, and verbal explanations.

- Physics: in-class test
- Physics: Laboratory assessment
- Physics: Theory exam

Effective Communication

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

Learning outcomes

- Understand principles related to patient assessment and therapeutic intervention.
- Develop psychomotor skills in patient assessment and therapeutic intervention within a framework of ethical patient interaction.
- Demonstrate practical use of anatomical knowledge related to patient assessment and basic intervention.
- Demonstrate understanding of the role Chiropractic has in delivery of primary health care, both now and throughout history.
- Understand basic properties of solids, liquids, and gases, including atomic theory, elasticity, and fluid statistic and dynamics, as applied to physiological problems.
- Analyse and report quantitative data using graphs, tables, and verbal explanations.

- Physics: Laboratory assessment

Engaged and Ethical Local and Global citizens

As local citizens our graduates will be aware of indigenous perspectives and of the nation's historical context. They will be engaged with the challenges of contemporary society and with knowledge and ideas. We want our graduates to have respect for diversity, to be open-minded, sensitive to others and inclusive, and to be open to other cultures and perspectives: they should have a level of cultural literacy. Our graduates should be aware of disadvantage and social justice, and be willing to participate to help create a wiser and better society.

This graduate capability is supported by:

Learning outcomes

- Understand principles related to patient assessment and therapeutic intervention.
- Develop psychomotor skills in patient assessment and therapeutic intervention within a framework of ethical patient interaction.

Assessment tasks

- Chiropractic: participation
- Chiropractic: Online Quiz
- Chiropractic: Spot Test1
- Chiropractic: Spot Test2
- Chiropractic: Theory exam
- Chiropractic: Practical exam

Socially and Environmentally Active and Responsible

We want our graduates to be aware of and have respect for self and others; to be able to work with others as a leader and a team player; to have a sense of connectedness with others and country; and to have a sense of mutual obligation. Our graduates should be informed and active participants in moving society towards sustainability.

This graduate capability is supported by:

Learning outcomes

- Understand principles related to patient assessment and therapeutic intervention.
- Develop safe and competent laboratory skills in handling equipment and making measurements.

Assessment tasks

- Chiropractic: Online Quiz
- Chiropractic: Spot Test1
- Chiropractic: Spot Test2
- Chiropractic: Theory exam
- Chiropractic: Practical exam
- Physics: Laboratory assessment

Changes from Previous Offering

Physics component now at end of semester.

Chiropractic practical exam (OSCE) brought forward to cater for re-scheduled physics

New material introduced in Chiropractic lab: Therapeutic intervention (4 hours) to align with ongoing curricular review.
