Unit description

This unit explores employee training and development in the contemporary workplace. It provides students with knowledge of a range of theories and practical perspectives relating to training within organisations. Students will gain a familiarity in training needs analysis, the development and implementation of training material, and training evaluation. Practical components of the unit focus on assessing the need for training, implementing training within an organisational context, and evaluating the outcomes of training.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

- Understand the role and effectiveness of training for achieving different objectives
- Understand the stages involved in constructing and delivering a training program, including training needs analysis and training evaluation
- Critically reflect on and evaluate contemporary approaches to training and the challenges of training in organisations
- Prepare and carry out a training needs analysis

- Plan and design a training program to meet clear learning objectives
- Present and defend the case for a training program or syllabus
- Develop and present courseware
- Demonstrate effective interpersonal communication through written, oral and team-based activities

General Assessment Information

All assessments are to be submitted through iLearn. Instructions are available under 'Assignments' on the iLearn unit website.

Assessment Tasks

Name	Weighting	Hurdle	Due
Training Needs Assessment (TNA)	50%	No	TBA
Exemplar Training Package	50%	No	TBA
Multiple Choice Questions	0%	No	06/11/19

Training Needs Assessment (TNA)

Due: **TBA**

Weighting: **50%**

This exercise has been designed to assess students' competence in preparing, conducting and interpreting a TNA, and communicating these outcomes in a written report. The task will require the development of a short survey or interview protocol, the administration of the survey/interview, and the interpretation of the results. Students will be expected to develop a report on the administration and outcomes of the TNA that proposes key learning requirements and a syllabus that meets the particular needs of the organisation.

An 'elements of assessment' document is provided on iLearn to assist in completing this assessment task.

On successful completion you will be able to:

- Understand the role and effectiveness of training for achieving different objectives
- Understand the stages involved in constructing and delivering a training program, including training needs analysis and training evaluation
- Critically reflect on and evaluate contemporary approaches to training and the challenges of training in organisations
- Prepare and carry out a training needs analysis
- Demonstrate effective interpersonal communication through written, oral and team-

based activities

Exemplar Training Package

Due: **TBA**

Weighting: **50%**

This exercise has been designed to build on the outcomes of Assessment Task I. In this case, students will select a component of their training course and develop a training package that includes the following:

- A lesson plan that incorporates a list of topics, the format in which they will be delivered, and the process of assessment (for the training package);
- A training exemplar for one learning activity (approximately 10 minutes) that forms part of the training package. The exemplar should contain content materials (including any overheads, workbooks or handouts for the trainees) and a lesson plan incorporating learning objectives and an assessment strategy;

Note that this component requires the submission of actual training materials. Students will be assessed on the quality of the training materials provided. If, for example, the learning activity chosen is a role play on 'conflict resolution', students are expected to submit written notes on the role play scenario itself, instructions/scripts/background notes for the participants, and notes for the trainer on how it should be run (i.e. a lesson plan). The lesson plan should contain sufficient information for a trainer to be able to deliver the training (information on how long it should run for, what resources are required, tips on how to provide feedback to participants, etc).

An 'elements of assessment' document is provided on iLearn to assist in completing this assessment task.

On successful completion you will be able to:

- Understand the role and effectiveness of training for achieving different objectives
- Plan and design a training program to meet clear learning objectives
- Present and defend the case for a training program or syllabus
- Develop and present courseware
- Demonstrate effective interpersonal communication through written, oral and team-based activities

Multiple Choice Questions

Due: **06/11/19**

Weighting: **0%**

Completion of the multiple choice questions associated with each video recording is a terms requirement. While it does not carry any weight towards the final mark, the failure to complete the questions successfully may result in failure of the unit.

On successful completion you will be able to:

- Understand the role and effectiveness of training for achieving different objectives
- Critically reflect on and evaluate contemporary approaches to training and the challenges of training in organisations

Delivery and Resources

This unit consists of alternating face-to-face and on-line classes. Face-to-face classes will be held between 5.00pm and 7.00pm on Mondays. Where a class is delivered on-line, students will be expected to: (a) Review a 20 minute video clip, read the relevant chapter in the textbook, together with one or two additional papers, answer questions to a short, on-line quiz, and undertake any activities as directed for that week.

It is highly recommended that you obtain the following text:
