Unit description

This unit examines scientific principles in managing waste, the industrial control of pollutant emissions, and the processes associated with management and reduction of environmental contaminants. The unit introduces students to industrial environmental practices, industrial ecology and quality control and management relating to air, land and water pollution and waste issues.

### Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

# **Learning Outcomes**

On successful completion of this unit, you will be able to:

Understand the basic scientific and technical principles involved in pollution control and waste management.

Apply this understanding of pollution control techniques and waste management strategies to relevant real world scenarios.

Appreciate the requirements for corporate pollution control and waste management

versus corporate social responsibility.

Knowledge of essential regulatory requirements for pollution control, remediation and waste management.

Critically analyse pollution control and waste matters for management and express findings in clear and cogent reports and/or seminars.

# **General Assessment Information**

The general assessment criteria that is used to examine the overall attainment of knowledge, skills and abilities includes the following, where the level of achievement is expected to be at the standard of a post-graduate student in each of the criteria. GradeMark Rubrics will be used to mark and grade field trip report.

General Assessment Criteria	Expectation of achievement at the post-graduate level
<ul> <li>Addressing the task that is specified (or answering the question that is asked) for each assessment, including staying within the word limit unless otherwise specified.</li> </ul>	Students are able to complete the assessments as instructed.
<ul> <li>Demonstration of knowledge and research skills through written material and verbal presentations.</li> </ul>	<ul> <li>Students have engaged in the subject matter and task.</li> <li>Students can show understanding of the topic through an analysis and well-developed discussion of the topic.</li> </ul>
<ul> <li>Demonstration of independent thinking through written material and verbal presentations.</li> </ul>	<ul> <li>Students are able to demonstrate in-depth thinking through discussion that places the topic in the broader context.</li> <li>Students are able to demonstrate initiative and independent contributions through new ideas.</li> </ul>
• Appropriate <b>use and citation of relevant literature</b> , including scientific research papers and reports. Citation of references within the text and reference list is correct and consistent, with no abbreviations.	<ul> <li>Students will undertake literature searches and demonstrate appropriate selection of relevant articles in support of their arguments.</li> </ul>
• Demonstration of <b>good planning</b> with a clear structure, headings, and a logical argument based firmly on the literature cited.	<ul> <li>Students are able to structure written (and verbal) work to convey ideas clearly and logically.</li> </ul>
<ul> <li>Presentation of <b>legible work</b> with: correct grammar and spelling, correct use of professional terminology as appropriate, and correct use of SI units, abbreviations and acronyms.</li> </ul>	Students will submit work that is presented in a professional manner.

<ul> <li>Figures, tables and other supporting information are legible and</li></ul>	<ul> <li>Students are able to use figures and</li></ul>
necessary, with reference to these in the text. Full and appropriate	tables to summarise or present
captions are included on each as well as the source where relevant.	information and data effectively.
Effective communication of research outcomes.	<ul> <li>Students are able to get their message across clearly and concisely.</li> </ul>

#### Penalties for late assessments and extension requests

All assessments must be completed and submitted, on time and in full, in order to receive a minimum pass grade.

Penalties for late written assessments will be a minimum of 10% per day (including weekend days) or part thereof. These deadlines and penalties *will* be imposed. Allowing some students to hand assessments in late is unfair to those who meet the deadlines.

The deadlines for assessments are not negotiable except in the circumstances outlined below. Please take note of the DAYS at which work is due and let the Convenor know of problems in advance or as soon as possible, not after the event: they are likely to be much more sympathetic and flexible if you follow this advice.

The University has a Disruption to Studies Policy, which can be accessed here: <u>http://mq.edu.au/</u>policy/docs/disruption\_studies/policy.html

In accordance with the Policy, students that experience a disruption to studies which is serious, unavoidable and greater than 3 days as per the Policy guidelines, *and* wish to request an assessment extension on these grounds, must submit a formal application for special consideration to the Science Faculty. <u>http://science.mq.edu.au/current-students/postgraduate-students/</u>

If a student experiences a disruption to studies that is unavoidable, but not serious and is of 3 days or less in duration, they can apply for special consideration to the convenor under the following conditions:

- Personal illness or illness of a child If an assessment is submitted after the due date, a
  medical certificate or a letter with appropriate supporting documents outlining the
  extenuating circumstances must be provided that covers the day that the assessment
  was due, and/or the days preceding.
- Work commitments Work commitments will not be viewed as grounds for an extension unless your work commitment requires you to be away from home for at least 1 overnight or requires you to be at work for longer than 12 hours per day, e.g. field work or interstate meetings.
- Other family commitments or emergencies If you have other commitments that take you away from study you should plan for these in advance as part of an effective individual

study plan. Extensions will only be considered if your ability to submit an assessment on time was caused by an unexpected event where you can demonstrate: that the event was not foreseeable or predictable **and** that the event substantially impacted upon your ability to complete the Assessment Task **and** that there was alternative option available.

The number of days of disruption and the timing of disruption will be taken into considered in determining whether special consideration should be granted or not. The ultimate grounds for the decision will be whether the disruption was unavoidable and fairness with respect to other students.

#### **Requirements to Complete this Unit Successfully**

#### Attendance and assessment submission

In order to successfully complete this unit and receive a minimum Pass grade, students should:

- 1. Attend all lecture/tutorial sessions;
- 2. Attend and participate in all field trips;
- 3. Submit all assessments;
- 4. Meet the minimum level of achievement expected of a postgraduate student, as outlined in the General Assessment Criteria.

#### **Unit Rubric**

In ENVS829, it is expected that your assessments will be very high quality and demonstrate comprehension of course content including knowledge, skills and abilities which are at the standard of a postgraduate level. Grades for the unit as a whole will be awarded according to the following rubric.

	Developing	Functional	Proficient	Advanced
General description of the level of attainment	Has not yet reached the desired standard in the general assessment criteria. Shows no or limited understanding of required concepts, and no or limited skills and abilities.	Has reached the basic academic standards in the general assessment criteria. Shows a basic understanding of required concepts, and basic skills and abilities. Needs considerable support and guidance.	Has reached the standards expected. Can work independently with some guidance.	Has gone beyond the expected standards. Exhibits high levels of independence and can use initiative to generate new ways of completing tasks. Demonstrates high level professional capabilities.
	A <b>fail</b> grade (or under some circumstances, a conceded pass) would be given.	A <b>pass</b> grade would be awarded.	A <b>credit</b> grade would be awarded.	A grade of <b>distinction</b> or <b>high</b> <b>distinction</b> would be awarded.

# **Assessment Tasks**

Name	Weighting	Hurdle	Due
Sydney Harbour Litter Audit	50%	No	04/10/2019
Scenario Presentation	25%	No	30/10/2019
In Class Exam	25%	No	06/11/19

## Sydney Harbour Litter Audit

#### Due: 04/10/2019

#### Weighting: 50%

This assessment task will be based on Field Trip 1 and includes a litter audit of rubbish in Sydney Harbour. The Department of Roads and Maritime Services (RMS) conducts daily cleaning of the harbour for maintaining safe waterways. However, information on what and how much is collected is not detailed. In conjunction with RMS staff, the task will involve working in small groups to assess the loads (types, amounts and volumes) of litter collected over a week. Each group will conduct a one day audit using the modified NSW EPA local litter check guidelines. The task is to write an individual report (maximum 4500 words) based on your group's data to assess the litter loads in Sydney Harbour and whether the recent Return and Earn container deposit scheme has made any changes to previous years data. The report should include any management recommendations based on your findings. This report should follow standard report writing format (e.g. Introduction and aim, Methods, Results, Discussion, Conclusions and Recommendations and References). Further details will be provided on the Unit's iLearn site.

On successful completion you will be able to:

- Apply this understanding of pollution control techniques and waste management strategies to relevant real world scenarios.
- Appreciate the requirements for corporate pollution control and waste management versus corporate social responsibility.
- Critically analyse pollution control and waste matters for management and express findings in clear and cogent reports and/or seminars.

# Scenario Presentation

#### Due: **30/10/2019** Weighting: **25%**

Students working in groups will be assigned a scenario topic in Week 9 with which they have to assess the opportunities and challenges in technologies and management of pollution control and waste management to that scenario. A group presentation of the findings will be presented

in class. Each group will give a 20 minute presentation in class and submit a powerpoint handout. A peer assessment will undertaken via the SPARKPLUS program with this influencing the individual's group mark assigned. Further details will be provided on the Unit's iLearn page.

On successful completion you will be able to:

- Understand the basic scientific and technical principles involved in pollution control and waste management.
- Apply this understanding of pollution control techniques and waste management strategies to relevant real world scenarios.
- Appreciate the requirements for corporate pollution control and waste management versus corporate social responsibility.
- Knowledge of essential regulatory requirements for pollution control, remediation and waste management.
- Critically analyse pollution control and waste matters for management and express findings in clear and cogent reports and/or seminars.

# In Class Exam

Due: 06/11/19 Weighting: 25%

Students will undertake a final exam based on the lecture, tutorial and selected field trips. This will be conducted in class and be made up of short answer, long answer and essay style questions. The exam length is 1.5 hours.

On successful completion you will be able to:

- Understand the basic scientific and technical principles involved in pollution control and waste management.
- Knowledge of essential regulatory requirements for pollution control, remediation and waste management.

# **Delivery and Resources**

Delivery is via a weekly 3 hour Lecture/tutorial block.

In Teaching Weeks 6,and 8 a half day field trip outside the normal class time will take place. This will replace the scheduled class for that week and are compulsory. Access to Field Trips is at students own means. Closed in shoes, sensible field wear, hat, water bottle, notebook and pencil are needed for all field trips. Rain coat may be required.

The Week 9 practical scenario exercise (in prescribed class time) and the associated Week 12 group presentation and peer assessment are also compulsory.

#### Field Trip Work, Health and Safety

The safety of you and those around you is our highest priority. Consequently, ALL participants in fieldwork activities are obliged to work and behave appropriately in the field, and to take care to protect their own health, safety and welfare and that of fellow fieldwork participants. You are required to follow instructions from the Fieldwork Leader at all times. Prior to the fieldwork, you must let the Fieldwork Leader know of any allergies, special dietary requirements or medical considerations that may affect your ability to participate in fieldwork. You will need to complete a declaration of a known medical condition, outlining a treatment plan for your condition. Details of your responsible next of kin must also be provided in-case of emergencies. This is all undertaken via the online Field Friendly link you will be provided.

You are required to wear and carry clothing and footwear as appropriate to the fieldwork situation. Your Fieldwork Leader will advise you as to what these are prior to the fieldtrip.

Irrespective of the activity, footwear must be worn. For all fieldwork activities, a hat, sunscreen, insect repellent and items to protect against unexpected weather changes, such as rain & cold, are strongly recommended. The Fieldwork Leader reserves the right to exclude anyone that is ill-equipped from the activity.

If you are taking any medication, please ensure that you take sufficient supplies with you on the field trip. The University's staff are unable, by law, to provide this to you. This includes pain relief, such as panadol, cold and flu medication and anti-histamines for allergies. If you need to leave the field location for any reason prior to completion of the scheduled activities, you must first inform the Fieldwork Leader. In the event of illness or injury, please let the Fieldwork Leader know immediately. All injury's or incidents must be reported via the on-line reporting system: http://www.ohs.mq.edu.au/form5a.php. Alcohol is a significant contributing factor in many incidents and acts of prejudicial conduct. Alcohol must not be consumed when undertaking fieldwork activities or when using a motor vehicle/machinery.

For more information, contact:

Russell Field - Fieldwork Manager (Dept of Environmental Sciences) Macquarie University NSW 2109. (Ph.) 98508341

# **Policies and Procedures**

Macquarie University policies and procedures are accessible from Policy Central (https://staff.m q.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-centr al). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Grade Appeal Policy
- Complaint Management Procedure for Students and Members of the Public
- Special Consideration Policy (Note: The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.)

Undergraduate students seeking more policy resources can visit the <u>Student Policy Gateway</u> (htt <u>ps://students.mq.edu.au/support/study/student-policy-gateway</u>). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit Policy Central (http s://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/p olicy-central).

### **Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/study/getting-started/student-conduct

### Results

Results published on platform other than <u>eStudent</u>, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in <u>eStudent</u>. For more information visit <u>ask.mq.edu.au</u> or if you are a Global MBA student contact globalmba.support@mq.edu.au

### Student Support

Macquarie University provides a range of support services for students. For details, visit <u>http://stu</u> dents.mq.edu.au/support/

### Learning Skills

Learning Skills (<u>mq.edu.au/learningskills</u>) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

# Student Services and Support

Students with a disability are encouraged to contact the **Disability Service** who can provide appropriate help with any issues that arise during their studies.

# **Student Enquiries**

For all student enquiries, visit Student Connect at ask.mq.edu.au

If you are a Global MBA student contact globalmba.support@mq.edu.au

# IT Help

For help with University computer systems and technology, visit <u>http://www.mq.edu.au/about\_us/</u>offices\_and\_units/information\_technology/help/.

When using the University's IT, you must adhere to the <u>Acceptable Use of IT Resources Policy</u>. The policy applies to all who connect to the MQ network including students.

# **Graduate Capabilities**

# PG - Capable of Professional and Personal Judgment and Initiative

Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

#### Learning outcomes

- Appreciate the requirements for corporate pollution control and waste management versus corporate social responsibility.
- Critically analyse pollution control and waste matters for management and express findings in clear and cogent reports and/or seminars.

#### Assessment tasks

- Sydney Harbour Litter Audit
- Scenario Presentation

### PG - Discipline Knowledge and Skills

Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

#### Learning outcomes

- Understand the basic scientific and technical principles involved in pollution control and waste management.
- Knowledge of essential regulatory requirements for pollution control, remediation and waste management.
- Critically analyse pollution control and waste matters for management and express findings in clear and cogent reports and/or seminars.

#### Assessment tasks

- Scenario Presentation
- In Class Exam

# PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

#### Learning outcomes

- Apply this understanding of pollution control techniques and waste management strategies to relevant real world scenarios.
- Critically analyse pollution control and waste matters for management and express findings in clear and cogent reports and/or seminars.

### Assessment tasks

- Sydney Harbour Litter Audit
- Scenario Presentation
- In Class Exam

### PG - Research and Problem Solving Capability

Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

#### Learning outcomes

- Apply this understanding of pollution control techniques and waste management strategies to relevant real world scenarios.
- Appreciate the requirements for corporate pollution control and waste management versus corporate social responsibility.
- Critically analyse pollution control and waste matters for management and express findings in clear and cogent reports and/or seminars.

### **Assessment tasks**

- Sydney Harbour Litter Audit
- Scenario Presentation

# PG - Effective Communication

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.

This graduate capability is supported by:

#### Learning outcome

• Critically analyse pollution control and waste matters for management and express findings in clear and cogent reports and/or seminars.

### Assessment tasks

- Scenario Presentation
- In Class Exam

# PG - Engaged and Responsible, Active and Ethical Citizens

Our postgraduates will be ethically aware and capable of confident transformative action in relation to their professional responsibilities and the wider community. They will have a sense of connectedness with others and country and have a sense of mutual obligation. They will be able to appreciate the impact of their professional roles for social justice and inclusion related to national and global issues

This graduate capability is supported by:

#### Learning outcome

• Appreciate the requirements for corporate pollution control and waste management versus corporate social responsibility.

### Assessment task

Scenario Presentation

# **Changes from Previous Offering**

The Unit content has been altered from previous offerings with a more even spread of

pollution control and waste management issues covered.

- An increase in field trips examining real world scenarios have been added.
- · Assessment tasks have been altered to better assess theoretical knowledge with

practical applications
