Unit description

This unit is designed to introduce the basic concept of interpreting and help students develop key interpreting techniques such as listening skills, text analysis, memory retention, note-taking and oral translation skills. The unit will build on theoretical principles introduced in TRAN870, and will enable students to apply theory to practice, helping students to recognise factors that influence the effective use of different interpreting techniques in different contexts, as well as the decision making involved in selecting one interpreting technique over another. Participants will be expected to perform individual, peer and group evaluations.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

Demonstrate the ability to accurately transfer messages from B language to A language

in different modes

Develop essential interpreting techniques: segmentation, reformulation, prediction and note-taking

Understand discourse for the purpose of interpreting

Develop an understanding of extra-linguistic and cultural aspects of discourse

Develop domain-specific knowledge

Demonstrate an understanding of interpreter roles in practice

Establish self-directed learning skills to enhance professional skills

Demonstrate reflective and critical practice to become life-long learners
