Prerequisites

Admission to MConsBiol or GradDipConsBiol or GradCertConsBiol or MEnv or MEnvPlan or GradDipEnv or MMarScMgt or MSusDev or GradDipSusDev or MSc or MPlan or MSocEntre or GradCertSusDev or GradDipSIA or MScInnovation

Corequisites

Co-badged status

Unit description

This unit explores the impacts of climate change on the biosphere, and adaptation options. Topics include biodiversity and conservation, invasive species and their management, impacts on agriculture and urban ecosystems, and the consequences for human health and well-being in both developed and developing countries. Students will explore what is projected to happen if the international target of restricting global temperature rise to no more than 2 degree Celcius is not met, and why even this target will have critical impacts. Students will meet guest scientists and government and industry experts who are at the forefront of solving the immense challenge that climate change brings to the biosphere.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are

available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

- Analyse, critique and synthesise knowledge about the impacts of climate change on a broad range of sectors, and drawing connections across fields of knowledge
- Utilise research skills to identify impacts of climate change on a given sector
- Demonstrate creative problem solving skills to develop adaptation strategies that increase resilience to climate change
- Identify areas of scientific uncertainty and complexity with regards to different sectors, and account for this in adaptation strategies
- Identify barriers and challenges to implementing adaptation responses
- Transfer knowledge and skills regarding adaptation planning to industries/sectors beyond your personal experience

General Assessment Information

Students must attempt all assessments to qualify for passing this unit.

Assessment Tasks

Name	Weighting	Hurdle	Due
Quiz	21%	Yes	Week 5; Week 9; Week 13
Oral Presentation	15%	Yes	On-going
Impacts & adaptation	24%	Yes	09/09/2018, Week 7
Adaptation Plan	40%	Yes	08/11/2018, Week 13

Quiz

Due: **Week 5; Week 9; Week 13**

Weighting: **21%**

This is a hurdle assessment task (see [assessment policy](#) for more information on hurdle assessment tasks)

Throughout the semester you will undertake three quizzes (worth 7% each), based on lectures, tutorials and recommended readings. The quizzes in Week 5 and 9 will be online, while the final quiz will be in class. As these quizzes are a hurdle assessment, each quiz must be attempted in order to pass the unit.

On successful completion you will be able to:

- Analyse, critique and synthesise knowledge about the impacts of climate change on a broad range of sectors, and drawing connections across fields of knowledge
- Identify areas of scientific uncertainty and complexity with regards to different sectors, and account for this in adaptation strategies
- Identify barriers and challenges to implementing adaptation responses
- Transfer knowledge and skills regarding adaptation planning to industries/sectors beyond your personal experience

Oral Presentation

Due: **On-going**

Weighting: **15%**

This is a hurdle assessment task (see [assessment policy](#) for more information on hurdle assessment tasks)

The ability to identify scientifically sound information on climate change and to communicate this to others are prerequisites for advocacy, action and environmental literacy. At some point in the semester, each student will be expected to give an oral presentation on some aspect of that week's topic. Between 3-4 students will be presenting each week.

On successful completion you will be able to:

- Analyse, critique and synthesise knowledge about the impacts of climate change on a broad range of sectors, and drawing connections across fields of knowledge
- Utilise research skills to identify impacts of climate change on a given sector
- Demonstrate creative problem solving skills to develop adaptation strategies that increase resilience to climate change
- Identify areas of scientific uncertainty and complexity with regards to different sectors, and account for this in adaptation strategies
- Identify barriers and challenges to implementing adaptation responses
- Transfer knowledge and skills regarding adaptation planning to industries/sectors beyond your personal experience

Impacts & adaptation

Due: **09/09/2018, Week 7**

Weighting: **24%**

This is a hurdle assessment task (see [assessment policy](#) for more information on hurdle assessment tasks)

You will explore an Australian system that has already been impacted by climate change, develop a report outlining these impacts and likely adaptation strategies (~1200 words), and an

A3-page infographic summarising your report for a non-science audience.

On successful completion you will be able to:

- Analyse, critique and synthesise knowledge about the impacts of climate change on a broad range of sectors, and drawing connections across fields of knowledge
- Utilise research skills to identify impacts of climate change on a given sector
- Demonstrate creative problem solving skills to develop adaptation strategies that increase resilience to climate change
- Identify areas of scientific uncertainty and complexity with regards to different sectors, and account for this in adaptation strategies
- Identify barriers and challenges to implementing adaptation responses
- Transfer knowledge and skills regarding adaptation planning to industries/sectors beyond your personal experience

Adaptation Plan

Due: **08/11/2018, Week 13**

Weighting: **40%**

This is a hurdle assessment task (see [assessment policy](#) for more information on hurdle assessment tasks)

Adaptation assessments are useful tools to identify actions that can be undertaken now or in the near future to anticipate the impacts of climate change and reduce vulnerability. For this assessment, you will select an area of interest and follow one of several formats to develop an Adaptation Plan. The assessment will be approximately 3000 words in length.

On successful completion you will be able to:

- Analyse, critique and synthesise knowledge about the impacts of climate change on a broad range of sectors, and drawing connections across fields of knowledge
- Utilise research skills to identify impacts of climate change on a given sector
- Demonstrate creative problem solving skills to develop adaptation strategies that increase resilience to climate change
- Identify areas of scientific uncertainty and complexity with regards to different sectors, and account for this in adaptation strategies
- Identify barriers and challenges to implementing adaptation responses
- Transfer knowledge and skills regarding adaptation planning to industries/sectors beyond your personal experience

Delivery and Resources

Required and recommended texts and/or materials

There is no recommended text for this unit. However, readings will be provided for each lecture.

Unit web page

PowerPoint slides, lecture recordings, unit readings, copies of all unit hand-outs and helpful resources for completion of assessments will be available through iLearn. Consequently, it is strongly recommended that you interact with the BIOL876 online unit regularly. To access the online unit, go to <https://iLearn.mq.edu.au/login/MQ/> and type in your Macquarie OneID Username and password.

Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central \(https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central\)](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- [Academic Appeals Policy](#)
- [Academic Integrity Policy](#)
- [Academic Progression Policy](#)
- [Assessment Policy](#)
- [Fitness to Practice Procedure](#)
- [Grade Appeal Policy](#)
- [Complaint Management Procedure for Students and Members of the Public](#)
- [Special Consideration Policy](#) (**Note:** *The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.*)

Undergraduate students seeking more policy resources can visit the [Student Policy Gateway \(https://students.mq.edu.au/support/study/student-policy-gateway\)](https://students.mq.edu.au/support/study/student-policy-gateway). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit [Policy Central \(https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central\)](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central).

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: <https://students.mq.edu.au/study/getting-started/student-conduct>

Results

Results published on platform other than [eStudent](#), (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](#). For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- [Workshops](#)
- [StudyWise](#)
- [Academic Integrity Module for Students](#)
- [Ask a Learning Adviser](#)

Student Services and Support

Students with a disability are encouraged to contact the [Disability Service](#) who can provide appropriate help with any issues that arise during their studies.

Student Enquiries

For all student enquiries, visit Student Connect at ask.mq.edu.au

If you are a Global MBA student contact globalmba.support@mq.edu.au

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

PG - Capable of Professional and Personal Judgment and Initiative

Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

Learning outcomes

- Demonstrate creative problem solving skills to develop adaptation strategies that increase resilience to climate change
- Identify barriers and challenges to implementing adaptation responses

Assessment tasks

- Oral Presentation
- Adaptation Plan

PG - Discipline Knowledge and Skills

Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

Learning outcomes

- Analyse, critique and synthesise knowledge about the impacts of climate change on a broad range of sectors, and drawing connections across fields of knowledge
- Utilise research skills to identify impacts of climate change on a given sector
- Identify areas of scientific uncertainty and complexity with regards to different sectors, and account for this in adaptation strategies
- Identify barriers and challenges to implementing adaptation responses
- Transfer knowledge and skills regarding adaptation planning to industries/sectors beyond your personal experience

Assessment tasks

- Quiz
- Oral Presentation
- Impacts & adaptation
- Adaptation Plan

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes

- Analyse, critique and synthesise knowledge about the impacts of climate change on a broad range of sectors, and drawing connections across fields of knowledge
- Utilise research skills to identify impacts of climate change on a given sector

- Demonstrate creative problem solving skills to develop adaptation strategies that increase resilience to climate change
- Identify areas of scientific uncertainty and complexity with regards to different sectors, and account for this in adaptation strategies
- Identify barriers and challenges to implementing adaptation responses
- Transfer knowledge and skills regarding adaptation planning to industries/sectors beyond your personal experience

Assessment tasks

- Quiz
- Oral Presentation
- Impacts & adaptation
- Adaptation Plan

PG - Research and Problem Solving Capability

Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

Learning outcomes

- Analyse, critique and synthesise knowledge about the impacts of climate change on a broad range of sectors, and drawing connections across fields of knowledge
- Utilise research skills to identify impacts of climate change on a given sector
- Demonstrate creative problem solving skills to develop adaptation strategies that increase resilience to climate change
- Identify areas of scientific uncertainty and complexity with regards to different sectors, and account for this in adaptation strategies
- Identify barriers and challenges to implementing adaptation responses
- Transfer knowledge and skills regarding adaptation planning to industries/sectors beyond your personal experience

Assessment tasks

- Quiz
- Oral Presentation
- Impacts & adaptation
- Adaptation Plan

PG - Effective Communication

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.

This graduate capability is supported by:

Learning outcomes

- Analyse, critique and synthesise knowledge about the impacts of climate change on a broad range of sectors, and drawing connections across fields of knowledge
- Demonstrate creative problem solving skills to develop adaptation strategies that increase resilience to climate change
- Identify areas of scientific uncertainty and complexity with regards to different sectors, and account for this in adaptation strategies
- Identify barriers and challenges to implementing adaptation responses
- Transfer knowledge and skills regarding adaptation planning to industries/sectors beyond your personal experience

Assessment tasks

- Oral Presentation
- Impacts & adaptation
- Adaptation Plan

PG - Engaged and Responsible, Active and Ethical Citizens

Our postgraduates will be ethically aware and capable of confident transformative action in relation to their professional responsibilities and the wider community. They will have a sense of connectedness with others and country and have a sense of mutual obligation. They will be able to appreciate the impact of their professional roles for social justice and inclusion related to national and global issues

This graduate capability is supported by:

Learning outcomes

- Analyse, critique and synthesise knowledge about the impacts of climate change on a broad range of sectors, and drawing connections across fields of knowledge
- Identify barriers and challenges to implementing adaptation responses

Assessment tasks

- Quiz

- Oral Presentation
- Impacts & adaptation
- Adaptation Plan

Changes from Previous Offering

The participation score from the 2018 offering of this unit has been removed.
