Prerequisites

Admission to MEnv or MEnvEd or MEnvMgt or MEnvStud or MEnvPlan or MPlan or GradCertEnvPlan or MWldMgt or MPPP or MMarScMgt or MEnvLaw or GradDipEnv or MSusDev or GradCertSusDev or GradDipSusDev or GradCertSIA or GradDipSIA or MConsBiol or GradDipConsBiol or MDevStud or MPASRMDevStud or MPPPMDevStud or MSc in (Biodiversity Conversation or Remote Sensing and GIS or Environmental Health)

Corequisites

Co-badged status

Unit description

This unit is designed to enhance understanding of how environmental impact assessment (EIA) is carried out in Australia and internationally. The focus is on the preparation and evaluation of environmental impact assessment statements, and on the design and performance of EIA systems. Environmental impact statements prepared for the New South Wales context, as well as for other jurisdictions in Australia and some overseas countries, will be examined.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

Identify and describe environmental issues that might be subject to EIA

Describe the framework (ie international, government, community, proponents,

expertise) within which EIAs are carried out, and recognise the issues arising out of the

interactions within this framework

Demonstrate an effective grasp of the international literature relevant to EIA

Begin to understand the roles of cultural, scientific, social, economic, and legal processes in EIA in all spheres of government within Australia and other nations

Develop a skill set and strategies for designing, managing and evaluating EIA processes and Environmental Impact Statement (EIS)

Critically analyse the EIA process and stakeholder responses to the identified environmental impacts of activities and/or developments

Evaluate policies and plans, proposed in the EIA process for the management of the impacts of activities and/or developments, from a sustainable development perspective

Understand the sustainable development implications of EIA processes adopted in different nations

General Assessment Information

Word Counts

References are not included in the word counts set for each assignment.

A tolerance of plus or minus 10% is allowed for, on the set lengths. So for example, a 1,000 word essay could be anywhere from 900 to 1,100 words long. If you submit assignments that are shorter or longer than this, you may be penalised for length.

Submission of Assignments

Assignments 1 and 2a are to be submitted electronically via iLearn by midnight on the due date.

Assignments 1 and 2a will be reviewed by Turnitin, which helps us check whether sources are properly acknowledged, and whether assignments submitted are each student's own work.

Acknowledging your debts to other people's work - your use of their exact words or their ideas - is fundamental to good scholarship. We recommend reviewing Georgetown University's very helpful guide to honest, transparent acknowledgment of your sources: <http://honorcouncil.georgetown.edu/whatisplagiarism>.

Late submissions

To request an extension, make the request for Special Consideration through ask.mq.edu.au, providing a clear explanation and providing supporting documentation where needed (e.g. a Macquarie Professional Authority form).

Unless a Special Consideration request has been submitted and approved, (a) a penalty for lateness will apply – two (2) marks out of 100 will be deducted per day for assignments

submitted after the due date – **and (b) no assignment will be accepted more than seven (7) days (incl. weekends) after the original submission deadline.**

Please plan your work for your units at the start of the Session, and keep track of how much time you have available for each assignment. **Please get help if you are having trouble completing work on time.** Visit a doctor, a Campus Wellbeing service (<https://students.mq.edu.au/support/wellbeing>), talk to your tutor or the Unit Convenor for academic help, or whatever else is appropriate.

Assessment Tasks

Name	Weighting	Hurdle	Due
1a - EIA System Review Outline	5%	No	Midnight Monday 26th August
1b - EIA System Review	35%	No	Midnight Sunday 15th September
2a - EIS Review	40%	No	Midnight Monday 7th October
2b - Group Presentation	20%	No	Saturday 26th October in class

1a - EIA System Review Outline

Due: **Midnight Monday 26th August**

Weighting: **5%**

Brief outline of your analysis of the EIA System for Major Projects - 300 words plus references

Provide a brief outline, using section headings and dot points, that sketches the assessment of the EIA system that you propose to defend. For each conclusion you expect to draw about the strengths and weakness of the screening and assessment processes provide (i) the claim you are making, (ii) the evidence you are relying on (usually journal articles), and (iii) the reasons why the claim makes sense, given the evidence you have. Append a list of at least 10 references that indicate the literatures you propose to draw on in your assessment. (The references are not included in the word count.)

On successful completion you will be able to:

- Identify and describe environmental issues that might be subject to EIA
- Describe the framework (ie international, government, community, proponents, expertise) within which EIAs are carried out, and recognise the issues arising out of the interactions within this framework
- Demonstrate an effective grasp of the international literature relevant to EIA

1b - EIA System Review

Due: **Midnight Sunday 15th September**

Weighting: **35%**

Review of an EIA System for Major Projects - 1,700 words.

Critically assess an EIA system used for assessment of major projects from the viewpoint of sustainability.

Describe the screening and assessment processes in the EIA system, and evaluate how well they support sustainable development, critically assessing (i) the EIA system's design and (ii) how it operates in practice.

Screening processes ask: should the environmental impacts of a project be assessed (using the major projects EIA system)? **Assessment processes** ask: what are the expected and possible impacts?, is the project acceptable as proposed?, and, how might problematic impacts be mitigated?

Weaknesses may be obvious in either or both of system design (e.g. sensitivity to cumulative impacts) and implementation (e.g. systemic corruption).

On successful completion you will be able to:

- Identify and describe environmental issues that might be subject to EIA
- Describe the framework (ie international, government, community, proponents, expertise) within which EIAs are carried out, and recognise the issues arising out of the interactions within this framework
- Demonstrate an effective grasp of the international literature relevant to EIA
- Begin to understand the roles of cultural, scientific, social, economic, and legal processes in EIA in all spheres of government within Australia and other nations
- Develop a skill set and strategies for designing, managing and evaluating EIA processes and Environmental Impact Statement (EIS)
- Critically analyse the EIA process and stakeholder responses to the identified environmental impacts of activities and/or developments
- Evaluate policies and plans, proposed in the EIA process for the management of the impacts of activities and/or developments, from a sustainable development perspective
- Understand the sustainable development implications of EIA processes adopted in different nations

2a - EIS Review

Due: **Midnight Monday 7th October**

Weighting: **40%**

Review of an Aspect of an EIS - 2,000 words

An EIS will be assigned to each project team, and each team will agree on which aspect, or part, of the EIS each team member will review for their individual assignment (2a). Each of the following could be the focus of an individual assignment: (i) ecosystem health; (ii) human health;

(iii) economic impacts; (iv) community consultation / community engagement; and
(v) management approach (including risk management).

The individual reports are to be objective and independent, and consider whether the project is *sustainable* development. Consider:

- whether the *scope* of the EIS's analysis is appropriate;
- whether the *methods* used to assess impacts (positive and negative) are appropriate;
- whether the *arguments* used to justify the proposal are sound.

On successful completion you will be able to:

- Identify and describe environmental issues that might be subject to EIA
- Begin to understand the roles of cultural, scientific, social, economic, and legal processes in EIA in all spheres of government within Australia and other nations
- Develop a skill set and strategies for designing, managing and evaluating EIA processes and Environmental Impact Statement (EIS)
- Evaluate policies and plans, proposed in the EIA process for the management of the impacts of activities and/or developments, from a sustainable development perspective
- Understand the sustainable development implications of EIA processes adopted in different nations

2b - Group Presentation

Due: **Saturday 26th October in class**

Weighting: **20%**

Group Presentation on an EIS - with a 1-2 page Handout & Slides

Each team of students will be allocated an EIS. Each EIS will be considered by two groups.

One group will prepare an assessment of the EIS as if they were a team of planning consultants working for the proponent; their job will be to present the case **for** approving the project, based on the EIS. The second group will prepare an assessment of the EIS as if they were a team of planning consultants working for a community or environment group; their job will be to present the case **against** approving the project in its current form, based on the EIS. The teams' arguments for and against the projects will be based on the individual assessments developed by team members for part 2a of this assignment.

On successful completion you will be able to:

- Identify and describe environmental issues that might be subject to EIA
- Begin to understand the roles of cultural, scientific, social, economic, and legal processes in EIA in all spheres of government within Australia and other nations
- Develop a skill set and strategies for designing, managing and evaluating EIA processes

and Environmental Impact Statement (EIS)

- Critically analyse the EIA process and stakeholder responses to the identified environmental impacts of activities and/or developments
- Evaluate policies and plans, proposed in the EIA process for the management of the impacts of activities and/or developments, from a sustainable development perspective
- Understand the sustainable development implications of EIA processes adopted in different nations

Delivery and Resources

Technology used and required

Students will need access to a computer and basic office software (eg. Microsoft Office or OpenOffice), and course web pages to complete assessment tasks. (The computers in the EMC2 building are usually available.) The unit's webpage is on iLearn: <https://ilearn.mq.edu.au>

Recommended Texts

The following texts are recommended background reading:

Lawrence, D P 2003, *Environmental Impact Assessment: Practical solutions to recurrent problems*, Wiley, New Jersey. (Copies of this may be accessible via Google.)

Elliott, M. 2014, *Environmental Impact Assessment in Australia*, The Federation Press, Sydney.

Finding relevant journal articles

Citing peer reviewed research is essential for all assignments. Access peer reviewed journal articles through the [University Library's website](#); use MultiSearch. [Google Scholar](#) is an excellent starting point. If you are off-campus, accessing Google Scholar from [the university library's home page](#) (see link below the Search box) will make it easier to get to journal articles.

The following databases of journal articles accessible through the [University Library](#) are also particularly recommended:

- Academic Search Premier
- JSTOR
- Scopus
- Web of Knowledge
- Web of Science

The library has also put together [helpful research guides](#) for many disciplines relevant to EIA, including Environmental Law, Environmental Science and Human Geography.

See the Unit's [iLearn home page](#) for further sources of information.

Writing Guide and Referencing

All written work must comply with the GSE Writing Guide for preparing written work available on

iLearn. Refer to it for details of how to reference sources, amongst other things.

Unit Schedule

The course is taught in block mode - over 5 days of workshops spread throughout the session (one Friday and four Saturdays):

- Saturday 3rd August
- Saturday 24th August
- Friday 13th September
- Saturday 5th October
- Saturday 26th October.

Teaching will start each day at 9:30am and finish at 5:00pm.

See the Macquarie University Timetable (<https://timetables.mq.edu.au>, search using "GEOP845") for details of rooms. We will be in a different room on the Friday.

See the Unit's iLearn page for details of the program.

Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central) (<https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central>). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- [Academic Appeals Policy](#)
- [Academic Integrity Policy](#)
- [Academic Progression Policy](#)
- [Assessment Policy](#)
- [Fitness to Practice Procedure](#)
- [Grade Appeal Policy](#)
- [Complaint Management Procedure for Students and Members of the Public](#)
- [Special Consideration Policy](#) (**Note:** *The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.*)

Undergraduate students seeking more policy resources can visit the [Student Policy Gateway](https://students.mq.edu.au/support/study/student-policy-gateway) (<https://students.mq.edu.au/support/study/student-policy-gateway>). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit [Policy Central](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central) (<https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central>).

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: <https://students.mq.edu.au/study/getting-started/student-conduct>

Results

Results published on platform other than [eStudent](#), (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](#). For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- [Workshops](#)
- [StudyWise](#)
- [Academic Integrity Module for Students](#)
- [Ask a Learning Adviser](#)

Student Services and Support

Students with a disability are encouraged to contact the [Disability Service](#) who can provide appropriate help with any issues that arise during their studies.

Student Enquiries

For all student enquiries, visit Student Connect at ask.mq.edu.au

If you are a Global MBA student contact globalmba.support@mq.edu.au

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

PG - Capable of Professional and Personal Judgment and Initiative

Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

Learning outcomes

- Develop a skill set and strategies for designing, managing and evaluating EIA processes and Environmental Impact Statement (EIS)
- Critically analyse the EIA process and stakeholder responses to the identified environmental impacts of activities and/or developments
- Understand the sustainable development implications of EIA processes adopted in different nations

Assessment tasks

- 2a - EIS Review
- 2b - Group Presentation

PG - Discipline Knowledge and Skills

Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

Learning outcomes

- Identify and describe environmental issues that might be subject to EIA
- Describe the framework (ie international, government, community, proponents, expertise) within which EIAs are carried out, and recognise the issues arising out of the interactions within this framework
- Demonstrate an effective grasp of the international literature relevant to EIA
- Begin to understand the roles of cultural, scientific, social, economic, and legal processes in EIA in all spheres of government within Australia and other nations
- Develop a skill set and strategies for designing, managing and evaluating EIA processes and Environmental Impact Statement (EIS)
- Critically analyse the EIA process and stakeholder responses to the identified

environmental impacts of activities and/or developments

- Evaluate policies and plans, proposed in the EIA process for the management of the impacts of activities and/or developments, from a sustainable development perspective
- Understand the sustainable development implications of EIA processes adopted in different nations

Assessment tasks

- 1a - EIA System Review Outline
- 1b - EIA System Review
- 2a - EIS Review
- 2b - Group Presentation

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes

- Identify and describe environmental issues that might be subject to EIA
- Begin to understand the roles of cultural, scientific, social, economic, and legal processes in EIA in all spheres of government within Australia and other nations
- Develop a skill set and strategies for designing, managing and evaluating EIA processes and Environmental Impact Statement (EIS)
- Critically analyse the EIA process and stakeholder responses to the identified environmental impacts of activities and/or developments
- Evaluate policies and plans, proposed in the EIA process for the management of the impacts of activities and/or developments, from a sustainable development perspective
- Understand the sustainable development implications of EIA processes adopted in different nations

Assessment tasks

- 1a - EIA System Review Outline
- 1b - EIA System Review
- 2a - EIS Review
- 2b - Group Presentation

PG - Research and Problem Solving Capability

Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

Learning outcomes

- Identify and describe environmental issues that might be subject to EIA
- Describe the framework (ie international, government, community, proponents, expertise) within which EIAs are carried out, and recognise the issues arising out of the interactions within this framework
- Demonstrate an effective grasp of the international literature relevant to EIA
- Develop a skill set and strategies for designing, managing and evaluating EIA processes and Environmental Impact Statement (EIS)
- Critically analyse the EIA process and stakeholder responses to the identified environmental impacts of activities and/or developments
- Evaluate policies and plans, proposed in the EIA process for the management of the impacts of activities and/or developments, from a sustainable development perspective

Assessment tasks

- 1a - EIA System Review Outline
- 1b - EIA System Review
- 2a - EIS Review
- 2b - Group Presentation

PG - Effective Communication

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.

This graduate capability is supported by:

Learning outcome

- Understand the sustainable development implications of EIA processes adopted in different nations

Assessment tasks

- 1a - EIA System Review Outline
- 1b - EIA System Review
- 2a - EIS Review
- 2b - Group Presentation

PG - Engaged and Responsible, Active and Ethical Citizens

Our postgraduates will be ethically aware and capable of confident transformative action in relation to their professional responsibilities and the wider community. They will have a sense of connectedness with others and country and have a sense of mutual obligation. They will be able to appreciate the impact of their professional roles for social justice and inclusion related to national and global issues

This graduate capability is supported by:

Learning outcome

- Understand the sustainable development implications of EIA processes adopted in different nations

Assessment Standards

Requirements to Complete this Unit Satisfactorily

In order to successfully complete this unit students must:

- *attend at least 80% of scheduled lectures;*
- *participate in class discussions, workshops and activities;*
- *complete all assessment tasks; and*
- *reach a satisfactory postgraduate level of achievement in assignments or other assessment as determined by the Head of Department.*

Assessment Standards

Many specific aspects of your work are important (as identified in the following standards), but it is the overall quality of the completed work that is important. Assignments will be assessed holistically. The following bands are 'ideal types': lists of the features of typical examples of assignments at each level.

The standard of each assignment is obviously important - good grades demonstrate that your work is competent, proficient or excellent. But from a learning perspective, it is equally important to look at your own work developmentally: to look for gradual improvement, deepening insight, and broadening competency. Grades for assignments assess the standard of your work.

Comments on assignments are intended to be helpful developmentally: indicating what you have achieved, and how you could improve your work.

For a grade of High Distinction ($\geq 85\%$)

- use and synthesis of a variety of high quality sources not mentioned in class or on reading lists;
- considered use of dictionary and technical terms, diagrams and/or other sources to define and set the topic in context;
- incisive and decisive specification of the key issues;
- prioritisation and exposition of the key issues in a clear and logical sequence;
- relevant contrary arguments are identified and effectively dealt with;
- discussion forms a sound basis for clear, justified and comprehensive recommendations and conclusions;
- independence of thought and obvious originality;
- demonstrated ability to weigh arguments and form clear, considered personal viewpoints;
- proficient use of the English language;
- references presented at 'publishable' standard.

Overall, your work demonstrates, in an interesting or challenging way, originality based on proficiency in all the learning objectives.

For a grade of Distinction (75-84%)

- use and synthesis of some high quality sources not mentioned in class or on reading lists, and reference to some others;
- adequate use of dictionary and technical terms, diagrams and/or other sources to define and set the topic in context;
- clear specification of the key issues;
- key issues generally presented in a logical sequence;
- relevant contrary arguments raised but might not be fully resolved;
- discussion leads to clear and justified recommendations and conclusions;
- independence of thought and significant originality;
- general ability to weigh arguments and form personal viewpoints;
- clear use of the English language;
- references largely error free.

Overall, your work demonstrates a comprehensive awareness and understanding of the topic of the assignment.

For a grade of Credit (65-74%)

- use and synthesis of some high quality sources, and reference to some additional good

quality material;

- use of dictionary and technical terms to define and contextualise the topic;
- overall awareness of the key issues;
- the selected key issues generally presented in a logical sequence;
- some contrary arguments raised with inadequate appreciation of their significance;
- a clear statement of conclusions and recommendations;
- some independent thought but limited originality;
- difficulties in weighing arguments and presenting personal viewpoints;
- sometimes proficient and always passable use of the English language;
- some errors of omission or detail in presentation of references.

Overall, your work demonstrates the ability to use and apply fundamental concepts and skills.

For a grade of Pass (50-64%)

- limited use and synthesis of good quality sources;
- use of dictionary or vernacular definitions in an attempt to identify and set the topic in context;
- some awareness of the key issues;
- some attempt to order the argument, but flaws in logical discipline;
- few contrary arguments raised and little appreciation of their significance or resolution;
- a generally clear statement of conclusions and recommendations;
- little independent thought and minimal originality;
- little weighing of argument and lack of clarity in personal viewpoints;
- passable use of the English language;
- some errors of omission or detail in presentation of references.

Overall, your work satisfies the basic learning requirements of the assignment.

For a grade of Fail (45-49%)

- at the lower end of the acceptable range for most criteria for a grade of 4.

For a lower grade of Fail (26-44%)

- lack of awareness of sources or what the question is about;
- confused definitions;
- general inability to identify the key issues;
- inability to order the argument;
- few, if any, contrary arguments raised and no appreciation of their significance or resolution;

- inadequate statement of conclusions or recommendations;
- no independent thought or originality;
- no ability to weigh arguments or form personal viewpoints.

For a grade of Serious Fail (< 26%)

- no reference to suggested sources, generally inappropriate use of materials
- no attempt at definitions;
- no awareness of key issues, such that the paper fails to address or answer the question;
- arguments unformulated, many errors, unsupported assertions, unjustified generalisations;
- contrary arguments impugned or ignored;
- inconclusive outcome to the paper;
- no independent thought, any originality likely to be illogical;
- inability to weigh arguments, personal viewpoints absent or inadequate.

See also: Neil DT, Wadley DA, and Phinn SR 1998, *Assessment Guidelines*, School of Geography, Planning and Environmental Management, The University of Queensland.

Used with permission. This text is a very minor adaptation of an excerpt from Neil, Wadley and Phinn (1998). See the full text in either version for further very useful background on these standards, and the criteria they reflect.

Academic Honesty

It is a fundamental principle that all staff and students act with integrity in the creation, development, application and use of ideas and information. This means that:

- all academic work claimed as original is the work of the author making the claim
- all academic collaborations are acknowledged
- academic work is not falsified in any way
- when the ideas of others are used, these ideas are acknowledged appropriately.

All students should familiarise themselves with [Macquarie University's Academic Honesty Policy](#).

The Department recommends that students familiarise themselves with the [explanation of plagiarism](#) on the Georgetown University Honor Council website which discusses plagiarism in an easy to understand and comprehensive manner.

Teaching and Learning Strategy

The teaching process has four main elements:

1. Lectures that introduce basic concepts.

2. Talks from guest lecturers that convey the complexities of environmental impact assessment, in practice, in diverse settings.
3. Workshop sessions that provide opportunities for experiential learning.
4. Assignments that require students to investigate diverse aspects of EIA and practice key skills.

Students are expected to:

- participate in workshop activities in small groups;
- read set readings in advance for classes;
- follow current developments with regard to environmental impact assessment in the media; and
- contribute to a group presentation evaluating a substantial Environmental Impact Statement.

Lectures from GSE staff and guest lecturers will introduce students to:

- contexts, frames for, and history of, environmental impact assessment,
- scoping and design of environmental impact assessments,
- project management of environmental impact assessments,
- reviewing environmental impact assessments, and
- critiques of current practice and options for improvement.

These issues will be covered through a mixture of theory and case studies.
