Unit description

This capstone core unit in the Master of Public Health – Cross Disciplinary Studies integrates your learning from across the program. You will further develop skills to conduct a systematic review and reflect on practice, both of which are essential to the practice of Public Health. You will analyze a systematic review on a topic covered in previous units in the program. You will draw together reflections on your entire studies to make meaning of your learning. As part of this process you will compile a portfolio in which you consider your skills development, understanding of content and context, and consider your ongoing engagement in Public Health practice.
