Co-badged with FOBE830

Unit description
This unit provides students with an introduction to fundamental elements of research design and quantitative research approaches within the business and economics. It seeks to develop students' understanding of the contexts in which quantitative research can be undertaken and the ability to analyse, conduct, and evaluate quantitative forms of research.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates

Learning Outcomes
1. Review and interpret the basic rationale and application of relevant quantitative
approaches and analyses in disciplinary contexts of management, accounting and marketing research.

2. Formulate appropriate hypotheses and propose the most appropriate research design for a research project.

3. Use specific statistical techniques to analyse data and explain present results.

General Assessment Information
Instructions in regard to how to submit each assessment will be provided on iLearn.

Assessment Tasks

<table>

</tr>
<tr>
<td>Data analysis and reporting</td>
<td>55%</td>
<td>No</td>
<td>12/11/2019</td>
</tr>
</tbody>
</table>

Research paper critique
Due: **02/09/2019**
Weighting: 15%

This assignment requires students to provide a critical review of a research paper and draw an appropriate conclusion from their critical analysis. More information will be provided on iLearn in due course.

This Assessment Task relates to the following Learning Outcomes:
- Review and interpret the basic rationale and application of relevant quantitative approaches and analyses in disciplinary contexts of management, accounting and marketing research.

Research proposal
Due: **11/10/2019**
Weighting: 30%

This assignment requires students to develop a research project on a topic of their own choice using the survey method. More information will be provided on iLearn in due course.

This Assessment Task relates to the following Learning Outcomes:
- Review and interpret the basic rationale and application of relevant quantitative approaches and analyses in disciplinary contexts of management, accounting and
marketing research.

* Formulate appropriate hypotheses and propose the most appropriate research design for a research project.

**Data analysis and reporting**

**Due:** 12/11/2019  
**Weighting:** 55%

This assessment will provide students with raw data in a general business discipline to analyse and to write an analytical report in response to the given research questions. More information will be provided on iLearn in due course.

This Assessment Task relates to the following Learning Outcomes:

* Use specific statistical techniques to analyse data and explain present results.

**Delivery and Resources**

This unit is structured around attendance at one 3 hour seminar per week. The class timetable can be found on the university web site [https://timetables.mq.edu.au/](https://timetables.mq.edu.au/). All important information including weekly seminar lectures, assessment details, important announcements and staff contact details can be found at the unit iLearn website.

The following are recommended books related to the unit. They are available in the library.

**Unit Schedule**

<table>
<thead>
<tr>
<th>Class week</th>

## Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central). Students should be aware of the following policies in particular with regard to Learning and Teaching:

### Analysing and reporting IV
- Hypotheses testing
- Types of tests:
  - One-sample t-test
  - Independent-samples t-test
  - Paired-samples t-test

### Analysing and reporting II
- ANOVA
- Cross-tabulation
- Correlation
- Regression

### Analysing and reporting III
- Multiple regression analysis
- Logistic regression

### Analysing and reporting V
- Multiple moderated regression analysis
- Multiple mediated regression analysis

### Analysing and reporting VI
- Multiple moderated and mediated analysis (moderated mediation analyses)

### Consultation - Data Analysis
- By appointment

---

• Academic Appeals Policy
• Academic Integrity Policy
• Academic Progression Policy
• Assessment Policy
• Fitness to Practice Procedure
• Grade Appeal Policy
• Complaint Management Procedure for Students and Members of the Public
• Special Consideration Policy (Note: The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.)

Undergraduate students seeking more policy resources can visit the Student Policy Gateway (https://students.mq.edu.au/support/study/student-policy-gateway). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit Policy Central (https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central).

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/study/getting-started/student-conduct

**Results**

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

**Student Support**

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/.

**Learning Skills**

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

• Workshops
• StudyWise
• Academic Integrity Module for Students
• Ask a Learning Adviser
Student Enquiry Service
For all student enquiries, visit Student Connect at ask.mq.edu.au
If you are a Global MBA student contact globalmba.support@mq.edu.au

Equity Support
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help
For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University’s IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

Graduate Capabilities
PG - Research and Problem Solving Capability
Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

Learning outcomes

• Review and interpret the basic rationale and application of relevant quantitative approaches and analyses in disciplinary contexts of management, accounting and marketing research.
• Formulate appropriate hypotheses and propose the most appropriate research design for a research project.

Assessment tasks

• Research paper critique
• Research proposal

PG - Discipline Knowledge and Skills
Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:
Learning outcomes

• Review and interpret the basic rationale and application of relevant quantitative approaches and analyses in disciplinary contexts of management, accounting and marketing research.
• Formulate appropriate hypotheses and propose the most appropriate research design for a research project.
• Use specific statistical techniques to analyse data and explain present results.

Assessment tasks

• Research paper critique
• Research proposal
• Data analysis and reporting

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes

• Review and interpret the basic rationale and application of relevant quantitative approaches and analyses in disciplinary contexts of management, accounting and marketing research.
• Formulate appropriate hypotheses and propose the most appropriate research design for a research project.
• Use specific statistical techniques to analyse data and explain present results.

Assessment tasks

• Research paper critique
• Research proposal
• Data analysis and reporting

PG - Effective Communication

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.
This graduate capability is supported by:

**Learning outcomes**

- Formulate appropriate hypotheses and propose the most appropriate research design for a research project.
- Use specific statistical techniques to analyse data and explain present results.

**Assessment tasks**

- Research proposal
- Data analysis and reporting
