Unit description
This unit builds on previous units to further students’ understanding of English as a language of communication through reading, writing, listening, speaking, viewing and representing experiences, ideas and values; as well as strengthening understanding of the ways in which young children acquire skills, knowledge and attitudes related to these literacies. The unit includes: analysis of children’s reading and writing behaviours, and assessment of early reading and writing development; approaches to working with literary, factual and multimedia texts; and literacy programming options for children in both prior-to-school and school-based group settings. It examines effective adult strategies for fostering development of literacy as social practice; support for children experiencing difficulties making progress in literacy; and issues related to social justice and critical literacies. The critical role of culture and contexts, particularly for Indigenous and EAL-D (English as an additional language or dialect) learners, is also examined.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates

Learning Outcomes
1. Critical individual and collaborative engagement with research on multiliteracies, including new literacies and visual, multimodal and critical literacy
2. Critical understanding of the roles adults play in children’s literacy development, of oral language as foundational for literacy success, and of the development of reading, writing, and multimodal and critical literacy

3. Understanding of the role and value of language and literacy across the curriculum in prior-to-school and school (K-6) contexts

4. Skills in exploring, designing, implementing and evaluating strategies for assessing and promoting children’s literacy development through a range of literary and factual (multimodal) texts and for a range of children from different socio-cultural contexts and with different abilities

5. Ability to examine and evaluate literacy programming options in both prior-to-school and school-based settings

6. Strong understanding of the role of literacy education in promoting social justice for children experiencing in literacy learning, Indigenous and EAL-D (English as an additional language or dialect) learners

• Ability to examine and evaluate literacy programming options in both prior-to-school and school-based settings

• Strong understanding of the role of literacy education in promoting social justice for children experiencing in literacy learning, Indigenous and EAL-D (English as an additional language or dialect) learners

Delivery and Resources
Delivery, resources and technologies are summarised below:

The unit is taught through lectures, large group tutorials and small study groups in which students research assigned topics and meet for discussion with staff. Scenario based planning, assessment tasks and workshop sessions are included in tutorials. Assignments enable the development of the ability to position oneself in current research-informed literacy debates as well as to teach effectively within diverse contexts. Research-literature searches are required to meet assignment criteria as is the contribution to a writing portfolio which is shared in tutorial writing circles. External students must listen to recorded lectures and contribute to on-line discussions as well as participating in the mandatory on-campus sessions.

**Discipline Specific Knowledge and Skills**

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.
This graduate capability is supported by:

**Learning outcomes**

- Critical individual and collaborative engagement with research on multiliteracies, including new literacies and visual, multimodal and critical literacy

Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

Learning outcomes

• Critical individual and collaborative engagement with research on multiliteracies, including new literacies and visual, multimodal and critical literacy

• Understanding of the role and value of language and literacy across the curriculum in prior-to-school and school (K-6) contexts

**Engaged and Ethical Local and Global citizens**

As local citizens our graduates will be aware of indigenous perspectives and of the nation’s historical context. They will be engaged with the challenges of contemporary society and with knowledge and ideas. We want our graduates to have respect for diversity, to be open-minded, sensitive to others and inclusive, and to be open to other cultures and perspectives: they should have a level of cultural literacy. Our graduates should be aware of disadvantage and social justice, and be willing to participate to help create a wiser and better society.

This graduate capability is supported by:

**Learning outcomes**

- Critical individual and collaborative engagement with research on multiliteracies, including new literacies and visual, multimodal and critical literacy

Commitment to Continuous Learning

Our graduates will have enquiring minds and a literate curiosity which will lead them to pursue knowledge for its own sake. They will continue to pursue learning in their careers and as they participate in the world. They will be capable of reflecting on their experiences and relationships with others and the environment, learning from them, and growing - personally, professionally and socially.

This graduate capability is supported by:
