Unit description

This unit will focus on special topics on financial institutions which fail. We will look at empirical studies of insolvencies from different countries and for different types of financial institutions (including life and general insurers, health funds, banks, superannuation funds, hedge funds, and other investment management and risk management organisations). We will consider factors such as product design, pricing, reserving, investment, asset-liability management, liquidity management, reinsurance, accounting issues, regulatory arbitrage and corporate governance. We will also be looking at the effectiveness of regulation, both in preventing failures and dealing with the consequences of failures (eg, using guarantee schemes), along with research in financial institutions management and regulation.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Demonstrate an understanding of the regulatory framework for financial institutions, including both market conduct and prudential regulation

ULO2: Identify common causes of banking failures; how systemic risks can destabilise financial systems; management of credit risks

ULO3: Identify common causes of insurance company losses; management of different types of risk

ULO4: Explain the role of auditor, actuaries, accounting standards and actuarial standards in managing solvency (including case studies on financial reinsurance)

ULO5: Discuss different theories of regulation, objectives of regulators and the causes of regulatory failure

ULO6: Develop the concepts and skills necessary for advanced research in financial institutions management and regulation
