Unit description

This is an advanced Master of Research unit in financial accounting and corporate governance which examines accounting theories and their relationship to a broad range of issues of current concern to both the accounting profession and accounting information users. Given the current focus and importance of global harmonisation, and the convergence of accounting and corporate governance, students are required to examine current issues and problems in complex contexts using social, ethical, economic, political and global perspectives. Students will also be required to analyse relevant scholarly research papers. The objective of the unit is for students to critically evaluate accounting theories, governance policies and procedures. Students will use critical analysis skills to evaluate, synthesise and judge through research and essay writing. Research findings are used to underpin all theories. Students will be challenged to question the foundations of accounting and corporate governance and to think critically about current issues in accounting and accountability.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are

available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Demonstrate an advanced level of theoretical accounting knowledge, including knowledge in financial and management accounting and corporate governance, and critically apply knowledge in a range of contexts.

ULO2: Evaluate relevant quantitative research methods and principles applicable to accounting.

ULO3: Conduct independent research to recommend appropriate solutions to complex business problems.

ULO4: Demonstrate communication skills in accordance with academic and disciplinary research conventions.

ULO5: Appreciate the need for corporate social responsibility and ethical thinking in research.
