Unit description

The aim of this unit is to discuss, apply and evaluate the concepts, principles and practices underpinning the preparation and interpretation of corporate reports. It looks into the assessment of managements' stewardship and ethics and considers the needs of the wider group of stakeholders. The content examines the financial reporting framework within which accountants operate. The detailed financial reporting requirements for entities are examined, leading to the preparation of group financial reports in accordance with International Financial Reporting Standards. The unit deals with the nature of reporting for specialised entities including small to medium sized enterprises. The unit explores and demonstrates the role of the accountant as both a financial analyst and an adviser, through assessment of the financial performance and position of reporting entities. The accountant's role is examined, in assessing and advising on the implications of accounting regulations on financial reporting.
