Unit description

This unit will provide the postgraduate student with an analytical and critical understanding of how economic agents (firms, consumers, corporations, governments, families) behave, and how these agents operate in our economy. The unit introduces students to the analysis of the ways in which individuals, businesses and governments behave in contemporary economic settings. Examples of topics covered are consumer behaviour, the behaviour of the firm, its production and cost structure, competition and market structures, monopoly, labour and capital markets, strategic interaction, social outcomes and welfare analysis. These analytical tools are meant to allow students to better understand contemporary global issues. The theory is taught in an applied context. Any basic economic models and accompanying mathematical and other skills required by the unit's material are taught as part of the unit curriculum.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Explain how microeconomic concepts can be applied to a variety of economic problems and issues faced by society.

ULO2: Critically evaluate the applicability of microeconomic theory to the real world, in order to appreciate the challenges faced by economists.

ULO3: Select, justify and utilise appropriate microeconomic knowledge to provide solutions to complex economic problems.

ULO4: Utilise appropriate practices involved in today's essential and contemporary management communication challenges.
