Unit description

This unit provides an introduction to modern applied microeconomics. The unit reviews some of the most important and interesting models of microeconomic theory and considers their application to the real world. This is achieved by careful analysis of a selection of recent scholarly publications using modern techniques employed by applied researchers. The primary objective of the unit is to connect a number of the foundation theories taught in microeconomics with sound empirical approaches. After completion of the unit, students will have the ability to both perform and evaluate applications of economic theory to a range of business, policy and regulatory situations.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Evaluate how a knowledge and understanding of theories and applications of microeconomics are utilised by academic scholars.

ULO2: Use critical thinking and problem solving ability to apply microeconomic theory to real life economic problems.

ULO3: Apply analytical skills in the synthesis and interpretation of applied research in microeconomics.

ULO4: Communicate a knowledge of microeconomic theories and their applications to

both academic and non-academic audiences, to an academic standard of written work.
