Unit description

The 3rd SPINE unit aimed to develop professional, transferable and employability skills. The unit deals with the design of complex systems from a top-down perspective. Students will be exposed to different engineering management approaches (waterfall and Agile) and other tools involved in the field of systems engineering. Students will be able to apply Design Thinking processes and apply problem-solving heuristics to solve complex engineering systems.

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

## Learning Outcomes

On successful completion of this unit, you will be able to:

**ULO1:** Evaluate a complex engineering problem from a range of perspectives, such as technological, social, environmental, financial, professional and ethical.

**ULO2:** Analyse and describe large engineering problems and related systems and subsystems.

**ULO3:** Apply appropriate engineering modelling and management tools in analysing a

large engineering system.

**ULO4:** Apply design thinking and associated thinking techniques in generating a variety of solutions.

**ULO5:** Explain and integrate human and non-technical elements in an engineering project and its associated systems.
